SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

Form 10-Q

(Mark One)

☒ **QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15 (d) OF THE SECURITIES EXCHANGE ACT OF 1934**

For the quarterly period ended July 3, 2021

OR

☐ **TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

For the transition period from _____ to _____.

Commission File Number 1-5480

Textron Inc.

(Exact name of registrant as specified in its charter)

Delaware

05-0315468

(State or other jurisdiction of incorporation or organization)

(I.R.S. Employer Identification No.)

40 Westminster Street, Providence, RI

02903

(Address of principal executive offices)

(Zip code)

(401) 421-2800

(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

<u>Title of each class</u>	<u>Trading Symbol (s)</u>	<u>Name of each exchange on which registered</u>
Common stock, \$0.125 par value	TXT	New York Stock Exchange (NYSE)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, smaller reporting company, or an emerging growth company. See definitions of "large accelerated filer," "accelerated filer," "smaller reporting company" and "emerging growth company" in Rule 12b-2 of the Exchange Act (Check one):

Large accelerated filer	☒	Accelerated filer	☐	Non-accelerated filer	☐
Smaller reporting company	☐			Emerging growth company	☐

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☒

As of July 16, 2021, there were 224,137,963 shares of common stock outstanding.

TEXTRON INC.
Notes to the Consolidated Financial Statements (Unaudited)

Note 1. Basis of Presentation

Our Consolidated Financial Statements include the accounts of Textron Inc. (Textron) and its majority-owned subsidiaries. We have prepared these unaudited consolidated financial statements in accordance with accounting principles generally accepted in the U.S. for interim financial information. Accordingly, these interim financial statements do not include all of the information and footnotes required by accounting principles generally accepted in the U.S. for complete financial statements. The consolidated interim financial statements included in this quarterly report should be read in conjunction with the consolidated financial statements included in our Annual Report on Form 10-K for the year ended January 2, 2021. In the opinion of management, the interim financial statements reflect all adjustments (consisting only of normal recurring adjustments) that are necessary for the fair presentation of our consolidated financial position, results of operations and cash flows for the interim periods presented. The results of operations for the interim periods are not necessarily indicative of the results to be expected for the full year.

Our financings are conducted through two separate borrowing groups. The Manufacturing group consists of Textron consolidated with its majority-owned subsidiaries that operate in the Textron Aviation, Bell, Textron Systems and Industrial segments. The Finance group, which also is the Finance segment, consists of Textron Financial Corporation and its consolidated subsidiaries. We designed this framework to enhance our borrowing power by separating the Finance group. Our Manufacturing group operations include the development, production and delivery of tangible goods and services, while our Finance group provides financial services. Due to the fundamental differences between each borrowing group's activities, investors, rating agencies and analysts use different measures to evaluate each group's performance. To support those evaluations, we present balance sheet and cash flow information for each borrowing group within the Consolidated Financial Statements. All significant intercompany transactions are eliminated from the Consolidated Financial Statements, including retail financing activities for inventory sold by our Manufacturing group and financed by our Finance group.

Use of Estimates

We prepare our financial statements in conformity with generally accepted accounting principles, which require us to make estimates and assumptions that affect the amounts reported in the financial statements. Actual results could differ from those estimates. Our estimates and assumptions are reviewed periodically, and the effects of changes, if any, are reflected in the Consolidated Statements of Operations in the period that they are determined.

Contract Estimates

For contracts where revenue is recognized over time, we recognize changes in estimated contract revenues, costs and profits using the cumulative catch-up method of accounting. This method recognizes the cumulative effect of changes on current and prior periods with the impact of the change from inception-to-date recorded in the current period. Anticipated losses on contracts are recognized in full in the period in which the losses become probable and estimable.

In the second quarter of 2021 and 2020, our cumulative catch-up adjustments increased segment profit by \$15 million and \$17 million, respectively. These adjustments increased net income in the second quarter of 2021 by \$11 million (\$0.05 per diluted share) and decreased the net loss in the second quarter of 2020 by \$13 million (\$0.06 per share). Gross favorable profit adjustments totaled \$40 million and \$46 million in the second quarter of 2021 and 2020, respectively, and the gross unfavorable profit adjustments totaled \$25 million and \$29 million, respectively. We recognized revenues of \$20 million and \$22 million in the second quarter of 2021 and 2020, respectively, from performance obligations satisfied in prior periods that related to changes in profit booking rates.

In the first half of 2021 and 2020, our cumulative catch-up adjustments increased segment profit by \$29 million and \$19 million, respectively. These adjustments increased net income in the first half of 2021 by \$22 million (\$0.10 per diluted share) and decreased the net loss in the first half of 2020 by \$14 million (\$0.06 per share). Gross favorable profit adjustments totaled \$76 million and \$73 million in the first half of 2021 and 2020, respectively, and the gross unfavorable profit adjustments totaled \$47 million and \$54 million, respectively. We recognized revenues of \$38 million and \$26 million in the first half of 2021 and 2020, respectively, from performance obligations satisfied in prior periods that related to changes in profit booking rates.

Note 2. Business Disposition

On January 25, 2021, we completed the sale of TRU Simulation + Training Canada Inc. within our Textron Systems segment for net cash proceeds of \$38 million and recorded an after-tax gain of \$17 million.

Note 3. Accounts Receivable and Finance Receivables

Accounts Receivable

Accounts receivable is composed of the following:

<i>(In millions)</i>	July 3, 2021	January 2, 2021
Commercial	\$ 706	\$ 668
U.S. Government contracts	147	155
	853	823
Allowance for credit losses	(31)	(36)
Total accounts receivable, net	\$ 822	\$ 787

Finance Receivables

Finance receivables are presented in the following table:

<i>(In millions)</i>	July 3, 2021	January 2, 2021
Finance receivables	\$ 682	\$ 779
Allowance for credit losses	(30)	(35)
Total finance receivables, net	\$ 652	\$ 744

Finance Receivable Portfolio Quality

We internally assess the quality of our finance receivables based on a number of key credit quality indicators and statistics such as delinquency, loan balance to estimated collateral value and the financial strength of individual borrowers and guarantors. Because many of these indicators are difficult to apply across an entire class of receivables, we evaluate individual loans on a quarterly basis and classify these loans into three categories based on the key credit quality indicators for the individual loan. These three categories are performing, watchlist and nonaccrual.

We classify finance receivables as nonaccrual if credit quality indicators suggest full collection of principal and interest is doubtful. In addition, we automatically classify accounts as nonaccrual once they are contractually delinquent by more than three months unless collection of principal and interest is not doubtful. Accounts are classified as watchlist when credit quality indicators have deteriorated as compared with typical underwriting criteria, and we believe collection of full principal and interest is probable but not certain. All other finance receivables that do not meet the watchlist or nonaccrual categories are classified as performing.

We measure delinquency based on the contractual payment terms of our finance receivables. In determining the delinquency aging category of an account, any/all principal and interest received is applied to the most past-due principal and/or interest amounts due. If a significant portion of the contractually due payment is delinquent, the entire finance receivable balance is reported in accordance with the most past-due delinquency aging category.

Since the first quarter of 2020, the Finance segment has worked with certain customers impacted by the pandemic to provide payment relief through loan modifications. The types of temporary payment relief we offered to these customers included delays in the timing of required principal payments, deferrals of interest payments and/or interest-only payments. The majority of these modified loans have returned to paying principal and interest. For loan modifications that cover payment-relief periods in excess of six months, even if the loan was previously current, the loan is deemed a troubled debt restructuring and considered impaired. These impaired loans are classified as either nonaccrual or watchlist based on a review of the credit quality indicators as discussed above.

During the first half of 2021, we modified finance receivable contracts for 18 customers with an outstanding balance at July 3, 2021 totaling \$71 million, which were all categorized as troubled debt restructurings. Due to the nature of these restructurings, the financial effects were not significant. We had one customer default related to finance receivables previously modified as a troubled debt restructuring that had an insignificant outstanding balance. We believe our allowance for credit losses adequately covers our exposure on these loans as our estimated collateral values largely exceed the outstanding loan amounts.

