Purposes of the Committee

Asset Liability Management is the process of actively managing the risk inherent in the Bank's balance sheet, primarily the Bank's interest-earning assets (loans and securities) and interest-bearing liabilities (deposits and borrowings) in a manner consistent with the Bank's goals for 1) risk tolerances, 2) long-term growth and 3) profitability.

The Committee's management of risk shall be for these purposes: 1) to provide guidance to Bank management such that sufficient risk is taken to achieve growth and profitability objectives; and 2) to prevent Bank management from engaging in speculative practices or otherwise involve levels of risk considered unacceptable by the Committee.
