Table of Contents

Notes to Condensed Consolidated Financial Statements (Unaudited)

1. Basis of Presentation

These statements have been prepared pursuant to the rules and regulations of the U.S. Securities and Exchange Commission (“SEC”) and, in accordance with those rules and regulations, do not include all information and footnote disclosures normally included in annual financial statements prepared in accordance with accounting principles generally accepted in the United States of America (“GAAP”). In the opinion of management, the condensed consolidated financial statements reflect all adjustments, consisting only of normal recurring adjustments, necessary to fairly state the results of operations, financial position and cash flows of Teradata Corporation (“Teradata” or the “Company”) for the interim periods presented herein. The year-end 2010 condensed consolidated balance sheet data was derived from audited financial statements, but does not include all disclosures required by GAAP. The preparation of condensed consolidated financial statements in conformity with GAAP requires management to make use of estimates and assumptions that affect the reported amounts and disclosures. Actual results may vary from these estimates.

These condensed consolidated interim financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in Teradata’s most recent Annual Report on Form 10-K for the fiscal year ended December 31, 2010 (the “2010 Annual Report”). The results of operations for any interim period are not necessarily indicative of the results of operations to be expected for the full year. Certain prior-year amounts have been reclassified to conform to the 2011 presentation.

Revenue Recognition

Teradata’s solution offerings typically include software, software subscriptions (unspecified when-and-if-available upgrades), hardware, maintenance support services, and other consulting, implementation and installation-related (“consulting”) services. Teradata records revenue when it is realized, or realizable, and earned. Teradata considers these requirements met when:

- Persuasive evidence of an arrangement exists
- The products or services have been delivered to the customer
- The sales price is fixed or determinable and free of contingencies or significant uncertainties
- Collectibility is reasonably assured

Teradata reports revenue net of any taxes assessed by governmental authorities that are imposed on and concurrent with specific revenue-producing transactions. The Company assesses whether fees are fixed or determinable at the time of sale. Standard payment terms may vary based on the country in which the agreement is executed, but are generally between 30 and 90 days. Payments that are due within six months are generally deemed to be fixed or determinable based on a successful collection history on such arrangements, and thereby satisfy the required criteria for revenue recognition. Teradata delivers its solutions primarily through direct sales channels, as well as through alliances with system integrators, other independent software vendors and distributors, and value-added resellers (collectively referred to as “resellers”). In assessing whether the sales price to a reseller is fixed or determinable, the Company considers, among other things, past business practices with the reseller, the reseller’s operating history, payment terms, return rights and the financial wherewithal of the reseller. When Teradata determines that the contract fee to a reseller is not fixed or determinable, that transaction is deferred and recognized upon sell-through to the end customer.

The Company’s deliverables often involve delivery or performance at different periods of time. Revenue for software is generally recognized upon delivery with the hardware once title and risk of loss have been transferred. Revenue for software subscriptions, which provide for unspecified upgrades or enhancements on a when-and-if-available basis, is recognized straight-line over the term of the subscription arrangement. Revenue for maintenance support services is also recognized on a straight-line basis over the term of the contract. Revenue for other consulting, implementation and installation services is recognized as services are provided. In certain instances,

Table of Contents

acceptance of the product or service is specified by the customer. In such cases, revenue is deferred until the acceptance criteria have been met. Delivery and acceptance generally occur in the same reporting period. The Company's arrangements generally do not include any customer negotiated provisions for cancellation, termination or refunds that would significantly impact recognized revenue.

In October 2009, the Financial Accounting Standards Board ("FASB") amended the accounting standards for revenue recognition to remove tangible products containing software components and non-software components that function together to deliver the product's essential functionality from the scope of the industry-specific software revenue recognition guidance. In October 2009, the FASB also amended the accounting standards for multiple deliverable revenue arrangements to:

- Provide updated guidance on whether multiple deliverables exist, how the deliverables in an arrangement should be separated, and how the consideration should be allocated;
- Require an entity to allocate revenue in an arrangement using its best estimate of selling prices ("BESP") for deliverables if a vendor does not have vendor-specific objective evidence of selling price ("VSOE") or third-party evidence of selling price ("TPE"); and
- Eliminate the use of the residual method and require an entity to allocate revenue using the relative selling price method.

