Crinetics Pharmaceuticals Announces Proposed Public Offering of Common Stock

2026-01-05

SAN DIEGO, Jan. 05, 2026 (GLOBE NEWSWIRE) -- Crinetics Pharmaceuticals, Inc. (Nasdaq: CRNX) ("Crinetics"), a pharmaceutical company focused on the discovery, development and commercialization of novel therapeutics for endocrine diseases and endocrine-related tumors, announced today that it intends to offer and sell, subject to market and other conditions, \$350.0 million of shares of its common stock in a proposed underwritten public offering. In addition, Crinetics intends to grant the underwriters a 30-day option to purchase up to an additional \$52.5 million of shares of common stock. All of the shares to be sold in the proposed offering are to be sold by Crinetics. There can be no assurance as to whether or when the offering may be completed, or as to the actual size or terms of the offering.

Crinetics intends to use the net proceeds from the proposed offering, together with its cash, cash equivalents and investment securities, to fund its commercial activities in connection with the launch of PALSONIFY™, research and development of its product candidates, other research programs and other general corporate purposes, which may include, among other things, capital expenditures or working capital. Crinetics may also use a portion of the remaining net proceeds, together with its existing cash, cash equivalents and investment securities, to in-license, acquire, or invest in complementary businesses, technologies, products or assets; however, it has no current commitments or obligations to do so.

Leerink Partners, J.P. Morgan, Evercore ISI, Piper Sandler and Cantor are acting as joint bookrunning managers for the proposed offering.

The securities described above are being offered by Crinetics pursuant to a shelf registration statement that

became automatically effective upon its filing with the Securities and Exchange Commission ("SEC"). The proposed offering may be made only by means of a prospectus supplement and accompanying prospectus. A preliminary prospectus supplement and accompanying prospectus relating to this offering will be filed with the SEC. When available, copies of the preliminary prospectus supplement and the accompanying prospectus relating to this offering may be obtained from: Leerink Partners LLC, Attention: Syndicate Department, 53 State Street, 40th Floor, Boston, MA 02109, by telephone at (800) 808-7525, ext. 6105, or by email at syndicate@leerink.com; or J.P. Morgan Securities LLC, Attention: c/o Broadridge Financial Solutions, 1155 Long Island Avenue, Edgewood, NY 11717, or by email at prospectus-eq_fi@jpmchase.com and postsalemanualrequests@broadridge.com. Electronic copies of the preliminary prospectus supplement and accompanying prospectus will also be available on the website of the SEC at www.sec.gov.

This press release shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of these securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to the registration or qualification under the securities laws of any such jurisdiction.

About Crinetics Pharmaceuticals

Crinetics Pharmaceuticals is a global pharmaceutical company committed to transforming the treatment of endocrine diseases and endocrine-related tumors through science rooted in patient needs. Crinetics is focused on discovering, developing, and commercializing novel therapies, with a core expertise in targeting G-protein coupled receptors (GPCRs) with small molecules that have specifically tailored pharmacology and properties.

Crinetics' lead product, PALSONIFY™ (paltusotine), is the first once-daily, oral treatment approved by the U.S. Food and Drug Administration ("FDA") for the treatment of adults with acromegaly who had an inadequate response to surgery and/or for whom surgery is not an option. Paltusotine is also in clinical development for carcinoid syndrome associated with neuroendocrine tumors. Crinetics' deep pipeline of 10+ disclosed programs includes late-stage investigational candidate atumelnant, which is currently in development for congenital adrenal hyperplasia and ACTH-dependent Cushing's syndrome, and CRN09682, a nonpeptide drug conjugate candidate that is being developed to treat SST2 expressing neuroendocrine tumors and other SST2 expressing solid tumors. Additional discovery programs address a variety of endocrine conditions such as neuroendocrine tumors, Graves' disease (including Graves' hyperthyroidism and Graves' orbitopathy, or thyroid eye disease), polycystic kidney disease, hyperparathyroidism, diabetes, obesity, and GPCR-targeted oncology indications.
