

2018 ANNUAL REPORT

EXECUTING OUR PLAN

We continued to execute our corporate strategy in 2018. Favorable market conditions buoyed our efforts, resulting in significant financial and operational milestones. Our dedication to relationships and commitment to our long-term plan helped Reliance deliver record-breaking results.

Annual Net Sales \$11.53 Billion
Annual Gross Profit \$3.28 Billion
Annual Earnings Per Share \$8.75
Pretax Income \$850.6 Million

SETTING NEW RECORDS

Consistent with our growth and capital allocation strategies, we invested \$77.6 million to complete three acquisitions that increase our value-added processing capabilities and expand our catalog of specialty products. We also invested a record \$239.9 million in capital expenditures, demonstrating our commitment to organic growth, with a focus on state-of-the-art processing equipment.

CONTINUOUS GROWTH AND INNOVATION

Our internal peer-to-peer SMART Safety program helps ensure that we go home to our loved ones in the same condition as we arrived for work. This concentrated effort to enhance our safety culture resulted in a 6% decrease in recordable incidents in 2018.

We care about our customers and provide best-in-class service at all levels, from innovating custom solutions to delivering materials on a just-in-time basis. We focus on small orders with value-added processing and quick turnaround. In 2018, we performed processing on approximately 49% of our orders and delivered about 40% of our orders within 24 hours. Our average order size was \$2,130.

PEAK PERFORMANCE

Reliance made record share repurchases of \$484.9 million in 2018, demonstrating our confidence in our strategic plan and outlook. We also provided meaningful return to our stockholders through dividend payments, totalling \$145.3 million in 2018. Reliance has paid regular quarterly cash dividends for 59 consecutive years; the 10% increase announced in the first quarter of 2019 is the 26th dividend increase since the Company went public in 1994.

STOCKHOLDER RETURNS

Reliance's executive management team represents over a century of combined operational and management experience. Coupled with our deep bench of leaders across our Family of Companies, Reliance's expertise and experience is unparalleled. After more than a decade on the executive team following a 17-year tenure at one of our largest subsidiaries, Jim Hoffman became President and Chief Executive Officer effective January 1, 2019.

(1) Gross profit, calculated as net sales less cost of sales, is a non-GAAP financial measure as it excludes depreciation and amortization expense associated with the corresponding sales. About half of our orders are basic distribution with no processing services performed. For the remainder of our sales orders, we perform "first-stage" processing, which is generally not labor intensive as we are simply cutting the metal to size. Because of this, the amount of related labor and overhead, including depreciation and amortization, is not significant and is excluded from our cost of sales. Therefore, our cost of sales is substantially comprised of the cost of the material we sell. We use gross profit as shown above as a measure of operating performance. Gross profit is an important operating and financial measure, as fluctuations in our gross profit can have a significant impact on our earnings. Gross profit, as presented, is not necessarily comparable with similarly titled measures for other companies.

(2) The adoption of accounting rule changes in 2017 affected the presentation of pension costs. Prior year warehouse, delivery, selling, general and administrative expense and other expense (income), net have been retrospectively adjusted to conform to the current presentation.

(3) 2017 includes a \$207.3 million, or \$2.82 per share, income tax benefit as a result of the Tax Cuts and Jobs Act of 2017.

(4) Includes capital lease obligations.

Fellow Stockholders

2018 was a record year for Reliance, marked by significant financial and operational milestones. Our field managers' continued excellence in strategic execution was bolstered by healthy demand trends and improved pricing conditions in the marketplace. These forces synergized to achieve 2018 net sales of \$11.5 billion – \$1.8 billion over 2017 and the highest in Reliance's history. Our annual gross profit margin of 28.4% (near the high-end of our estimated sustainable range of 27% to 29%) produced record gross profit dollars of \$3.3 billion and our highest ever pre-tax income of \$850.6 million. Importantly, our pre-tax income increased 45.7% year-over-year on an 18.7% increase in sales, demonstrating the strength of our business model and disciplined strategy of focusing on higher-margin business. As a result, we generated strong cash flow from operations of \$664.6 million which we deployed by executing on our growth strategy while also providing meaningful returns to our stockholders. Notably, in 2018 we repurchased a record \$484.9 million of our common stock, demonstrating our continued confidence in the strength of our business strategy and outlook.