The standard is effective prospectively for revenue arrangements entered into or materially modified in fiscal years beginning on or after June 15, 2010. Teradata adopted these standards on a prospective basis as of the beginning of fiscal 2011 for new and materially modified arrangements originating on or after January 1, 2011.

The Company evaluates all deliverables in an arrangement to determine whether they represent separate units of accounting. A deliverable constitutes a separate unit of accounting when it has standalone value, and if the contract includes a general right of return relative to the delivered item, delivery or performance of the undelivered items is considered probable and substantially in the control of Teradata. This guidance does not generally change the units of accounting for the Company's revenue transactions. Most of the Company's products and services qualify as separate units of accounting and are recognized upon meeting the criteria as described above.

For multiple deliverable arrangements that contain non-software related deliverables, the Company allocates revenue to each deliverable based upon the relative selling price hierarchy and if software and software-related deliverables are also included in the arrangement, to those deliverables as a group based on the BESP for the group. The selling price for a deliverable is based on its VSOE if available, TPE if VSOE is not available, or BESP if neither VSOE nor TPE is available. The Company then recognizes revenue when the revenue recognition criteria are met for each deliverable. For the software group or arrangements that contain only software and software-related deliverables, the revenue recognition criteria remain unchanged as further described below.

Teradata's data warehousing software and hardware products are sold and delivered together in the form of a "Node" of capacity as an integrated technology solution. Because both the database software and hardware platform are necessary to deliver the data warehouse's essential functionality, the database software and hardware (Node) are excluded from the software rules and considered a non-software related deliverable. Teradata software applications and related support are considered software-related deliverables. Additionally, the amount of revenue allocated to the delivered items utilizing the relative selling price method is limited to the amount that is not contingent upon the delivery of additional items or meeting other specified performance conditions (the non-contingent amount).

VSOE is based upon the normal pricing and discounting practices for those products and services when sold separately. Teradata uses the stated renewal rate approach in establishing VSOE for maintenance and subscriptions (collectively referred to as postcontract customer support "PCS"). Under this approach, the Company assesses whether the contractually stated renewal rates are substantive and consistent with the Company's normal pricing practices. Renewal rates greater than the lower level of our targeted pricing ranges are considered to be substantive and, therefore, meet the requirements to support VSOE. In instances where there is not a substantive renewal rate in the arrangement, the Company allocates revenue based upon BESP, using the minimum established pricing targets

Table of Contents

as supported by the renewal rates for similar customers utilizing the bell-curve method. Teradata also offers consulting and installation-related services to its customers, which are considered non-software deliverables if they relate to the nodes. These services are rarely considered essential to the functionality of the enterprise data warehouse (“EDW”) solution deliverable and there is never software customization of the proprietary database software. VSOE for consulting services is based on the hourly rates for standalone consulting services projects by geographic region and are indicative of the Company’s customary pricing practices. Pricing in each market is structured to obtain a reasonable margin based on input costs.

In nearly all multiple-deliverable arrangements, the Company is unable to establish VSOE for all deliverables in the arrangement. This is due to infrequently selling each deliverable separately (such is the case with our nodes), not pricing products or services within a narrow range, or only having limited sales history. When VSOE cannot be established, attempts are made to establish TPE of the selling price for each deliverable. TPE is determined based on competitor prices for similar deliverables when sold separately. However, Teradata’s offerings contain significant differentiation such that the comparable pricing of products with similar functionality cannot be obtained. This is because Teradata’s products contain a significant amount of proprietary technology and its solutions offer substantially different features and functionality than other available products. As Teradata’s products are significantly different from those of its competitors, the Company is unable to establish TPE for the vast majority of its products.

When the Company is unable to establish selling price using VSOE or TPE, the Company uses BESP in its allocation of arrangement consideration. The objective of BESP is to determine the price at which the Company would transact a sale if the product or service was sold on a standalone basis. The Company determines BESP for a product or service by considering multiple factors including, but not limited to, geographies, market conditions, competitive landscape, internal costs, gross margin objectives, purchase volumes and pricing practices.

