Company Overview and Forward-Looking Statements

TETRA Technologies, Inc. is an industrial and oil & gas services company operating on six continents focused on bromine-based completion fluids, calcium chloride, water management solutions, frac flowback and production well production testing services. Calcium chloride is used in the oil and gas, industrial, agricultural, road, food, and beverage markets. TETRA is evolving its business model by rapidly expanding into the low carbon energy markets with its chemistry expertise, key mineral reserves, and global infrastructure. Recently announced initiatives include commercialization of TETRA PureFlow™ an ultra-pure zinc bromide for stationary batteries and energy storage; advancing an innovative carbon capture utilization and storage technology with CarbonFree to capture CO₂ and mineralize emissions to make commercial, carbon-negative chemicals; and development of TETRA's lithium and bromine mineral reserves to meet the growing demand for oil and gas products and energy storage.