[Table of Contents](#)

Finance receivables categorized based on the credit quality indicators and by the delinquency aging category are summarized as follows:

<i>(Dollars in millions)</i>	July 3, 2021	January 2, 2021
Performing	\$ 575	\$ 612
Watchlist	1	74
Nonaccrual	106	93
Nonaccrual as a percentage of finance receivables	15.54%	11.94%
Current and less than 31 days past due	\$ 655	\$ 738
31-60 days past due	10	12
61-90 days past due	—	11
Over 90 days past due	17	18
60+ days contractual delinquency as a percentage of finance receivables	2.49%	3.72%

At July 3, 2021, 30% of our performing finance receivables were originated since the beginning of 2020 and 31% were originated from 2017 to 2019. For finance receivables categorized as nonaccrual, 69% were originated from 2017 to 2019.

On a quarterly basis, we evaluate individual larger balance accounts for impairment. A finance receivable is considered impaired when it is probable that we will be unable to collect all amounts due according to the contractual terms of the loan agreement based on our review of the credit quality indicators described above. Impaired finance receivables include both nonaccrual accounts and accounts for which full collection of principal and interest remains probable, but the account's original terms have been, or are expected to be, significantly modified. If the modification specifies an interest rate equal to or greater than a market rate for a finance receivable with comparable risk, the account is not considered impaired in years subsequent to the modification.

A summary of finance receivables and the allowance for credit losses, based on the results of our impairment evaluation, is provided below. The finance receivables included in this table specifically exclude leveraged leases in accordance with U.S. generally accepted accounting principles.

<i>(In millions)</i>	July 3, 2021	January 2, 2021
Finance receivables evaluated collectively	\$ 481	\$ 521
Finance receivables evaluated individually	107	163
Allowance for credit losses based on collective evaluation	24	28
Allowance for credit losses based on individual evaluation	6	7
Impaired finance receivables with specific allowance for credit losses	\$ 38	\$ 46
Impaired finance receivables with no specific allowance for credit losses	69	117
Unpaid principal balance of impaired finance receivables	117	175
Allowance for credit losses on impaired finance receivables	6	7
Average recorded investment of impaired finance receivables	128	126

Note 4. Inventories

Inventories are composed of the following:

<i>(In millions)</i>	July 3, 2021	January 2, 2021
Finished goods	\$ 1,137	\$ 1,228
Work in process	1,712	1,455
Raw materials and components	815	830
Total inventories	\$ 3,664	\$ 3,513

Note 5. Warranty Liability

Changes in our warranty liability are as follows:

	Six Months Ended	
	July 3, 2021	July 4, 2020
<i>(In millions)</i>		
Beginning of period	\$ 119	\$ 141
Provision	31	22
Settlements	(35)	(29)
Adjustments*	1	(12)
End of period	\$ 116	\$ 122

* Adjustments include changes to prior year estimates, new issues on prior year sales and currency translation adjustments.

Note 6. Leases

We primarily lease certain manufacturing plants, offices, warehouses, training and service centers at various locations worldwide. Our operating leases have remaining lease terms up to 28 years, which include options to extend the lease term for periods up to 25 years when it is reasonably certain the option will be exercised. Operating lease cost totaled \$16 million and \$15 million in the second quarter of 2021 and 2020, respectively, and \$32 million and \$30 million in the first half of 2021 and 2020, respectively. Cash paid for operating leases totaled \$33 million and \$30 million in the first half of 2021 and 2020, respectively, which is classified in cash flows from operating activities. Noncash transactions totaled \$63 million and \$11 million in the first half of 2021 and 2020, respectively, reflecting the recognition of operating lease assets and liabilities for new or extended leases. Variable and short-term lease costs were not significant.

Balance sheet and other information related to our operating leases is as follows:

	July 3, 2021	January 2, 2021
<i>(Dollars in millions)</i>		
Other assets	\$ 383	\$ 349
Other current liabilities	57	47
Other liabilities	332	306
Weighted-average remaining lease term (in years)	10.6	11.6
Weighted-average discount rate	3.40%	4.17%

At July 3, 2021, maturities of our operating lease liabilities on an undiscounted basis totaled \$36 million for the remainder of 2021, \$67 million for 2022, \$57 million for 2023, \$48 million for 2024, \$42 million for 2025 and \$238 million thereafter.

Note 7. Derivative Instruments and Fair Value Measurements

We measure fair value at the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. We prioritize the assumptions that market participants would use in pricing the asset or liability into a three-tier fair value hierarchy. This fair value hierarchy gives the highest priority (Level 1) to quoted prices in active markets for identical assets or liabilities and the lowest priority (Level 3) to unobservable inputs in which little or no market data exist, requiring companies to develop their own assumptions. Observable inputs that do not meet the criteria of Level 1, which include quoted prices for similar assets or liabilities in active markets or quoted prices for identical assets and liabilities in markets that are not active, are categorized as Level 2. Level 3 inputs are those that reflect our estimates about the assumptions market participants would use in pricing the asset or liability based on the best information available in the circumstances. Valuation techniques for assets and liabilities measured using Level 3 inputs may include methodologies such as the market approach, the income approach or the cost approach and may use unobservable inputs such as projections, estimates and management's interpretation of current market data. These unobservable inputs are utilized only to the extent that observable inputs are not available or cost effective to obtain.

Assets and Liabilities Recorded at Fair Value on a Recurring Basis

We manufacture and sell our products in a number of countries throughout the world, and, therefore, we are exposed to movements in foreign currency exchange rates. We primarily utilize foreign currency exchange contracts with maturities of no more than three years to manage this volatility. These contracts qualify as cash flow hedges and are intended to offset the effect of exchange rate fluctuations on forecasted sales, inventory purchases and overhead expenses. Net gains and losses recognized in earnings and Accumulated other comprehensive loss on cash flow hedges, including gains and losses related to hedge ineffectiveness, were not significant in the periods presented.

[Table of Contents](#)

Our foreign currency exchange contracts are measured at fair value using the market method valuation technique. The inputs to this technique utilize current foreign currency exchange forward market rates published by third-party leading financial news and data providers. These are observable data that represent the rates that the financial institution uses for contracts entered into at that date; however, they are not based on actual transactions, so they are classified as Level 2. At July 3, 2021 and January 2, 2021, we had foreign currency exchange contracts with notional amounts upon which the contracts were based of \$410 million and \$318 million, respectively. At July 3, 2021, the fair value amounts of our foreign currency exchange contracts were a \$11 million asset and a \$2 million liability. At January 2, 2021, the fair value amounts of our foreign currency exchange contracts were a \$5 million asset and a \$2 million liability.

Our Finance group enters into interest rate swap agreements to mitigate certain exposures to fluctuations in interest rates. By using these contracts, we are able to convert floating-rate cash flows to fixed-rate cash flows. These agreements are designated as cash flow hedges. At July 3, 2021, we had a swap agreement for a notional amount of \$289 million with a maturity of August 2023 and a fair value of a \$3 million liability. At January 2, 2021, we had a swap agreement for a notional amount of \$294 million with a maturity of February 2022 and a fair value of a \$4 million liability. The fair value of these swap agreements is determined using values published by third-party leading financial news and data providers. These values are observable data that represent the value that financial institutions use for contracts entered into at that date, but are not based on actual transactions, so they are classified as Level 2.

Assets and Liabilities Not Recorded at Fair Value

The carrying value and estimated fair value of our financial instruments that are not reflected in the financial statements at fair value are as follows:

	July 3, 2021		January 2, 2021	
	Carrying Value	Estimated Fair Value	Carrying Value	Estimated Fair Value
<i>(In millions)</i>				
Manufacturing group				
Debt, excluding leases	\$ (3,186)	\$ (3,430)	\$ (3,690)	\$ (3,986)
Finance group				
Finance receivables, excluding leases	455	504	549	599
Debt	(644)	(607)	(662)	(587)

Fair value for the Manufacturing group debt is determined using market observable data for similar transactions (Level 2). The fair value for the Finance group debt was determined primarily based on discounted cash flow analyses using observable market inputs from debt with similar duration, subordination and credit default expectations (Level 2). Fair value estimates for finance receivables were determined based on internally developed discounted cash flow models primarily utilizing significant unobservable inputs (Level 3), which include estimates of the rate of return, financing cost, capital structure and/or discount rate expectations of current market participants combined with estimated loan cash flows based on credit losses, payment rates and expectations of borrowers' ability to make payments on a timely basis.