The Company reviews VSOE, TPE and its determination of BESP on a periodic basis and updates it, when appropriate, to ensure that the practices employed reflect the Company’s recent pricing experience. The Company maintains internal controls over the establishment and updates of these estimates, which includes review and approval by the Company’s management. For the six months ended June 30, 2011 there was no material impact to revenue resulting from changes in VSOE, TPE or BESP, nor does the Company expect a material impact from such changes in the near term.

The adoption of the amended revenue recognition guidelines did not have a material impact on the Company’s results of operations or financial condition. The Company is not able to reasonably estimate the effect of adopting these standards on future financial periods as the impact will vary based on the nature and volume of new or materially modified deals in any given period. However, in terms of the timing and pattern of revenue recognition, the new accounting guidance for revenue recognition is not expected to have a significant effect on total revenue in periods after the initial adoption.

Accounting for arrangements prior to January 1, 2011. For transactions entered into prior to January 1, 2011, the Company allocates revenue for multiple deliverable arrangements for which VSOE exists for undelivered elements but not for the delivered elements, using the “residual method”. Teradata does not typically have VSOE for its hardware and software products. Therefore, in a substantial majority of Teradata arrangements entered into prior to January 1, 2011, the residual method is used to allocate the arrangement consideration. Under the residual method, the VSOE of the undelivered elements is deferred and accounted for under the applicable revenue recognition guidance, and the remaining portion of the arrangement fee is allocated to the delivered elements and is recognized as revenue. For arrangements in which VSOE does not exist for each undelivered element, revenue for the entire arrangement is deferred and not recognized until delivery of all the elements without VSOE has occurred, unless the only undelivered element is PCS in which case the entire contract is recognized ratably over the PCS period.

Contract accounting. If an arrangement involves significant production, modification or customization of the application software or the undelivered services are essential to the functionality of the delivered software then the Company uses the percentage-of-completion or completed-contract method of accounting. The percentage-of-completion method is used when estimates of costs to complete and extent of progress toward completion are

Table of Contents

reasonably dependable. The Company typically uses labor hours or costs incurred to date as a percentage of the total estimated labor hours or costs to fulfill the contract as the most reliable and meaningful measure that is available for determining a project's progress toward completion. In circumstances when reasonable and reliable cost estimates for a project cannot be made, the completed-contract method is used whereas no revenue is recognized until the project is complete. When total cost estimates exceed revenues, the Company accrues the estimated losses immediately. For purposes of allocation of the arrangement consideration, any products for which the services are not essential are separated utilizing the relative selling price method discussed above. PCS is also separated and allocated based on VSOE and then recognized ratably over the term. The remaining contract value, which typically include application software and essential services, is then recognized utilizing the percentage-of-completion method or completed-contract methods discussed above.

Term licenses, hosting arrangements and software-as-a-service ("SaaS"). As a result of the Company's acquisition of Aprimo, Inc. ("Aprimo") on January 21, 2011 (See Note 12), Teradata's application offerings will be expanded to include, term licenses, hosting arrangements and SaaS. Teradata previously offered its software applications primarily through a perpetual licensing arrangement. In cases where the contract requires the software to be hosted by the Company and provided via an on-demand arrangement, the software is considered a subscription. If the license is of limited life and does not require the Company to host the software for the customer, the software is considered a term license. In both types of these arrangements, revenues are recognized over the term of the agreement. For hosting arrangements where customers have the right to take possession of the Company's software at any time during the hosting period, the customer's rights to the software in these circumstances are not dependent on additional software payments or significant penalties.

2. New Accounting Pronouncements

Comprehensive Income. In June 2011, the Financial Accounting Standards Board ("FASB") issued new guidance regarding the disclosure of comprehensive income. Under the new guidance, an entity will have the option to present the total of comprehensive income, the components of net income, and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. In both choices, an entity will be required to present each component of net income along with total net income, each component of other comprehensive income along with a total for other comprehensive income, and a total amount for comprehensive income. This Update will eliminate the option to present the components of other comprehensive income as part of the statement of changes in stockholders' equity. The amendments in this Update do not change the items that must be reported in other comprehensive income or when an item of other comprehensive income must be reclassified to net income. This new guidance will be effective for fiscal years, and interim periods, beginning after December 15, 2011, with amendments applied retrospectively. The Company is currently evaluating the impact of this guidance.

