- (1) Gross profit, calculated as Net sales less Cost of sales, is a non-GAAP financial measure as it excludes depreciation and amortization expense associated with the corresponding sales. The majority of our orders are basic distribution with no processing services performed. For the remainder of our sales orders, we perform "first-stage" processing, which is generally not labor intensive as we are simply cutting the metal to size. Because of this, the amount of related labor and overhead, including depreciation and amortization, is not significant and is excluded from our Cost of sales. Therefore, our Cost of sales is primarily comprised of the cost of the material we sell. The Company uses Gross profit as a measure of operating performance. Gross profit is an important operating and financial measure, as fluctuations in Gross profit can have a significant impact on our earnings. Gross profit, as presented, is not necessarily comparable with similarly titled measures for other companies.
- (2) Operating expenses include warehouse, delivery, selling, general and administrative expenses, depreciation expense and amortization expense.
- (3) All share information has been retrospectively adjusted to reflect the two-for-one stock split effected in the form of a 100% stock dividend that was effective July 19, 2006.
- (4) Includes the long-term portion of capital lease obligations.

REACHING OUR FUTURE

COMPANY PROFILE

Founded in 1939 and headquartered in Los Angeles, California, Reliance Steel & Aluminum Co. (NYSE:RS) is the largest metals service center company in North America. Through a network of more than 200 locations in 38 states and Belgium, Canada, China, Malaysia, Mexico, Singapore, South Korea and the United Kingdom, the Company provides value-added metals processing services and distributes a full line of over 100,000 metal products to more than 125,000 customers in a broad range of industries.

Results from Metal Center News' latest Top 50 Service Centers survey show that the industry's Top 10 remained largely unchanged, with Reliance Steel & Aluminum Co. in the top spot once again. We are excited about our position in the

industry and the opportunities ahead. We will continue to grow and expect to perform at the top of our industry.

TO OUR SHAREHOLDERS,

e were pleased with our 2010 results, especially as compared to the 2009 year - which we believe was the most difficult operating environment our Company and our industry has ever experienced. 2010 provided another good test of our business strategy and our ability to operate in a highly volatile market. It was not as difficult as 2009, but it was far from the ideal business environment. We were able to grow the Company both internally and through a couple of good acquisitions, but it was still a challenging year.

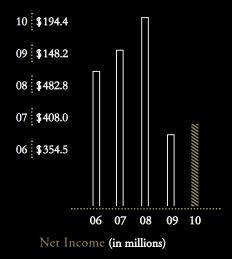

We entered 2010 with a solid balance sheet and we exited the year in an even stronger financial position. Our net debt-to-total-capital ratio was only 23.5% at December 31, 2010 and we had about \$860 million available on our \$1.1 billion credit facility. This provides ample funds for us to continue our growth initiatives through both acquisitions and internal activities. This financial strength and our confidence in our future operations also prompted us to increase our dividend for the 16th time since our 1994 IPO. For the 2010 year, net income was \$194.4 million, up 31% from net income of \$148.2

million for the 2009 year. Earnings per diluted share were \$2.61 for the 2010 year, up 30% from earnings per diluted share of \$2.01 for 2009.

Demand improved during 2010 in many of the industries where we sell our products and pricing levels for most of our products also increased over 2009 levels, resulting in sales of \$6.31 billion, up 19% from our 2009 sales of \$5.32 billion. Our tons sold, which reflects demand, were up only 6% compared to 2009. That's not much of an improvement, especially after being down 32% in 2009 from 2008. But, when you look more closely at the different parts of our business, there are some areas that improved significantly over last year, such as semiconductor and electronics; energy, oil and gas; farm and heavy equipment; and our toll processing activities that were driven by improvements in the auto and appliance markets. Aerospace was also good for us again last year. Gains in these areas were offset in part by continued weakness in the non-residential construction portion of our business, which happens to be the largest single market for our products.