Note 8. Shareholders' Equity

A reconciliation of Shareholders' equity is presented below:

	Common Stock	Capital Surplus	Treasury Stock	Retained Earnings	Accumulated Other Comprehensive Loss	Total Shareholders' Equity
<i>(In millions)</i>

Purchases of common stock	—	—	(287)	—	—	(287)
End of period	\$ 29	\$ 1,920	\$ (490)	\$ 6,318	\$ (1,676)	\$ 6,101
Six months ended July 4, 2020						
Beginning of period	\$ 29	\$ 1,674	\$ (20)	\$ 5,682	\$ (1,847)	\$ 5,518
Net loss	—	—	—	(42)	—	(42)
Other comprehensive income	—	—	—	—	56	56
Share-based compensation activity	—	58	—	—	—	58
Dividends declared	—	—	—	(9)	—	(9)
Purchases of common stock	—	—	(54)	—	—	(54)
End of period	\$ 29	\$ 1,732	\$ (74)	\$ 5,631	\$ (1,791)	\$ 5,527

Dividends per share of common stock were \$0.02 for both the second quarter of 2021 and 2020 and \$0.04 for both the first half of 2021 and 2020.

Earnings Per Share

We calculate basic and diluted earnings (loss) per share (EPS) based on net income (loss), which approximates income (loss) available to common shareholders for each period. Basic EPS is calculated using the two-class method, which includes the weighted-average number of common shares outstanding during the period and restricted stock units to be paid in stock that are deemed participating securities as they provide nonforfeitable rights to dividends. Diluted EPS considers the dilutive effect of all potential future common stock, including stock options.

The weighted-average shares outstanding for basic and diluted EPS are as follows:

	Three Months Ended		Six Months Ended	
	July 3, 2021	July 4, 2020	July 3, 2021	July 4, 2020
<i>(In thousands)</i>				
Basic weighted-average shares outstanding	225,963	228,247	226,486	228,279
Dilutive effect of stock options	2,483	—	1,810	—
Diluted weighted-average shares outstanding	228,446	228,247	228,296	228,279

[Table of Contents](#)

For the first half of 2021, stock options to purchase 2.1 million shares of common stock were excluded from the calculation of diluted weighted-average shares outstanding as their effect would have been anti-dilutive. As a result of incurring a net loss for the second quarter and first half of 2020, potential common shares of 0.1 million and 0.3 million, respectively, were excluded from diluted loss per share because the effect would have been anti-dilutive. In addition, stock options to purchase 8.9 million and 8.2 million shares of common stock were excluded from the calculation of diluted weighted-average shares outstanding for the second quarter and first half of 2020, respectively, as their effect would have been anti-dilutive.

Accumulated Other Comprehensive Loss and Other Comprehensive Income

The components of Accumulated other comprehensive loss are presented below:

<i>(In millions)</i>	Pension and Postretirement Benefits Adjustments	Foreign Currency Translation Adjustments	Deferred Gains (Losses) on Hedge Contracts	Accumulated Other Comprehensive Loss
Balance at January 2, 2021	\$ (1,780)	\$ 42	\$ (1)	\$ (1,739)
Other comprehensive loss before reclassifications	—	(17)	6	(11)

*These components of other comprehensive income are included in the computation of net periodic pension cost (credit). See Note 16 of our 2020 Annual Report on Form 10-K for additional information.

Note 9. Segment Information

We operate in, and report financial information for, the following five business segments: Textron Aviation, Bell, Textron Systems, Industrial and Finance. Segment profit is an important measure used for evaluating performance and for decision-making purposes. Segment profit for the manufacturing segments excludes interest expense, certain corporate expenses, gains/losses on major business dispositions and special charges. The measurement for the Finance segment includes interest income and expense along with intercompany interest income and expense.

Our revenues by segment, along with a reconciliation of segment profit to income (loss) from continuing operations before income taxes, are included in the table below:

	Three Months Ended		Six Months Ended	
	July 3, 2021	July 4, 2020	July 3, 2021	July 4, 2020
<i>(In millions)</i>

Remaining Performance Obligations

Our remaining performance obligations, which is the equivalent of our backlog, represent the expected transaction price allocated to our contracts that we expect to recognize as revenues in future periods when we perform under the contracts. These remaining obligations exclude unexercised contract options and potential orders under ordering-type contracts such as Indefinite Delivery, Indefinite Quantity contracts. At July 3, 2021, we had \$9.8 billion in remaining performance obligations of which we expect to recognize revenues of approximately 73% through 2022, an additional 23% through 2024, and the balance thereafter.

Contract Assets and Liabilities

Assets and liabilities related to our contracts with customers are reported on a contract-by-contract basis at the end of each reporting period. At July 3, 2021 and January 2, 2021, contract assets totaled \$572 million and \$561 million, respectively, and contract liabilities totaled \$922 million and \$842 million, respectively, reflecting timing differences between revenues recognized, billings and payments from customers. We recognized revenues of \$170 million and \$448 million in the second quarter and first half of 2021, respectively, and \$121 million and \$352 million in the second quarter and first half of 2020, respectively, that were included in the contract liability balance at the beginning of each year.

Note 11. Retirement Plans

We provide defined benefit pension plans and other postretirement benefits to eligible employees. The components of net periodic benefit cost (credit) for these plans are as follows:

	Three Months Ended		Six Months Ended	
	July 3, 2021	July 4, 2020	July 3, 2021	July 4, 2020
<i>(In millions)</i>				
Pension Benefits				
Service cost	\$ 29	\$ 26	\$ 58	\$ 52
Interest cost	63	74	126	147
Expected return on plan assets	(144)	(143)	(288)	(287)
Amortization of net actuarial loss	38	46	77	92
Amortization of prior service cost	3	3	6	6
Net periodic benefit cost (credit)*	\$ (11)	\$ 6	\$ (21)	\$ 10
Postretirement Benefits Other Than Pensions				
Service cost	\$ —	\$ 1	\$ 1	\$ 2
Interest cost	2	2	3	4
Amortization of net actuarial gain	—	—	(1)	—
Amortization of prior service credit	(1)	(2)	(2)	(3)
Net periodic benefit cost	\$ 1	\$ 1	\$ 1	\$ 3

* Excludes the cost associated with the defined contribution component, included in certain of our U.S.-based defined benefit pension plans, that totaled \$3 million and \$6 million for the second quarter and first half of 2021, respectively, and \$3 million and \$6 million for the second quarter and first half of 2020, respectively.

Note 12. Special Charges

Special charges recorded in the second quarter and first half of 2021 and 2020 by segment and type of cost are presented in the table below.

<i>(In millions)</i>	Severance Costs	Contract Termination and Other	Asset Impairments	Total 2020 COVID-19 Restructuring Plan	Other Asset Impairments	Total

Industrial	8	—	—	8	7	15
Corporate	2	—	—	2	—	2
Total special charges	\$ 51	\$ 12	\$ 15	\$ 78	\$ 39	\$ 117

2020 COVID-19 Restructuring Plan

In the second quarter of 2020, we initiated a restructuring plan to reduce operating expenses through headcount reductions, facility consolidations and other actions in response to the economic challenges and uncertainty resulting from the COVID-19 pandemic. This plan was expanded in the third quarter of 2020 to include additional headcount reductions and facility consolidations. Since inception of the plan, we have incurred total charges of \$118 million, which included severance costs of \$73 million for the termination of approximately 2,700 employees, asset impairment charges of \$27 million and contract terminations and other costs of \$18 million. Of these amounts, \$44 million was incurred at Industrial, \$37 million at Textron Systems, \$33 million at Textron Aviation, and \$4 million at Corporate. We expect to incur additional contract termination costs and other charges in the range of \$10 million to \$20 million, primarily in the Industrial segment, and expect the plan to be substantially completed in the third quarter of 2021.

In the second quarter of 2020 and in connection with the restructuring plan, we ceased manufacturing at TRU Simulation + Training Canada Inc.'s facility in Montreal, Canada, resulting in a production suspension of our commercial air transport simulators. As a result of this action and market conditions, we incurred an inventory charge of \$55 million, which was recorded in Cost of Sales, to write-down the related inventory to its net realizable value.

