

Mannatech's Million-Dollar Club Grows to 200 Sales Associates

2015-07-16

COPPELL, Texas--(BUSINESS WIRE)--Jul. 16, 2015-- **Mannatech, Incorporated** (NASDAQ:**MTEX**), the founder of the **M5MSM (Mission 5 MillionSM) social entrepreneurial movement**, and pioneer of nutritional glycobiology-based supplements and skincare, has announced its Million Dollar Club has grown to 200 individuals.* The Mannatech Million Dollar Club comprises independent sales Associates from around the world who have earned more than \$1 million through their Mannatech business.

Mannatech Associates are building thriving businesses in 24 countries around the world based on Mannatech's science-backed products and operations that create a safe environment for long-term growth.

"It is truly an accomplishment when an Associate can call themselves a millionaire. We are proud of those who have worked hard to make their business succeed and reach such a high level," said Dr. Robert Sinnott, Chief Science Officer and CEO of Mannatech. "The proof of Mannatech's promise lives in these 200 individuals."

"Very few companies in our industry have ever generated 200 millionaires," said Al Bala, President of Mannatech. "We have a commitment to providing the best products and support to help our Associates build businesses that last. Mannatech isn't the newest direct sales company, but our substance is a far stronger foundation on which to build a business and aspire to become a millionaire."

The newest members of Mannatech's Million Dollar Club, as of the end of the second quarter of 2015, reflect the company's global expansion that will include opening operations in Colombia later this year. Some of the newest members of Mannatech's Million Dollar Club come from Australia, Japan, Korea and from the United States.

Mannatech sales Associates have been able to reach these levels of success by leveraging new products and

programs, including the release of the **Generation Ūth™ Skin Care System**, the **Refresh and Rejuvenate Purification Program** and the introduction of **MannaBOOM™** slim sticks (formerly known as GlycoBOOM) into emerging markets.

Earlier this year, Mannatech celebrated receiving its 100th patent, demonstrating its commitment to delivering and protecting its unique formulations in major global markets. Mannatech also sets the bar for quality with its industry-leading quality assurance program that complies with the U.S. Food and Drug Administration's current Good Manufacturing Practices for dietary supplements. Additionally, many of Mannatech's products feature third-party certification through NSF International.

Also helping contribute to Associates' success are the number of products in Mannatech's broad portfolio that have been validated with research conducted by independent scientists and published in peer-reviewed scientific journals. Currently, 17 human clinical trials have been published, 13 of which were double-blind, placebo-controlled studies—the gold standard for product validation.

"We have science-backed technology, unmatched quality standards and protections with a catalog of contemporary products that meet the wellness needs of countless customers around the world," Sinnott said. "This is a potent combination of elements that no other direct selling company can match, and gives our Associates opportunities to create wealth and build a business with the potential to generate millions of dollars."
