

Trever and Bullish announce integration to enhance institutional access to digital asset trading

2025-07-02

GRAZ & FRANKFURT - July 3, 2025 - **Trever**, a leading digital asset infrastructure provider today announced a partnership with **Bullish Europe**, the BaFin regulated provider of digital asset trading and custody services.

This partnership enables Trever's customers to access a greater variety of trading venues through its Order and Execution Management System (OEMS). The integration with Bullish provides financial institutions seamless access to another premier trading environment, enabling them to trade digital assets with some of the best liquidity, pricing, and execution efficiency available.

Key advantages for financial institutions utilizing Bullish through Trever's OEMS:

- Direct access to institutional-grade liquidity: Seamlessly tap into Bullish's deep liquidity and tight spreads for a wide range of digital assets, directly from Trever's system.
- Expanded trading opportunities without added complexity: Engage with Bullish's offerings without the need for new, separate integrations or disparate operational workflows. This access is managed through the integration with Trever.
- Continued operational efficiency and data integrity: All trading activity executed on Bullish flows automatically and directly into the institution's Trever bookkeeping, reconciliation, and reporting modules, maintaining a unified operational view and streamlined post-trade processes.

"This partnership with Bullish is the next milestone in our mission to provide financial institutions with the most comprehensive and efficient trading venues for their digital asset operations," said Hans-Jürgen Griesbacher, CEO of Trever. "Integrating Bullish's deep liquidity and regulated trading environment empowers our clients with enhanced execution capabilities, greater choice, and further streamlines their operational workflows, all accessible

through our holistic Digital Asset Operating System."

"We are delighted to partner with Trever and integrate Bullish into their comprehensive digital asset infrastructure as we look to expand our footprint in Europe," said Marco Bodewein, CEO of Bullish Europe. "Trever's robust OEMS, combined with Bullish's deep liquidity and low fees, offers a powerful solution for institutions seeking seamless access to digital asset markets."

The integration is live and available to current Bullish and Trever customers. To learn more, email sales@bullish.com and contact@trever.io.