Other Asset Impairments

In the first quarter of 2020, we recognized \$39 million of intangible asset impairment charges at the Textron Aviation and Industrial segments. Due to the impact of the COVID-19 pandemic, we experienced decreased demand for our products and services as our customers delayed or ceased orders due to the environment of economic uncertainty. In light of these conditions, Textron Aviation had temporarily shut down most aircraft production, including the King Air turboprop and Beechcraft piston product lines, and had instituted employee furloughs. Based on these events, we performed an interim impairment test of the indefinite-lived Beechcraft and King Air trade name intangible assets and recorded an impairment charge of \$32 million.

Restructuring Reserve

Our restructuring reserve activity is summarized below:

<i>(In millions)</i>	Severance Costs	Contract Terminations and Other	Total
Balance at January 2, 2021	\$ 43	\$ 9	\$ 52
Provision for 2020 COVID-19 restructuring plan	—	5	5
Cash paid	(16)	(5)	(21)
Foreign currency translation	(1)	—	(1)
Balance at July 3, 2021	\$ 26	\$ 9	\$ 35

The majority of the remaining cash outlays of \$35 million is expected to be paid in 2021. Severance costs generally are paid on a lump-sum basis and include outplacement costs, which are paid in accordance with normal payment terms.

Note 13. Income Taxes

Our effective tax rate for the second quarter and first half of 2021 was 15.6% and 13.0%, respectively. In the second quarter and first half of 2021, the effective tax rate was lower than the U.S. federal statutory rate of 21%, largely due to the favorable impact of research and development credits. In the first half of 2021, the effective tax rate also included a \$12 million benefit recognized for additional research and development credits related to prior years.

Our effective tax rate for the second quarter and first half of 2020 was (22.0)% and (14.3)%, respectively, compared with the statutory rate of (21)%. In the second quarter and first half of 2020, we incurred special charges and an inventory charge in a non-U.S. jurisdiction where tax benefits cannot be realized, which were partially offset by a \$14 million benefit recognized upon the release of a valuation allowance in a non-U.S. jurisdiction. In the first half of 2020, these items had a more significant impact on the effective tax rate due to the lower loss from continuing operations before income taxes compared to the second quarter of 2020.

Note 14. Commitments and Contingencies

We are subject to legal proceedings and other claims arising out of the conduct of our business, including proceedings and claims relating to commercial and financial transactions; government contracts; alleged lack of compliance with applicable laws and regulations; production partners; product liability; patent and trademark infringement; employment disputes; and environmental, safety and health matters. Some of these legal proceedings and claims seek damages, fines or penalties in substantial amounts or remediation of environmental contamination. As a government contractor, we are subject to audits, reviews and investigations to determine whether our operations are being conducted in accordance with applicable regulatory requirements. Under federal government procurement regulations, certain claims brought by the U.S. Government could result in our suspension or debarment from U.S. Government contracting for a period of time. On the basis of information presently available, we do not believe that existing proceedings and claims will have a material effect on our financial position or results of operations.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Consolidated Results of Operations

(Dollars in millions)	Three Months Ended			Six Months Ended		
	July 3, 2021	July 4, 2020	% Change	July 3, 2021	July 4, 2020	% Change
Revenues	\$ 3,191	\$ 2,472	29%	\$ 6,070	\$ 5,249	16%
Cost of sales	2,660	2,251	18%	5,060	4,638	9%
Selling and administrative expense	314	239	31%	612	502	22%
Gross margin as a % of Manufacturing revenues	16.3%	8.4%		16.3%	11.1%	

In the first half of 2021, customer demand for many of our commercial products increased relative to levels experienced since the pandemic began. For additional information regarding the impact of the pandemic on our operations in 2020, see our Annual Report on Form 10-K for the year ended January 2, 2021. An analysis of our consolidated operating results is set forth below. A more detailed analysis of our segments' operating results is provided in the Segment Analysis section on pages 22 to 27.

Revenues

Revenues increased \$719 million, 29%, in the second quarter of 2021, compared with the second quarter of 2020. The revenue increase primarily included the following factors:

- Higher Textron Aviation revenues of \$414 million, largely due to higher Citation jet volume of \$174 million, higher aftermarket volume of \$98 million and higher commercial turboprop volume of \$75 million.
- Higher Industrial revenues of \$232 million, largely due to higher volume and mix of \$180 million, primarily in the Fuel Systems and Functional Components product line.
- Higher Bell revenues of \$69 million, reflecting higher commercial revenues of \$99 million, partially offset by lower military revenues.

Revenues increased \$821 million, 16%, in the first half of 2021, compared with the first half of 2020. The revenue increase primarily included the following factors:

- Higher Textron Aviation revenues of \$407 million, largely due to higher Citation jet volume of \$178 million, higher aftermarket volume of \$74 million and higher commercial turboprop volume of \$63 million.
- Higher Industrial revenues of \$317 million, due to higher volume and mix of \$227 million, primarily in the Fuel Systems and Functional Components product line, a favorable impact of \$48 million from pricing, and \$42 million from foreign exchange rate fluctuations.
- Higher Bell revenues of \$92 million, reflecting higher commercial revenues of \$165 million, partially offset by lower military revenues.

Cost of Sales and Selling and Administrative Expense

Cost of sales increased \$409 million, 18%, and \$422 million, 9% in the second quarter and first half of 2021, respectively, compared with corresponding periods of 2020, largely due to higher net volume and mix described above. In the second quarter and first half of 2020, cost of sales included the impact of idle facility costs of \$61 million and \$86 million, respectively, along with a \$55 million inventory charge related to the TRU business recognized in the second quarter of 2020. Gross margin as a percentage of Manufacturing revenues increased 790 basis points and 520 basis points in the second quarter and first half of 2021, respectively, primarily due to higher margins in the Textron Aviation and Industrial segments.

Selling and administrative expense increased \$75 million, 31%, and \$110 million, 22% in the second quarter and first half of 2021 respectively, compared with corresponding periods of 2020, primarily reflecting higher selling and administrative expense at the Industrial and Textron Aviation segments and higher share-based compensation expense.

Special Charges

In the second quarter and first half of 2021, we recorded special charges of \$4 million and \$10 million, respectively, compared with \$78 million and \$117 million in the second quarter and first half of 2020, respectively. These charges included restructuring activities and impairment charges as described in Note 12 to the Consolidated Financial Statements.

Income Taxes

Our effective tax rate for the second quarter and first half of 2021 was 15.6% and 13.0%, respectively. In the second quarter and first half of 2021, the effective tax rate was lower than the U.S. federal statutory rate of 21%, largely due to the favorable impact of research and development credits. In the first half of 2021, the effective tax rate also included a \$12 million benefit recognized for additional research and development credits related to prior years.

[Table of Contents](#)

Our effective tax rate for the second quarter and first half of 2020 was (22.0)% and (14.3)%, respectively, compared with the statutory rate of (21)%. In the second quarter and first half of 2020, we incurred special charges and an inventory charge in a non-U.S. jurisdiction where tax benefits cannot be realized, which were partially offset by a \$14 million benefit recognized upon the release of a valuation allowance in a non-U.S. jurisdiction. In the first half of 2020, these items had a more significant impact on the effective tax rate due to the lower loss from continuing operations before income taxes compared to the second quarter of 2020.

Backlog

Our backlog is summarized below:

<i>(In millions)</i>		July 3, 2021	January 2, 2021
Bell	\$	4,775	\$ 5,342
Textron Aviation		2,744	1,603
Textron Systems		2,296	2,556
Total backlog	\$	9,815	\$ 9,501

Backlog at Textron Aviation increased \$1.1 billion, 71%, reflecting orders in excess of deliveries.

Segment Analysis

We operate in, and report financial information for, the following five business segments: Textron Aviation, Bell, Textron Systems, Industrial and Finance. Segment profit is an important measure used for evaluating performance and for decision-making purposes. Segment profit for the manufacturing segments excludes interest expense, certain corporate expenses, gains/losses on major business dispositions and special charges. The measurement for the Finance segment includes interest income and expense along with intercompany interest income and expense. Operating expenses for the Manufacturing segments include cost of sales, selling and administrative expense and other non-service components of net periodic benefit cost/(credit), and exclude certain corporate expenses and special charges.