Our full-year non-GAAP earnings of \$8.94 per diluted share grew 64.3% year-over-year, and set another Reliance record. Our earnings were supported by favorable pricing conditions stemming from solid demand trends and trade actions, which led to multiple mill price increases during the first nine months of the year. While we did not experience any notable price increases in the fourth quarter, the overall strong pricing environment resulted in a 17.9% increase in our average selling price in 2018 compared to 2017. Customer demand was healthy throughout the year, with our same-store tons sold up 0.8% year-over-year.

Reliance credits much of our success to the emphasis we place on increasing value-added services to our customers, effective working capital management, and strict expense control. Our significant investments in cutting-edge, value-added processing equipment have enabled us to increase our gross profit margin, which in turn improves our earnings. Maintaining an efficient inventory position also benefits our gross profit margin by allowing us to concentrate on higher-margin business. In 2018, we performed value-added processing services on 49% of our orders, an increase of 400 basis points over the past five years, with our gross profit margin expanding 330 basis points over the same period. We were very pleased with our expense management in 2018: our full year expenses (warehouse, delivery, selling, general, and administrative), as a percent of sales, declined 150 basis points year-over-year on a \$1.8 billion increase in sales.

We continue to benefit from our long-term strategy of serving a broad spectrum of diverse end markets – including aerospace, automotive, non-residential construction, heavy industry, and energy – which helps mitigate volatility in any single end market. Further, Reliance's decentralized operating structure allows us to concentrate on fulfilling small orders, as the majority of our customers purchase in smaller quantities on a just-in-time basis, and are generally less price sensitive than customers that place large volume orders with long lead times. In 2018, our average order size was \$2,130 and approximately 40% of our orders were delivered within 24 hours.

Aerospace remains one of our top-performing end markets and we continue to focus on

growing our market share both domestically and abroad. Demand for automotive, which we service mainly through our toll processing operations in the U.S. and Mexico, also remains strong. We continue to invest in facilities and value-added processing equipment to meet the robust demand for the services we provide, especially those related to increased aluminum content in vehicles. Consistent with these efforts, in 2018 we commenced projects to further increase our aluminum processing capabilities in Kentucky and acquired complete ownership of Acero Prime, S. de R.L. de C.V., a toll processor in Mexico with four locations, from our joint venture partner. These investments allow us to better support our growth initiatives in automotive as we continue to capitalize on the positive demand environment.

Demand in heavy industry – which includes rail car, truck trailer, ship building, barge manufacturing, tank manufacturers and wind and transmission towers – steadily improved throughout 2018. We benefitted from our customers’ higher capital spending budgets, evidenced by increased spending on both

construction and agricultural equipment throughout the year. While still below peak levels in 2006, demand in the non-residential construction market – including infrastructure – also grew at a steady rate throughout 2018. We believe this market will continue to recover and that we are well positioned to support a higher volume of business.

Finally, demand for the products we sell into the energy market, which is mainly oil and natural gas, improved in 2018, and we remain confident in our ability to service further increases in demand. Our overall outlook for 2019 remains positive, with feedback on demand trends in the various end markets we serve ranging from steady to strong.

Reliance’s twofold growth strategy of capital expenditures to achieve organic growth and strategic acquisitions of well-managed metals service centers has driven the Company’s outstanding growth for decades. Over the last five years we have invested almost \$1 billion in capital expenditures, with approximately 50% spent on new processing equipment.

NET SALES (in millions)

NET INCOME (in millions)

*Includes a \$207.3 million, or \$2.82 per share, income tax benefit as a result of the Tax Cuts and Jobs Act of 2017.

