Henry Schein One is committed to empowering dentists to put patient care first. For DSOs, that means empowering them to scale with precision, standard operations seamlessly, and deliver consistent, high-quality care across every location. The company's smarter care approach brings all the pieces together to transform how DSOs operate, enabling them to:

- Eliminate redundant logins and manual processes across locations
- Surface patient-specific coverage details at scheduling and intake

- Provide clearer cost estimates to support patient understanding and confidence
- Enhance workflows between front office, clinical staff, and billing teams

“DSOs don’t scale on siloed systems and patchwork platforms,” said Dr. Ryan Hungate, Chief Clinical and Strategy Officer, Henry Schein One. “They scale when everything - eligibilities, patient forms, imaging, cost estimates - flows through a single connected experience. That’s what we’re delivering. One centralized platform, built for growth, so DSOs can move faster, operate smarter, and drive more consistent care at every location.”
