

NEWS RELEASE

# Haruko integrates with Bullish to enhance risk and portfolio management for digital assets

2023-12-04

LONDON AND CAYMAN ISLANDS – December 4, 2023 – **Haruko**, a leading provider of digital asset infrastructure solutions for institutions, announced today its integration with **Bullish**, the fastest-growing regulated institutional digital assets exchange, to enhance risk and portfolio management for institutions trading digital assets.

Through this integration, mutual clients of Bullish and Haruko gain real-time, direct access to their Bullish trade activity and portfolio exposure, through Haruko's institutional-grade risk management platform. This seamless connectivity enables more institutions to receive an aggregated risk view of their digital asset portfolios across Bullish and other exchanges, while leveraging Haruko's comprehensive infrastructure for current and historical pricing, risk, and P&L reporting.

"We are excited to partner with Bullish and integrate their robust exchange capabilities into our portfolio and risk management solutions. This partnership enables our clients to seamlessly monitor and incorporate their Bullish exchange exposures, enhancing our offering in the institutional space," said Shamyil Malik, CEO and Co-Founder of Haruko.

"Our integration with Haruko supports our mutual clients to more efficiently manage their risk by providing visibility of their trading strategies deployed across Bullish and the wider digital asset ecosystem within a centralized location," said Michael Lau, SVP, Global Head of Sales at Bullish. "This partnership marks a milestone in the evolution of institutional-grade services in the digital asset sector as it offers a comprehensive package of Haruko's robust risk and portfolio management tools with Bullish's reliable and transparent depth in the largest crypto trading pairs."

Since its launch in November 2021, Bullish has executed over \$300 billion in total trading volume and consistently

ranks among the top three global exchanges by spot trading volume for Bitcoin and Ether. In October 2023, Bullish announced that it plans to launch perpetual futures trading on its regulated and compliant exchange in addition to its spot and margin offering.

The integration is live and available to current Haruko and Bullish customers. To learn more, email [hello@haruko.io](mailto:hello@haruko.io) and [sales@bullish.com](mailto:sales@bullish.com).

About Bullish:

With a focus on developing products and services for the institutional digital assets sector, Bullish has rewired the traditional exchange to benefit asset holders, enable traders and increase market transparency. Supported by the group's well-capitalized treasury, Bullish's centralized exchange combines a high-performance central limit order book (CLOB) with proprietary automated market making technology to deliver deep liquidity and tight spreads – all within a compliant and regulated framework.

Launched in November 2021, the exchange is available in 50+ select jurisdictions in Asia Pacific, Europe, Africa, and Latin America. Bullish exchange is operated by Bullish (GI) Limited and is regulated by the Gibraltar Financial Services Commission (GFSC) (DLT license: FSC1038FSA). For more information on the Bullish exchange, please visit [bullish.com](https://bullish.com) and follow [LinkedIn](#) and [X](#).

About Haruko:

Haruko provides the most comprehensive digital asset infrastructure solution for institutions deploying capital across the digital asset ecosystem. Seamless consolidation of positions across exchanges, on-chain and OTC activity with access to real-time and historical pricing, risk and P&L reporting provides the transparency needed for effective treasury management, compliance, investor reporting and financial controllership functions.

Haruko has an experienced team of TradFi and digital industry veterans located across Europe and Asia supporting

more than 45 institutional clients globally using Haruko to optimize their front-, middle- and back-office workflows and operational controls.