In our discussion of comparative results for the Manufacturing group, changes in revenues and segment profit for our commercial businesses typically are expressed in terms of volume and mix, pricing, foreign exchange, acquisitions and dispositions, inflation and performance. For revenues, volume and mix represents changes in revenues from increases or decreases in the number of units delivered or services provided and the composition of products and/or services sold. For segment profit, volume and mix represents a change due to the number of units delivered or services provided and the composition of products and/or services sold at different profit margins. Pricing represents changes in unit pricing. Foreign exchange is the change resulting from translating foreign-denominated amounts into U.S. dollars at exchange rates that are different from the prior period. Revenues generated by acquired businesses are reflected in Acquisitions for a twelve-month period, while reductions in revenues and segment profit from the sale of businesses are reflected as Dispositions. Inflation represents higher material, wages, benefits, pension service cost or other costs. Performance reflects an increase or decrease in research and development, depreciation, selling and administrative costs, warranty, product liability, quality/scrap, labor efficiency, overhead, non-service pension cost/(credit), product line profitability, start-up, ramp up and cost-reduction initiatives or other manufacturing inputs.

Approximately 30% of our 2020 revenues were derived from contracts with the U.S. Government, including those under the U.S. Government-sponsored foreign military sales program. For our segments that contract with the U.S. Government, changes in revenues related to these contracts are expressed in terms of volume. Changes in segment profit for these contracts are typically expressed in terms of volume and mix and performance; these include cumulative catch-up adjustments associated with a) revisions to the transaction price that may reflect contract modifications or changes in assumptions related to award fees and other variable consideration or b) changes in the total estimated costs at completion due to improved or deteriorated operating performance.

Textron Aviation

	Three Months Ended			Six Months Ended		
<i>(Dollars in millions)</i>	July 3, 2021	July 4, 2020	% Change	July 3, 2021	July 4, 2020	% Change
Revenues:						
Aircraft	\$ 797	\$ 478	67%	\$ 1,332	\$ 993	34%
Aftermarket parts and services	364	269	35%	694	626	11%
Total revenues	1,161	747	55%	2,026	1,619	25%
Operating expenses	1,065	813	31%	1,883	1,682	12%
Segment profit (loss)	96	(66)	245%	143	(63)	327%
Profit margin	8.3%	(8.8)%		7.1%	(3.9)%	

Textron Aviation Revenues and Operating Expenses

The following factors contributed to the change in Textron Aviation's revenues for the periods:

		Q2 2021 versus Q2 2020	YTD 2021 versus YTD 2020
<i>(In millions)</i>			
Volume and mix	\$	397	\$ 384
Pricing		17	23
Total change	\$	414	\$ 407

Textron Aviation's revenues increased \$414 million, 55%, in the second quarter of 2021, compared with the second quarter of 2020, largely due to higher Citation jet volume of \$174 million, higher aftermarket volume of \$98 million and higher commercial turboprop volume of \$75 million. We delivered 44 Citation jets and 33 commercial turboprops in the second quarter of 2021, compared with 23 Citation jets and 15 commercial turboprops in the second quarter of 2020.

Textron Aviation's revenues increased \$407 million, 25%, in the first half of 2021, compared with the first half of 2020, largely due to higher Citation jet volume of \$178 million, higher aftermarket volume of \$74 million and higher commercial turboprop volume of \$63 million. We delivered 72 Citation jets and 47 commercial turboprops in the first half of 2021, compared with 46 Citation jets and 31 commercial turboprops in the first half of 2020.

Textron Aviation's operating expenses increased \$252 million, 31%, and \$201 million, 12%, in the second quarter and first half of 2021, respectively, compared with the corresponding periods of 2020, largely due to higher volume and mix described above. Operating expenses in the second quarter and first half of 2020 were also negatively impacted by idle facility costs of \$53 million and \$65 million, respectively, partially offset by cost reduction activities, including employee furloughs instituted during the first half of 2020.

Textron Aviation Segment Profit (Loss)

The following factors contributed to the change in Textron Aviation's segment profit (loss) for the periods:

		Q2 2021 versus Q2 2020	YTD 2021 versus YTD 2020
<i>(In millions)</i>			
Volume and mix	\$	117	\$ 133
Performance		34	59
Pricing, net of inflation		11	14
Total change	\$	162	\$ 206

Segment profit at Textron Aviation increased \$162 million in the second quarter of 2021, compared with the second quarter of 2020, due to higher volume and mix of \$117 million described above, a favorable impact from performance of \$34 million and favorable pricing, net of inflation of \$11 million. Performance included a \$53 million impact from idle facility costs recognized in the second quarter of 2020, partially offset by cost reduction activities described above.

Segment profit at Textron Aviation increased \$206 million in the first half of 2021, compared with the first half of 2020, primarily due to a higher volume and mix of \$133 million described above, and a favorable impact from performance of \$59 million and favorable pricing, net of inflation of \$14 million. Performance included a \$65 million impact from idle facility costs recognized in the first half of 2020, partially offset by cost reduction activities described above.

Bell

	Three Months Ended			Six Months Ended		
	July 3, 2021	July 4, 2020	% Change	July 3, 2021	July 4, 2020	% Change
<i>(Dollars in millions)</i>						
Revenues:						
Military aircraft and support programs	\$ 572	\$ 602	(5)%	\$ 1,149	\$ 1,222	(6)%
Commercial helicopters, parts and services	319	220	45%	588	423	39%
Total revenues	891	822	8%	1,737	1,645	6%
Operating expenses	781	704	11%	1,522	1,412	8%
Segment profit	110	118	(7)%	215	233	(8)%
Profit margin	12.3%	14.4%		12.4%	14.2%	

Bell's major U.S. Government programs at this time are the V-22 tiltrotor aircraft and the H-1 helicopter platforms, which are both in the production and support stage and represent a significant portion of Bell's revenues from the U.S. Government.

Bell Revenues and Operating Expenses

The following factors contributed to the change in Bell's revenues for the periods:

	Q2 2021 versus Q2 2020	YTD 2021 versus YTD 2020
<i>(In millions)</i>		
Volume and mix	\$ 61	\$ 80
Other	8	12
Total change	\$ 69	\$ 92

Bell's revenues increased \$69 million, 8%, in the second quarter of 2021, compared with the second quarter of 2020, reflecting higher commercial revenues of \$99 million, partially offset by lower military revenues. We delivered 47 commercial helicopters in the second quarter of 2021, compared with 27 commercial helicopters in the second quarter of 2020.

Bell's revenues increased \$92 million, 6%, in the first half of 2021, compared with the first half of 2020, reflecting higher commercial revenues of \$165 million, partially offset by lower military revenues. We delivered 64 commercial helicopters in the first half of 2021, compared with 42 commercial helicopters in the first half of 2020.

Bell's operating expenses increased \$77 million, 11%, and \$110 million, 8% in the second quarter and first half of 2021 respectively, compared with corresponding periods of 2020, primarily due to higher net volume and mix described above and higher research and development costs, largely related to the future vertical lift programs.

Bell Segment Profit

The following factors contributed to the change in Bell's segment profit for the periods:

	Q2 2021 versus Q2 2020	YTD 2021 versus YTD 2020
<i>(In millions)</i>		
Performance and other	\$ (13)	\$ (22)
Pricing, net of inflation	5	7
Volume and mix	—	(3)
Total change	\$ (8)	\$ (18)

Bell's segment profit decreased \$8 million, 7%, in the second quarter of 2021, compared with the second quarter 2020, reflecting an unfavorable impact of \$13 million from performance, which included higher research and development costs discussed above. The increase in revenues attributed to volume and mix above had no impact on segment profit due to the mix of military and commercial products sold.

Bell's segment profit decreased \$18 million, 8%, in the first half of 2021, compared with the first half 2020, largely reflecting an unfavorable impact of \$22 million from performance and other, which included higher research and development costs discussed above. The increase in revenues attributed to volume and mix above had an unfavorable impact on segment profit due to the mix of military and commercial products sold.

