Reconciliation of Non-GAAP Items Required by SEC Rules

A reconciliation of non-GAAP items disclosed for the respective periods to their most directly comparable GAAP measures.

2017 ACTUAL RESULTS

CVS Health is providing non-GAAP information that excludes certain items because of the nature of these items and the impact they have on the analysis of underlying business performance and trends. Management believes that providing this information enhances investors' understanding of the company's performance. This information should be considered in addition to, rather than as a substitute for, information prepared in accordance with GAAP. CVS Health's definitions of these non-GAAP items may not be comparable to similarly-titled measurements reported by other companies.

ADJUSTED EARNINGS PER SHARE

Adjusted Earnings per Share, or Adjusted EPS, is income from continuing operations excluding the impact of certain adjustments such as the amortization of intangible assets, acquisition-related transaction and integration costs, charges in connection with store rationalization, goodwill impairments, adjustments to legal reserves in connection with certain legal settlements, losses on early extinguishment of debt and losses on settlements of defined benefit pension plans, divided by the company's weighted average diluted shares outstanding. The company believes that this measure enhances investors' ability to compare the company's past financial performance with its current performance. The following is a reconciliation of income before income tax provision to Adjusted EPS:

FREE CASH FLOW

For internal comparisons, management finds it useful to assess year-over-year cash flow performance using Free Cash Flow. CVS Health defines Free Cash Flow as net cash provided by operating activities less net additions to property and equipment (i.e., additions to property and equipment plus proceeds from sale-leaseback transactions). The following is a reconciliation of net cash provided by operating activities to Free Cash Flow:

In millions	Three Months Ended June 30,		Six Months Ended June 30,	
	2017	2016 [1]	**2017**	2016 [1]

EBITDA and ADJUSTED EBITDA

For internal comparisons, management finds it useful to assess year-over-year operating profitability performance before non-operating expenses and non-cash charges, using EBITDA. CVS Health defines EBITDA as income before income tax provision, loss on early extinguishment of debt, interest, depreciation and amortization. EBITDA can be reconciled to income from continuing operations, which we believe to be the most directly comparable GAAP financial measure. The following are reconciliations of income from continuing operations to EBITDA and Adjusted EBITDA:

FREE CASH FLOW

For internal comparisons, management finds it useful to assess year-over-year cash flow performance using Free Cash Flow. CVS Health defines Free Cash Flow as net cash provided by operating activities less net additions to property and equipment (i.e., additions to property and equipment plus proceeds from sale-leaseback transactions). The following is a reconciliation of net cash provided by operating activities to Free Cash Flow:

	Year Ended December 31,		
	2017E		2016 [1]
In millions	**Low**	**High**	Actual