"RELIANCE WAS
NAMED TO THE 2010
FORTUNE LIST OF
THE WORLD'S MOST
ADMIRED COMPANIES"

"EXITED 2010 IN AN EVEN STRONGER FINANCIAL POSITION THAN WE ENTERED" Overall, we are proud of our performance last year as we led the way in our industry. Our efforts during 2009 to pay down debt, reduce operating expenses, and position the Company to operate profitably at low business levels certainly paid off.

Our sales per day improved during the first two quarters of 2010, as did our FIFO gross profit margins. During this time we saw mill pricing for most of our products increase. During the third quarter, however, we saw pricing for carbon and stainless steel products decrease along with our FIFO gross profit margins. Volume though, was improving.

During the 2010 fourth quarter, we saw prices for stainless and aluminum products resume their upward trend through the end of the year. Carbon steel pricing was going the other direction until December when the mills announced a series of price increases. That helped us sell a little bit more at generally higher margins.

For the 2010 year, our gross profit margin was 25.1% compared to 26.3% in 2009, with a 2010 LIFO charge, or expense, of \$34.8 million

compared to a 2009 LIFO credit, or income, of \$305.0 million. The LIFO adjustments, in effect, reflect cost of sales at current replacement costs. Our FIFO gross profit margin was 25.7% in 2010 compared to 20.6% in 2009.

We continued to focus on managing our working capital and costs and efficiently running our operations. 2010 warehouse, delivery, selling, general and administrative expenses were 17.5% of sales, down from 19.4% of sales in 2009. We also improved our inventory turns to 4.8 times in dollars, or 5.0 times based on tons.

We completed the acquisitions of Diamond Consolidated Industries (now known as Diamond Manufacturing Company) on October 1, 2010 and Lampros Steel, Inc. on December 1, 2010. Diamond Manufacturing Company specializes in the manufacture and sale of specialty engineered perforated metals. Diamond is a high value-added, high margin business with its major end markets being agriculture, office equipment, electronics, appliance, auto and architectural. Diamond is headquartered near Philadelphia, Pennsylvania and has three additional locations, including one we just opened near Dallas, Texas.

Lampros is based in Portland, Oregon and operates as a subsidiary of our American Metals business. Lampros specializes in structural steel shapes and carbon steel plate. Lampros has an outstanding reputation for customer service and its products will complement those of American Metals Corporation in the Pacific Northwest.

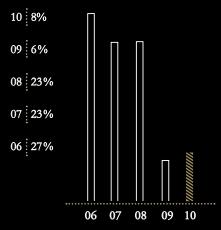

We have acquired 47 companies since our 1994 IPO. As business conditions for our industry continue to improve, we expect to see more acquisition opportunities as 2011 progresses. We will evaluate those opportunities in light of our highly selective criteria that includes strong management teams and a business reputation of quality and high levels of customer service. We also expect our acquisitions to be immediately accretive to earnings and cash flow positive.

Our capital expenditures last year were \$111 million. We opened new facilities in Malaysia; Orlando, Florida; and Philadelphia, Pennsylvania and are in the process of expanding several of our existing locations. Our Board of Directors recently approved approximately \$200 million for our capital expenditure budget for 2011 and we are excited about our future growth.

In addition to investments in physical assets, we also seek to invest in the retention and recruitment of the best employees in our industry. The safety of our employees is a top priority at all of our operations. During 2010 we were able to improve our safety performance over our 2009 level and we are focused on further improvement in 2011.

Our diversification of products, customer end markets and geographies has been an important factor in our consistent success. We believe this diversification sets us apart from others in our industry and reduces the volatility in any one market from significantly impacting our financial results.

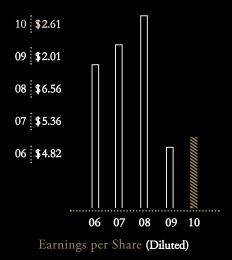

Our Board of Directors increased the regular quarterly cash dividend by 20% in the 2011 first quarter, to \$.12 per share from \$.10 per share. We have increased our dividend 16 times since our IPO in 1994 and have paid regular quarterly dividends for 51 consecutive years.

