

NEWS RELEASE

Bullish exchange data now available through Coin Metrics' Market Data Feed

2023-06-20

BOSTON (June 20, 2023) – Coin Metrics, the leading provider of crypto financial intelligence, is pleased to announce that it has added data from Bullish exchange to its Market Data Feed.

Bullish trades, order books, quotes, and candles are now available through the Coin Metrics REST API and WebSocket, with additional metrics to be onboarded in the coming weeks.

“Given its increasing role in institutional digital asset trading, especially in the Asia-Pacific region, Bullish is an important exchange for Coin Metrics to add to our Market Data Feed,” said Tim Rice, co-founding CEO of Coin Metrics. “With Bullish exchange data now onboarded, institutional investors will continue to be able to make reliable assessments of overall market performance through Coin Metrics.”

Since launching in November 2021, Bullish exchange has quickly become a top-tier institutional digital assets exchange known for leveraging its proprietary automated market making (AMM) technology to offer a unique source of unfragmented liquidity, within the compliant and regulated framework of a centralized exchange.

Bullish is the 41st exchange feed added to Coin Metrics' data coverage on behalf of the company's clients. According to Coin Metrics' Market Data Feed, Bullish now represents the 4th highest exchange by spot volume for Bitcoin and the 5th highest for Ethereum in recent weeks.

“The inclusion of Bullish exchange data on the Coin Metrics platform marks a significant milestone for our exchange, highlighting Bullish's transparency and underscoring our position as a leading, regulated institutional exchange,” said Tom Farley, CEO of Bullish. “This integration enables Bullish to effectively showcase its competitive advantages of market-leading order book depth and tight spreads to the broad network of institutional players

within Coin Metrics' ecosystem."

Coin Metrics' Market Data Feed provides access to historical and real-time data from over 30 of the world's leading spot and derivatives crypto exchanges. The company offers all of the fundamental market-related data types including tick-by-tick trades, quotes, order book snapshots, candles, and more.

With the most extensive crypto data coverage in the industry, Coin Metrics offers a comprehensive suite of services – including on-chain data, a universal block explorer, market data and metrics, indexes and network risk management – to the most prestigious institutions touching cryptoassets. The company was recently included on the '**FORTUNE Crypto 40**' list of the most influential companies in the industry and was recognized as the Most Innovative Solution Provider at Hedgeweek's 2022 European Digital Asset Awards.