In 2018, our capital expenditures totaled a record \$239.9 million and our 2019 budget is \$230 million. The majority of our spending will be strategically focused on organic growth, investing in innovative technologies and equipment to further expand our value-added processing capabilities. Reliance also completed three acquisitions in 2018, bringing our total post-IPO acquisition count to 66. We continue to pursue acquisition opportunities that align with our proven strategy of acquiring well-run businesses that complement our diversification of products, services and geography and enhance our value-added processing services. We are very pleased with the robust pipeline of opportunities currently in the market, but will remain selective in regards to acquisition activity.

Returning value to our stockholders through quarterly cash dividends and share repurchases remains core to our capital allocation philosophy. We have paid regular quarterly cash dividends for 59 consecutive years and have increased our dividend 26 times since our 1994 IPO, including our recent increase of 10% to \$0.55 per share

in the first quarter of 2019. Our record share repurchases in 2018, totaling \$484.9 million, reflect the trust and confidence our Board and management have in our strong and consistent business strategy and outlook.

In February, we celebrated Reliance's 80th anniversary. Reliance was founded in 1939 based on the core principle of providing outstanding service to our customers. We have grown tremendously in our 80 year history, fueled by decades of expansion through organic growth and strategic acquisitions, with an emphasis on high-margin specialty products and value-added processing capabilities. Today, we are the largest metals service center company in North America, servicing our 125,000 plus customers from over 300 locations in 40 states and 13 countries outside of the U.S. Despite the exponential growth of our business, our founding commitment to customer service remains unchanged.

Our ability to meet that fundamental commitment to our customers would not be possible without the hard work and dedication of our 15,000 plus

RETURN ON EQUITY
Based on beginning of the year equity.

*Return on Reliance stockholders' equity is based on the beginning of year equity amount, except for 2018 and 2015, which are adjusted for \$484.9 million and \$355.5 million of share repurchases, respectively, and 2017, which is adjusted for a \$207.3 million income tax benefit as a result of the Tax Cuts and Jobs Act of 2017.

CASH FLOW FROM OPERATIONS (in millions)

employees around the world. That dedication is reciprocated; employees are our most important assets and we continue to focus on ensuring their safety every day on the job. In 2018, incident rates at Reliance improved 6% year-over-year. We attribute much of this success to our peer-to-peer based “SMART Safety” program, launched in 2017. With the 2019 theme “One Family, One Culture of SMART Safety”, safety will remain a key priority as we work to further embed a culture of safety across our Family of Companies. We also recognize the value of our employees by providing industry-leading benefits with rich healthcare and retirement plans.

Complementing our long history of supporting national and international disaster relief organizations, Reliance established an employee assistance fund, “Reliance Cares,” specifically designed to support our employees impacted by natural disasters. Since its inception in 2017,

employees across our Family of Companies have donated to the fund, and Reliance has matched all contributions dollar for dollar. Reliance Cares provided grants to help employees and their families rebuild after Hurricanes Harvey and Irma in 2017, and Hurricane Florence in 2018.

In addition to helping our employees when they need it, Reliance is devoted to investing in and enriching the communities in which we live and work. We encourage our employees to engage in and initiate events to serve their communities, and often match their fundraising efforts. Among other activities, we support nonprofits that provide veteran transition services and participate in a national program focused on supporting members of the armed forces and their families. We continue to seek employee and community engagement opportunities, especially national initiatives, in which our Family of Companies can participate. Finally, we are committed to mitigating the impact our products

EARNINGS PER SHARE (diluted)

and operations have on the environment. As part of our pledge to environmental sustainability, we continuously evaluate and implement initiatives focused on energy conservation, recycling, and other programs to reduce pollution and improve our environmental impact.

In closing, Reliance is extremely proud of our record 2018 financial results, which were made possible by the excellent execution of our employees and supported by strong metal pricing and healthy demand trends in the end markets we service. Our 2019 results are a testament to our ability to produce record results under favorable market conditions. We remain optimistic about the current environment, in which we will continue to strive to maximize our earnings and increase value for our stockholders. On behalf of Reliance, we would like to express our gratitude to our loyal employees, customers, suppliers, and stockholders for their continued support. We look forward to another successful year in 2019.

