NEWS RELEASE

NETSCOUT to Demonstrate Real-time Performance Visibility and Rapid Insight into EMR and Imaging Services Performance Issues in Healthcare Environments at HIMSS 2016

2016-02-23

WESTFORD, Mass.--(BUSINESS WIRE)--Feb. 23, 2016-- **NETSCOUT Systems, Inc.** (NASDAQ: NTCT), a market leader in service assurance and cybersecurity solutions today announced that it will demonstrate how the NETSCOUT nGeniusONE® Service Assurance platform and Adaptive Service Intelligence™ (ASI) technology help healthcare IT organizations understand when problems occur with such services as EMR, imaging, and e-prescription services, what the root cause of the issue is and how to quickly fix the problem, at HIMSS '16, in Las Vegas, Nevada.

Next-generation healthcare IT initiatives and advancements in EMRs, imaging, cloud, mobility, BYOD, unified communications and collaboration services will improve the overall efficiency and speed of patient care. However, these changes can also cause disruptions or make them more difficult to remedy. These disruptions, in turn, could delay patient care approvals, diagnostic test results, medical image analysis, or e-prescription services, and negatively impact quality patient care. See how NETSCOUT's nGeniusONE Service Assurance platform with ASI patented technology alleviates these challenges and accelerates IT transformation in the healthcare sector:

- Extending and complementing application-specific performance tools, it provides broad and detailed real-time awareness of the services delivered along with their dependencies and interaction in the context of the increasingly virtualized infrastructure.
- Offers rich insights into healthcare voice and data services like EMR, e-prescription, imaging, Citrix services and telemedicine
- Accelerates problem resolution of service impairments impacting the performance of patient care services

NETSCOUT will show how healthcare IT professionals can manage performance issues in healthcare services and environments. With NETSCOUT service assurance solutions, healthcare organizations will reduce Mean Time to Knowledge (MTTK) of service problems and maximize the value of patient-care impacting application services.

WHERE:

NETSCOUT**,** Booth #10622
Sands Expo Convention Center, Las Vegas, Nevada

WHEN:

February 29 - March 4, 2016

WHAT:

NETSCOUT Service Assurance solutions

NETSCOUT experts will be available to demonstrate how traffic data is used to gain a holistic view of the overall healthcare service delivery infrastructure. Attendees will learn how to keep healthcare services including EMR, imaging, and e-prescription services running, and running well – all the time in our connected world.

About HIMSS ‘16

The **2016 HIMSS Annual Conference & Exhibition**, February 29 - March 4, 2016 in Las Vegas, brings together 40,000+ health IT professionals, clinicians, executives and vendors from around the world. Exceptional education, world-class speakers, cutting-edge health IT products and powerful networking are hallmarks of this industry-leading conference. More than 300 education programs feature keynotes, thought leader sessions, roundtable discussions and e-sessions, plus preconference symposia and workshops.