Return on Equity (% Return)

Based on beginning of the year equity amounts, except for 2006, which was adjusted for \$360.5 million of common stock and stock options issued to fund our April 3, 2006 acquisition.

"RELIANCE EXPECTS
TO CONTINUE TO
GROW AND PERFORM
AT THE TOP OF OUR
INDUSTRY"

Amounts have been retrospectively adjusted to reflect the July 2006 two-for-one stock split.

"IN FEBRUARY 2011, WE INCREASED OUR DIVIDEND FOR THE SIXTEENTH TIME SINCE OUR 1994 IPO" Effective October 1, 2010, John G. Figueroa joined our Board of Directors. Mr. Figueroa is Chief Executive Officer of Omnicare, Inc. (NYSE:OCR), a leading provider of pharmaceutical care for the elderly. Prior thereto, he also served as President of the U.S. Pharmaceutical Group at McKesson Corporation and in other senior management positions with McKesson Corporation since 1997.

Reliance was named to the 2010 "Fortune 500" List, the 2010 Fortune List of "The World's Most Admired Companies" for the fifth time, the 2009 Forbes "America's Best Managed Companies" List, and the 2009 Forbes "Platinum 400 List of America's Best Big Companies," our 12th year with that distinction.

Reliance has tremendous earnings capacity with our broad product base, wide geographic footprint, and a group of managers who know how to operate effectively, efficiently, and profitably. We will continue to grow and expect to perform at the top of our industry. We are excited about our position in the industry and the opportunities ahead. We thank our shareholders, employees, customers and suppliers for supporting Reliance Steel & Aluminum Co.

Sincerely,

David H. Hannah

- (1) The portion of American Steel's earnings attributable to our 49.5% partner is included in non-controlling interests through December 31, 2005. On January 3, 2006 we acquired our partner's interest, increasing our ownership to 100%.
- (2) Operating income represents net sales less cost of sales, warehouse, delivery, selling, general and administrative expenses, depreciation and amortization expense. Certain reclassifications were made to 2007 and prior years to include amortization in the calculation of Operating income.
- (3) The adoption of accounting rule changes in 2009 affected the presentation of non-controlling interests. Prior year pretax income and margin amounts have been retroactively adjusted to conform to the current presentation.
- (4) Amounts have been retrospectively adjusted to reflect the July 2006 2-for-1 stock split. Per share amounts based upon weighted average shares are on a diluted basis.
- **(5)** 2006 includes the issuance of approximately 9 million shares related to an acquisition.
- (6) Long-term debt includes the long-term portion of capital lease obligations.
- (7) Book value per share is calculated as Reliance shareholders' equity divided by number of common shares outstanding as of December 31 of each year.
- (8) Return on Reliance shareholders' equity is based on the beginning of year equity amount, except for 2006, 2001 and 2000 which are adjusted for a 2006 acquisition using \$360.5 million of common stock as consideration, a secondary public equity offering in 2001, and a significant stock repurchase in 2000.
- (9) Net debt-to-total-capital ratio is calculated as total debt (net of cash) divided by Reliance shareholders' equity plus total debt (net of cash).
- (10) Gross profit, calculated as Net sales less Cost of sales, and Gross profit margin, calculated as Gross profit divided by Net sales, are non-GAAP financial measures as they exclude depreciation and amortization expense associated with the corresponding sales. The majority of our orders are basic distribution with no processing services performed. For the remainder of our sales orders, we perform "first-stage" processing which is generally not labor intensive as we are simply cutting the metal to size. Because of this, the amount of related labor and overhead, including depreciation and amortization, is not significant and is excluded from our cost of sales. Therefore, our cost of sales is primarily comprised of the cost of the material we sell. We use gross profit and gross profit margin as measures of operating performance. Gross profit margin is an important operating and financial measure, as fluctuations in our gross profit margin can have a significant impact on our earnings. Gross profit margin, as presented, is not necessarily comparable with similarly titled measures for other companies.