(1) Operating income represents net sales less cost of sales, warehouse, delivery, selling, general and administrative expense, depreciation and amortization expense and impairment of long-lived assets. The calculation of operating income in years 2012 through 2018 includes various non-recurring charges and credits, including impairment charges in 2018, 2017, 2016, 2015, 2013 and 2012. Additionally, the adoption of accounting rule changes in 2017 affected the presentation of operating income. Prior year operating income and margin amounts have been retrospectively adjusted to conform to the current presentation.

(2) The adoption of accounting rule changes in 2009 affected the presentation of noncontrolling interests. Prior year pre-tax income and margin amounts have been retrospectively adjusted to conform to the current presentation.

(3) 2017 includes a \$207.3 million, or \$2.82 per share, income tax benefit as a result of the Tax Cuts and Jobs Act of 2017.

(4) Short-term and long-term debt amounts include capital lease obligations. The adoption of accounting rule changes in 2015 affected the presentation of debt issuance costs. Prior year total assets, long-term debt and net debt-to-total capital ratio amounts have been retrospectively adjusted to conform to the current presentation.

(5) Book value per share is calculated as Reliance stockholders' equity divided by the number of common shares outstanding as of December 31 of each year.

	2014	2013	2012	2011	2010	2009	2008
	\$10,451.6	\$9,223.8	\$8,442.3	\$8,134.7	\$6,312.8	\$5,318.1	\$8,718.8

Gregg Mollins came to Reliance with a decade of experience in operations. After his success as a division manager, he went on to succeed Joe Crider as Reliance's "fix-it" man. He applied his know-how to improve many of the Company's early acquisitions, which positioned Reliance to successfully complete its 1994 IPO. Gregg has been involved in all 66 post-IPO acquisitions, the last seven of which he championed as President and CEO. Gregg has always believed

in "doing the right thing," an ethos that has earned him a reputation for integrity and unparalleled operational instinct in the metals service center industry. Across the Family of Companies, Gregg is known for caring deeply about our people. Reliance's record performance in 2018 under his leadership is proof. The Reliance Family thanks Gregg for his 32 years of service and wishes him and his family the very best in his retirement.

As the son of William/Bill Gimbel, who led Reliance for over 30 years, Thomas W. Gimbel essentially grew up alongside the Company. Tom's service on the Reliance board for 20 years has been both strategic and sentimental. We salute the Gimbel legacy and send Tom into retirement with deep appreciation and best wishes.

Douglas M. Hayes was the lead banker in Reliance's 1994 IPO, and since joining our Board in 1997, has provided investment perspective and strategic guidance. We thank Doug for over two decades of dedication to Reliance, which has helped us weather difficult times, undergo exponential growth, and accomplish record achievements.

Corporate Directory

DIRECTORS

Mark V. Kaminski ^{(1), (2)}

Reliance Steel & Aluminum Co.'s common stock is traded on the New York Stock Exchange under the symbol "RS."

MARKET PRICE OF COMMON STOCK

The high and low closing sales prices for the Company's common stock in 2018 were \$97.41 and \$68.62. The following table sets forth the high and low sale prices of the Company's common stock for the stated calendar quarters.

	HIGH	LOW
2018		
1Q	\$95.97	\$79.84
2Q	\$97.41	\$82.40
3Q	\$94.15	\$83.12
4Q	\$86.61	\$68.62

STOCKHOLDERS OF RECORD AND DIVIDEND POLICY

As of February 22, 2019, there were 190 record holders of our common stock. We have paid quarterly cash dividends on our common stock for 59 consecutive years. Our Board of Directors has increased the quarterly dividend rate on a periodic basis 26 times since our IPO in 1994.

FORWARD-LOOKING STATEMENTS

This Annual Report includes statements that, to the extent they are not recitations of historical fact, may constitute forward-looking statements within the meaning of the federal securities laws, and are based on Reliance's current expectations and assumptions. For a discussion identifying important factors that could cause actual results to vary materially from those anticipated in the forward-looking statements, see Reliance's 2018 Form 10-K. As a result, these statements speak only as of the date that they are made, and Reliance disclaims any and all obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events, or otherwise.