Textron Systems

	Three Months Ended			Six Months Ended		
	July 3, 2021	July 4, 2020	% Change	July 3, 2021	July 4, 2020	% Change
<i>(Dollars in millions)</i>						
Revenues	\$ 333	\$ 326	2%	\$ 661	\$ 654	1%
Operating expenses	285	289	(1)%	562	591	(5)%
Segment profit	48	37	30%	99	63	57%
Profit margin	14.4%	11.3%		15.0%	9.6%	

Textron Systems Revenues and Operating Expenses

The following factors contributed to the change in Textron Systems' revenues for the periods:

	Q2 2021 versus Q2 2020	YTD 2021 versus YTD 2020
<i>(In millions)</i>		
Volume	\$ 17	\$ 23
Other	(10)	(16)
Total change	\$ 7	\$ 7

Textron Systems revenues increased \$7 million, 2%, in the second quarter of 2021, compared with the second quarter of 2020. Higher volume in the Other product line was partially offset by lower volume of \$32 million in the Air Systems product line, formally referred to as the Unmanned Systems product line, which reflected the impact from the U.S. Army's withdrawal from Afghanistan on the product line's fee-for-service contracts. Other in the table above included the impact of a \$11 million reduction in revenues as a result of the cessation of manufacturing at the TRU Simulation + Training Canada Inc. (TRU Canada) facility which occurred in the second quarter of 2020 related to the impact of the pandemic on that business. In January 2021, we sold TRU Canada as discussed in Note 2 to the Consolidated Financial Statements.

Textron Systems revenues increased \$7 million, 1%, in the first half of 2021, compared with the first half of 2020, primarily due to higher volume in the Other product line, partially offset by lower volume of \$45 million in the Air Systems product line. Other in the table above included the impact of a \$18 million reduction in revenues as a result of the cessation of manufacturing at the TRU Canada facility discussed above.

Textron Systems' operating expenses decreased \$4 million, 1%, in the second quarter of 2021, compared with the second quarter of 2020. Textron Systems' operating expenses decreased \$29 million, 5%, in the first half of 2021, compared with the first half of 2020, primarily related to the cessation of manufacturing at TRU Canada, partially offset by higher net volume described above.

Textron Systems Segment Profit

The following factors contributed to the change in Textron Systems' segment profit for the periods:

	Q2 2021 versus Q2 2020	YTD 2021 versus YTD 2020
<i>(In millions)</i>		
Performance and other	\$ 9	\$ 36
Volume and mix	2	—
Total change	\$ 11	\$ 36

Textron Systems' segment profit increased \$11 million, 30%, in the second quarter of 2021, compared with the second quarter of 2020, primarily due to a favorable impact from performance and other of \$9 million.

Textron Systems' segment profit increased \$36 million, 57%, in the first half of 2021, compared with the first half of 2020, due to a favorable impact of \$36 million from performance and other. Performance and other included a \$13 million impact largely related to unfavorable performance at TRU Canada in the first quarter of 2020.

Industrial

	Three Months Ended			Six Months Ended		
	July 3, 2021	July 4, 2020	% Change	July 3, 2021	July 4, 2020	% Change
<i>(Dollars in millions)</i>						
Revenues:						
Fuel systems and functional components	\$ 440	\$ 271	62%	\$ 937	\$ 736	27%
Specialized vehicles	354	291	22%	682	566	20%
Total revenues	794	562	41%	1,619	1,302	24%
Operating expenses	762	573	33%	1,540	1,304	18%
Segment profit (loss)	32	(11)	391%	79	(2)	4050%
Profit margin	4.0%	(2.0)%		4.9%	(0.2)%	

Industrial Revenues and Operating Expenses

The following factors contributed to the change in Industrial's revenues for the periods:

	Q2 2021 versus Q2 2020	YTD 2021 versus YTD 2020
<i>(In millions)</i>		
Volume and mix	\$ 180	\$ 227
Pricing	28	48
Foreign exchange	24	42
Total change	\$ 232	\$ 317

Industrial segment revenues increased \$232 million, 41%, in the second quarter of 2021, compared with the second quarter of 2020, reflecting higher volume and mix of \$180 million, primarily in the Fuel Systems and Functional Components product line, a favorable impact of \$28 million from pricing, primarily in the Specialized Vehicles product line, and \$24 million from foreign exchange rate fluctuations, primarily related to the Euro.

Industrial segment revenues increased \$317 million, 24%, in the first half of 2021, compared with the first half of 2020, due to higher volume and mix of \$227 million, primarily in the Fuel Systems and Functional Components product line, a favorable impact of \$48 million from pricing, primarily in the Specialized Vehicles product line, and \$42 million from foreign exchange rate fluctuations, primarily related to the Euro.

Operating expenses for the Industrial segment increased \$189 million, 33%, and \$236 million, 18%, in the second quarter and first half of 2021, respectively, compared with the corresponding periods of 2020, primarily due to higher volume and mix described above, and an unfavorable impact from foreign exchange rate fluctuations. Idle facility costs totaled \$8 million and \$21 million in the second quarter and first half of 2020, respectively, reflecting unfavorable absorption of manufacturing costs attributable to abnormally low production levels resulting from the pandemic and temporary manufacturing facility closures.

Industrial Segment Profit (Loss)

The following factors contributed to the change in Industrial's segment profit (loss) for the periods:

	Q2 2021 versus Q2 2020	YTD 2021 versus YTD 2020
<i>(In millions)</i>		
Volume and mix	\$ 48	\$ 64
Pricing, net of inflation	10	21
Performance	(11)	—
Foreign exchange	(4)	(4)
Total change	\$ 43	\$ 81

Segment profit for the Industrial segment increased \$43 million in the second quarter of 2021, compared with the second quarter of 2020, primarily due to higher volume and mix described above, partially offset by an unfavorable impact from performance of \$11 million. Performance included the impact of manufacturing inefficiencies and higher logistical costs related to supplier constraints, primarily in the Specialized Vehicles product line.

Segment profit for the Industrial segment increased \$81 million in the first half of 2021, compared with the first half of 2020, primarily due to higher volume and mix described above and a favorable impact of \$21 million from pricing, net of inflation.

Finance

	Three Months Ended		Six Months Ended	
(In millions)	July 3, 2021	July 4, 2020	July 3, 2021	July 4, 2020
Revenues	\$ 12	\$ 15	\$ 27	\$ 29
Segment profit	3	4	9	7

Finance segment revenues decreased \$3 million and \$2 million in the second quarter and first half of 2021, respectively, compared with the corresponding periods of 2020, and segment profit decreased \$1 million and increased \$2 million, respectively. The following table reflects information about the Finance segment's credit performance related to finance receivables.

(Dollars in millions)	July 3, 2021	January 2, 2021
Finance receivables	\$ 682	\$ 779
Allowance for credit losses	30	35
Ratio of allowance for credit losses to finance receivables	4.40%	4.49%
Nonaccrual finance receivables	106	93
Ratio of nonaccrual finance receivables to finance receivables	15.54%	11.94%
60+ days contractual delinquency	17	29
60+ days contractual delinquency as a percentage of finance receivables	2.49%	3.72%

Since the first quarter of 2020, the Finance segment has worked with certain customers impacted by the pandemic to provide payment relief through loan modifications. The majority of loans modified have returned to paying principal and interest. We believe our allowance for credit losses adequately covers our exposure on these loans as our estimated collateral values largely exceed the outstanding loan amounts. Loan modifications and key portfolio quality indicators are discussed in Note 3 to the Consolidated Financial Statements.

Liquidity and Capital Resources

Our financings are conducted through two separate borrowing groups. The Manufacturing group consists of Textron consolidated with its majority-owned subsidiaries that operate in the Textron Aviation, Bell, Textron Systems and Industrial segments. The Finance group, which also is the Finance segment, consists of Textron Financial Corporation and its consolidated subsidiaries. We designed this framework to enhance our borrowing power by separating the Finance group. Our Manufacturing group operations include the development, production and delivery of tangible goods and services, while our Finance group provides financial services. Due to the fundamental differences between each borrowing group's activities, investors, rating agencies and analysts use different measures to evaluate each group's performance. To support those evaluations, we present balance sheet and cash flow information for each borrowing group within the Consolidated Financial Statements.

