NEWS RELEASE

# NETSCOUT and Arbor Networks to Demonstrate Service Assurance and Cybersecurity Visibility for Electronic Medical Records, Health Level-7 and Imaging Services Performance Issues in Healthcare Environments at HIMSS 2017

2017-02-15

WESTFORD, Mass.--(BUSINESS WIRE)--Feb. 15, 2017-- **NETSCOUT SYSTEMS, INC.**, (NASDAQ: NTCT), a leading provider of business assurance, a powerful combination of service assurance, cybersecurity, and business intelligence solutions, today announced it will demonstrate how NETSCOUT and **Arbor Networks, the security division of NETSCOUT**, technology and solutions can help healthcare IT organizations achieve their digital transformation goals with projects impacting electronic medical records (EMR), imaging, and e-prescription services, at HIMSS 17, in Orlando, Florida.

NETSCOUT provides solutions that deliver unmatched visibility and support for preventing and triaging issues that affect performance and security of such healthcare services as patient records, imaging and diagnostic systems, communications interoperability, pharmacy and accounting services. Delays that impact access to admissions, diagnostics or treatment may negatively sway the patient's experience.

NETSCOUT's service assurance and cybersecurity solutions for healthcare IT organizations are undertaking advancements in cloud-based services, mobility, and unified communications services to improve the overall efficiency and speed of patient care. Healthcare organizations can launch new digital transformative services and devices, e.g. cloud-based EMR, with confidence, using superior data and analytics from NETSCOUT for all services throughout the enterprise ecosystem. Come see how NETSCOUT solutions are holistically and intelligently protecting, monitoring and optimizing healthcare systems including:

- EMR / Electronic Health Records (EHR) / Medical Records
- Digital Imaging and Communications in Medicine (DICOM) Imaging
- E-prescriptions
- Voice over Internet Protocol (VoIP) & Telemedicine
- Web-based Patient Services
- Health Level-7 (HL7) Interoperability

NETSCOUT will show how healthcare IT professionals can safeguard performance of their wired and wireless environments with service assurance and cybersecurity solutions for an enhanced patient experience. Learn how other healthcare organizations are reducing time to pinpoint issues and troubleshoot service performance rapidly while improving analysis of EMR and HL7 interoperability services in healthcare services and environments. With NETSCOUT service assurance and cybersecurity solutions, healthcare organizations will be able to introduce new digital transformation projects and reduce mean time to knowledge (MTTK) of service and security problems while maximizing the value of patient-care impacting applications.

## WHERE:

NETSCOUT, Booth #636
Citrix Ready Pavilion, Booth #2914
Orange County Convention Center, Orlando, Florida

## WHEN:

February 19 - 23, 2017
