Kaiko integrates with Bullish to expand market data coverage

2024-01-30

PARIS AND CAYMAN ISLANDS - January 30, 2024 - **Kaiko**, a leading cryptocurrency market data provider, today announced its integration with **Bullish**, one of the fastest-growing, regulated digital assets exchanges, to enhance market data services with the inclusion of Bullish's exchange metrics to Kaiko's data feed.

This integration offers a broader range of trade and real-time order book data from the Bullish exchange, ultimately enabling improved market analysis for traders and institutions on the Kaiko platform. It also includes intraday historical and real-time data across various categories, namely:

- Tick Level Order Books (Stream/CSV)
- Snapshot Order Books (Rest API/CSV)
- Top of Book (Stream/CSV)
- Trades and Aggregates (Stream/Rest API/CSV)

"We are thrilled to collaborate with Bullish to further enhance the availability and accessibility of market data," said Ambre Soubrian, CEO of Kaiko. "This partnership underscores our commitment to providing reliable, granular, and real-time data solutions from over 100 exchanges, with over 20 data types to empower the full range of use cases."

The Bullish exchange executes on average \$1 billion of trades each day, and since its launch in November 2021, has surpassed more than \$375 billion in total trading volume. The integration of Bullish's data into Kaiko's platform marks a significant step forward in empowering market participants with comprehensive, accurate, and timely information, leading to increased efficiency and precision in trading strategies and market research.

"The inclusion of Bullish exchange data on the Kaiko platform highlights our position as a leading, trusted exchange

for serious traders and institutions,” said Tom Farley, CEO of Bullish. “Through this partnership, Bullish has the opportunity to further demonstrate its competitive edge through high performance, low fees and near-zero spreads to a wide range of investors connected throughout Kaiko's ecosystem.”

The historical data comprises a repository of Bullish’s data from the listing date up to the effective date. The real-time stream provides live tick-by-tick data for crypto pairs available on Bullish, from the effective date onwards. Distribution of both historical and real-time data is available through REST and Stream API, and CSV delivery.

The integration of Bullish’s data is live on Kaiko’s feed. To learn more about Kaiko’s products, click [here](#). Email sales@bullish.com for more from Bullish.

About Bullish

With a focus on developing products and services for the institutional digital assets sector, Bullish has rewired the traditional exchange to benefit asset holders, enable traders and increase market transparency. Supported by the group’s well-capitalized treasury, Bullish’s centralized exchange combines a high-performance central limit order book (CLOB) with proprietary automated market making technology to deliver deep liquidity and tight spreads – all within a compliant and regulated framework.

Launched in November 2021, the exchange is available in 50+ select jurisdictions in Asia Pacific, Europe, Africa, and Latin America. Bullish operates as a full-reserve exchange, and prioritizes compliance and **safeguarding customer assets** through robust security measures and regulatory oversight. Bullish exchange is operated by Bullish (GI) Limited and is regulated by the Gibraltar Financial Services Commission (GFSC) (DLT license: FSC1038FSA). For more information on the Bullish exchange, please visit **bullish.com** and follow **LinkedIn** and **X**.