Key information that is utilized in assessing our liquidity is summarized below:

(Dollars in millions)	July 3, 2021	January 2, 2021
Manufacturing group		
Cash and equivalents	\$ 1,995	\$ 2,146
Debt	3,189	3,707
Shareholders' equity	6,101	5,845
Capital (debt plus shareholders' equity)	9,290	9,552
Net debt (net of cash and equivalents) to capital	16%	21%
Debt to capital	34%	39%
Finance group		
Cash and equivalents	\$ 193	\$ 108
Debt	644	662

We believe that our calculations of debt to capital and net debt to capital are useful measures as they provide a summary indication of the level of debt financing (i.e., leverage) that is in place to support our capital structure, as well as to provide an indication of the capacity to add further leverage. We believe that we will have sufficient cash to meet our future needs, based on our existing cash balances, the cash we expect to generate from our manufacturing operations and other available funding alternatives, as appropriate.

Credit Facilities and Other Sources of Capital

Textron has a senior unsecured revolving credit facility for an aggregate principal amount of \$1.0 billion, of which up to \$100 million is available for the issuance of letters of credit. We may elect to increase the aggregate amount of commitments under the facility to up to \$1.3 billion by designating an additional lender or by an existing lender agreeing to increase its commitment. The facility expires in October 2024, subject to up to two one-year extensions at our option with the consent of lenders representing a majority of the commitments under the facility. There were no amounts borrowed against the facility and there were \$9 million of outstanding letters of credit issued under the facility at both July 3, 2021 and January 2, 2021.

We also maintain an effective shelf registration statement filed with the Securities and Exchange Commission that allows us to issue an unlimited amount of public debt and other securities.

Manufacturing Group Cash Flows

Cash flows from continuing operations for the Manufacturing group as presented in our Consolidated Statements of Cash Flows are summarized below:

	Six Months Ended	
	July 3, 2021	July 4, 2020
<i>(In millions)</i>		
Operating activities	\$ 679	\$ (148)
Investing activities	(90)	(85)
Financing activities	(740)	1,238

In the first half of 2021, net cash inflow from operating activities was \$679 million, compared with a net cash outflow of \$148 million in the first half of 2020. The \$827 million year-over-year increase in net cash inflow was primarily due to higher earnings and working capital improvements. The working capital improvements included a favorable change of \$588 million from accounts payable and \$82 million from inventories, both primarily at the Textron Aviation segment, partially offset by a net cash outflow of \$195 million from changes in accounts receivable.

In the first half of 2021 and 2020, cash flows used in investing activities included capital expenditures of \$128 million and \$96 million, respectively. Investing activities in the first half of 2021 also included \$38 million of net proceeds from the disposition of TRU Canada.

Cash flows used by financing activities in the first half of 2021 included \$519 million of payments on long-term debt, which included a prepayment at par of \$250 million of 5.95% notes with a stated maturity of September 2021, and \$287 million of cash paid to repurchase an aggregate of 4.8 million shares of our common stock. In the first half of 2020, cash flows provided by financing activities included \$642 million of net proceeds from the issuance of long-term debt, \$498 million from borrowings under a 364-Day Term Loan facility, and \$377 million of proceeds from borrowings against corporate-owned life insurance policies, partially offset by \$194 million of payments on long-term debt and \$54 million of cash paid to repurchase an aggregate of 1.3 million shares of our outstanding common stock.

Finance Group Cash Flows

Cash flows for the Finance group as presented in our Consolidated Statements of Cash Flows are summarized below:

	Six Months Ended	
	July 3, 2021	July 4, 2020
<i>(In millions)</i>		
Operating activities	\$ 5	\$ 10
Investing activities	114	7
Financing activities	(34)	(23)

The Finance group's cash flows from investing activities included collections on finance receivables totaling \$137 million and \$65 million in the first half of 2021 and 2020, respectively, partially offset by finance receivable originations of \$29 million and \$59 million, respectively. In the first half of 2021 and 2020, financing activities included payments on long-term and nonrecourse debt of \$34 million and \$35 million, respectively.

Consolidated Cash Flows

The consolidated cash flows, after elimination of activity between the borrowing groups, are summarized below:

<i>(In millions)</i>	Six Months Ended	
	July 3, 2021	July 4, 2020
Operating activities	\$ 773	\$ (152)
Investing activities	(65)	(64)
Financing activities	(774)	1,215

In the first half of 2021, net cash inflow from operating activities was \$773 million, compared with a net cash outflow of \$152 million in the first half of 2020. The \$925 million year-over-year increase in net cash inflow was primarily due to higher earnings and working capital improvements. The working capital improvements included a favorable change of \$588 million from accounts payable and \$82 million from inventories, both primarily at the Textron Aviation segment, partially offset by a net cash change of \$92 million from accounts receivable and captive finance receivables.

In the first half of 2021 and 2020, cash flows used in investing activities primarily included capital expenditures of \$128 million and \$96 million, respectively. Investing activities in the first half of 2021 also included \$38 million of net proceeds from the disposition of TRU Canada.

Cash flows used by financing activities in the first half of 2021 included \$553 million of payments on long-term debt and \$287 million of cash paid to repurchase shares of our outstanding common stock. In the first half of 2020, cash flows provided by financing activities included \$642 million of net proceeds from the issuance of long-term debt, \$498 million from borrowings under a 364-Day Term Loan facility and \$377 million of proceeds from borrowings against corporate-owned life insurance policies, partially offset by \$229 million of payments on long-term debt and \$54 million of cash paid to repurchase shares of our outstanding common stock.

Captive Financing and Other Intercompany Transactions

The Finance group provides financing primarily to purchasers of new and pre-owned Textron Aviation aircraft and Bell helicopters manufactured by our Manufacturing group, otherwise known as captive financing. In the Consolidated Statements of Cash Flows, cash received from customers is reflected as operating activities when received from third parties. However, in the cash flow information provided for the separate borrowing groups, cash flows related to captive financing activities are reflected based on the operations of each group. For example, when product is sold by our Manufacturing group to a customer and is financed by the Finance group, the origination of the finance receivable is recorded within investing activities as a cash outflow in the Finance group's statement of cash flows. Meanwhile, in the Manufacturing group's statement of cash flows, the cash received from the Finance group on the customer's behalf is recorded within operating cash flows as a cash inflow. Although cash is transferred between the two borrowing groups, there is no cash transaction reported in the consolidated cash flows at the time of the original financing. These captive financing activities, along with all significant intercompany transactions, are reclassified or eliminated from the Consolidated Statements of Cash Flows.

Reclassification adjustments included in the Consolidated Statements of Cash Flows are summarized below:

<i>(In millions)</i>	Six Months Ended	
	July 3, 2021	July 4, 2020
Reclassification adjustments from investing activities to operating activities:		
Cash received from customers	\$ 118	\$ 45
Finance receivable originations for Manufacturing group inventory sales	(29)	(59)
Total reclassification adjustments from investing activities to operating activities	\$ 89	\$ (14)

Critical Accounting Estimates Update

Our Consolidated Financial Statements are prepared in conformity with U.S. generally accepted accounting principles, which require us to make estimates and assumptions that affect the amounts reported in the financial statements. The accounting estimates that we believe are most critical to the portrayal of our financial condition and results of operations are reported in Item 7 of our Annual Report on Form 10-K for the year ended January 2, 2021. The following section provides an update of the year-end disclosure.

Revenue Recognition

A substantial portion of our revenues is related to long-term contracts with the U.S. Government, including those under the U.S. Government-sponsored foreign military sales program, for the design, development, manufacture or modification of aerospace and defense products as well as related services. We generally use the cost-to-cost method to measure progress for our contracts because it best depicts the transfer of control to the customer that occurs as we incur costs on our contracts. Under this measure, the extent of progress towards completion is measured based on the ratio of costs incurred to date to the estimated costs at completion of the performance obligation, and revenue is recorded proportionally as costs are incurred.

Changes in our estimate of the total expected cost or in the transaction price for a contract typically impact our profit booking rate. We utilize the cumulative catch-up method of accounting to recognize the impact of these changes on our profit booking rate for a contract. Under this method, the inception-to-date impact of a profit adjustment on a contract is recognized in the period the adjustment is identified. The impact of our cumulative catch-up adjustments on segment profit recognized in prior periods is presented below:

	Three Months Ended		Six Months Ended	
	July 3, 2021	July 4, 2020	July 3, 2021	July 4, 2020
<i>(In millions)</i>				
Gross favorable	\$ 40	\$ 46	\$ 76	\$ 73
Gross unfavorable	(25)	(29)	(47)	(54)
Net adjustments	\$ 15	\$ 17	\$ 29	\$ 19

Forward-Looking Information

Certain statements in this Quarterly Report on Form 10-Q and other oral and written statements made by us from time to time are “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements, which may describe strategies, goals, outlook or other non-historical matters, or project revenues, income, returns or other financial measures, often include words such as “believe,” “expect,” “anticipate,” “intend,” “plan,” “estimate,” “guidance,” “project,” “target,” “potential,” “will,” “should,” “could,” “likely” or “may” and similar expressions intended to identify forward-looking statements. These statements are only predictions and involve known and unknown risks, uncertainties, and other factors that may cause our actual results to differ materially from those expressed or implied by such forward-looking statements. Given these uncertainties, you should not place undue reliance on these forward-looking statements. Forward-looking statements speak only as of the date on which they are made, and we undertake no obligation to update or revise any forward-looking statements. In addition to those factors described in our 2020 Annual Report on Form 10-K under “Risk Factors,” among the factors that could cause actual results to differ materially from past and projected future results are the following:

- Interruptions in the U.S. Government’s ability to fund its activities and/or pay its obligations;
- Changing priorities or reductions in the U.S. Government defense budget, including those related to military operations in foreign countries;
- Our ability to perform as anticipated and to control costs under contracts with the U.S. Government;
- The U.S. Government’s ability to unilaterally modify or terminate its contracts with us for the U.S. Government’s convenience or for our failure to perform, to change applicable procurement and accounting policies, or, under certain circumstances, to withhold payment or suspend or debar us as a contractor eligible to receive future contract awards;
- Changes in foreign military funding priorities or budget constraints and determinations, or changes in government regulations or policies on the export and import of military and commercial products;
- Volatility in the global economy or changes in worldwide political conditions that adversely impact demand for our products;
- Volatility in interest rates or foreign exchange rates;
- Risks related to our international business, including establishing and maintaining facilities in locations around the world and relying on joint venture partners, subcontractors, suppliers, representatives, consultants and other business partners in connection with international business, including in emerging market countries;
- Our Finance segment’s ability to maintain portfolio credit quality or to realize full value of receivables;
- Performance issues with key suppliers or subcontractors;
- Legislative or regulatory actions, both domestic and foreign, impacting our operations or demand for our products;
- Our ability to control costs and successfully implement various cost-reduction activities;
- The efficacy of research and development investments to develop new products or unanticipated expenses in connection with the launching of significant new products or programs;
- The timing of our new product launches or certifications of our new aircraft products;
- Our ability to keep pace with our competitors in the introduction of new products and upgrades with features and technologies desired by our customers;
- Pension plan assumptions and future contributions;
- Demand softness or volatility in the markets in which we do business;

- Cybersecurity threats, including the potential misappropriation of assets or sensitive information, corruption of data or operational disruption;
- Difficulty or unanticipated expenses in connection with integrating acquired businesses;
- The risk that acquisitions do not perform as planned, including, for example, the risk that acquired businesses will not achieve revenues and profit projections;
- The impact of changes in tax legislation; and
- Risks and uncertainties related to the impact of the COVID-19 pandemic on our business and operations.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

There has been no significant change in our exposure to market risk during the fiscal quarter ended July 3, 2021. For discussion of our exposure to market risk, refer to Item 7A. Quantitative and Qualitative Disclosures about Market Risk contained in Textron's 2020 Annual Report on Form 10-K.

Item 4. Controls and Procedures

We performed an evaluation of the effectiveness of our disclosure controls and procedures as of July 3, 2021. The evaluation was performed with the participation of senior management of each business segment and key Corporate functions, under the supervision of our Chairman, President and Chief Executive Officer (CEO) and our Executive Vice President and Chief Financial Officer (CFO). Based on this evaluation, the CEO and CFO concluded that our disclosure controls and procedures were operating and effective as of July 3, 2021.

There were no changes in our internal control over financial reporting during the fiscal quarter ended July 3, 2021 that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

As previously reported in Textron's Annual Report on Form 10-K for the fiscal year ended January 4, 2020, on August 22, 2019, a purported shareholder class action lawsuit was filed in the United States District Court in the Southern District of New York against Textron, its Chairman and Chief Executive Officer and its Chief Financial Officer. The suit, filed by Building Trades Pension Fund of Western Pennsylvania, alleges that the defendants violated the federal securities laws by making materially false and misleading statements and concealing material adverse facts related to the Arctic Cat acquisition and integration. The complaint seeks unspecified compensatory damages. On November 12, 2019, the Court appointed IWA Forest Industry Pension Fund (IWA) as the sole lead plaintiff in the case. On December 24, 2019, IWA filed an Amended Complaint in the now entitled *In re Textron Inc. Securities Litigation*. On February 14, 2020, IWA filed a Second Amended Complaint, and on March 6, 2020, Textron filed a motion to dismiss the Second Amended Complaint. On July 20, 2020, the Court granted Textron's motion to dismiss and closed the case. On August 18, 2020, plaintiffs filed a notice of appeal contesting the dismissal, which Textron has opposed. Oral argument before the Second Circuit Court of Appeals occurred on June 1, 2021, and the appeal remains pending as the parties await the appellate court's decision.

As previously reported in Textron's Annual Report on Form 10-K for the fiscal year ended December 31, 2016, on February 7, 2012, a lawsuit was filed in the United States Bankruptcy Court, Northern District of Ohio, Eastern Division (Akron) by Brian A. Bash, Chapter 7 Trustee for Fair Finance Company against Textron Financial Corporation (TFC), Fortress Credit Corp. and Fair Facility I, LLC. TFC provided a revolving line of credit of up to \$17.5 million to Fair Finance Company from 2002 through 2007. The complaint alleges numerous counts against TFC, as Fair Finance Company's working capital lender, including receipt of fraudulent transfers and assisting in fraud perpetrated on Fair Finance investors. The Trustee seeks avoidance and recovery of alleged fraudulent transfers in the amount of \$316 million as well as damages of \$223 million on the other claims. On November 9, 2012, the Court dismissed all claims against TFC. The trustee appealed, and on August 23, 2016, the 6th Circuit Court of Appeals reversed the dismissal in part and remanded certain claims back to the trial court. On September 27, 2018, after reconsidering the remanded claims which were based upon civil conspiracy and intentional fraudulent transfer, the trial court granted partial summary judgment in favor of TFC, dismissing the Trustee's civil conspiracy claim, as well as a portion of the Trustee's claim for intentional fraudulent transfer, leaving only a portion of the intentional fraudulent transfer claim to be adjudicated. A trial for this matter was held in February 2020, and on March 10, 2020, the jury returned a verdict in favor of TFC and against the Trustee. On the same day, the Court entered judgment in TFC's favor. On March 23, 2020, the Trustee filed a notice of appeal, which Textron has opposed. Oral argument before the Sixth Circuit Court of Appeals occurred on June 10, 2021, and the appeal remains pending as the parties await the appellate court's decision.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The following provides information about our second quarter 2021 repurchases of equity securities that are registered pursuant to Section 12 of the Securities Exchange Act of 1934, as amended:

Period (shares in thousands)	Total Number of Shares Purchased *	Average Price Paid per Share (excluding commissions)	Total Number of Shares Purchased as part of Publicly Announced Plan *	Maximum Number of Shares that may yet be Purchased under the Plan
April 4, 2021 – May 8, 2021	645	\$ 60.74	645	18,855
May 9, 2021 – June 5, 2021	1,250	67.00	1,250	17,605
June 6, 2021 – July 3, 2021	1,085	66.99	1,085	16,520
Total	2,980	\$ 65.64	2,980	

* These shares were purchased pursuant to a plan authorizing the repurchase of up to 25 million shares of Textron common stock that was announced on February 25, 2020, which had no expiration date.

Item 6. Exhibits