Fair Value Measurements. In May 2011, the FASB issued new guidance regarding the measurement and disclosure of fair value. The amendments in this new guidance generally represent clarifications of existing GAAP, but also include some instances where a particular principle or requirement for measuring fair value or disclosing information about fair value measurements will change. This new guidance will result in common principles and requirements for measuring fair value and for disclosing information about fair value measurements in accordance with GAAP and International Financial Reporting Standards ("IFRS"). The principles that will be changed as a result of this new guidance primarily relate to: measuring the fair value of financial instruments that are managed within a portfolio, the application of premiums and discounts in a fair value measurement, and some additional disclosures about fair value measurements. This new guidance will be effective for interim and annual periods beginning after December 15, 2011, with amendments applied prospectively. The Company is currently evaluating the impact of this guidance.

Table of Contents

3. Supplemental Financial Information

	June 30, 2011	December 31, 2010
Inventories		
Finished goods	\$ 34	\$ 39
Service parts	25	26
Total inventories	<u>\$ 59</u>	<u>\$ 65</u>

4. Goodwill and Acquired Intangible Assets

The following table identifies the activity relating to goodwill by operating segment:

In millions	Balance December 31, 2010	Additions	Currency Translation Adjustments	Balance June 30, 2011
	2010			2011
Goodwill				
Americas	\$ 85	\$ 347	\$ 1	\$ 433
EMEA	17	131	0	148
APJ	34	98	1	133
Total goodwill	<u>\$ 136</u>	<u>\$ 576</u>	<u>\$ 2</u>	<u>\$ 714</u>

The change in goodwill for the six months ended June 30, 2011 was primarily due to the acquisitions of Aprimo, Inc. ("Aprimo"), and Aster Data Systems, Inc. ("Aster Data") which were completed during the period.

Acquired Intangible Assets were specifically identified when acquired, and are deemed to have finite lives. The gross carrying amount and accumulated amortization for Teradata's acquired intangible assets were as follows:

In millions	Original Amortization Life (in Years)	June 30, 2011		December 31, 2010	
		Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Acquired intangible assets					
Intellectual property/developed technology	5 to 7	145	(14)	18	(6)
Customer relationships	4 to 10	55	(3)	0	0
Trademarks/trade names	5 to 10	13	0	0	0
In-process research and development	5	8	0	0	0
Non-compete agreements	2	1	0	0	0
Total	2 to 10	<u>222</u>	<u>(17)</u>	<u>18</u>	<u>(6)</u>

Table of Contents

The increase in acquired intangible assets since December 31, 2010 was due to developed technology, trademark/trade name, customer relationship, in-process research and development (“IPR&D”), and non-compete agreement assets added through the Aprimo and Aster Data acquisitions. The amortization of IPR&D intangible assets acquired as part of the Aster Data acquisition will not begin until the associated product development has been completed, which is currently estimated to be sometime in the next twelve months. Further information on the intangible assets acquired as part of this acquisition is included in Note 12.

The aggregate amortization expense (actual and estimated) for acquired intangible assets for the following periods is:

In millions	Six Months Ended June 30, 2011	For the year ended (estimated)				
		2011	2012	2013	2014	2015
Amortization expense	\$ 12	\$29	\$36	\$35	\$35	\$33

5. Income Taxes

Income tax provisions for interim periods are based on estimated annual income tax rates, adjusted to reflect the effects of any significant infrequent or unusual items which are required to be discretely recognized within the current interim period. The Company’s intention is to permanently reinvest its foreign earnings outside of the United States. As a result, the effective tax rates in the periods presented are largely based upon the forecasted pre-tax earnings mix and allocation of certain expenses in various taxing jurisdictions where the Company conducts its business that apply a broad range of statutory income tax rates, certain of which are less than the U.S. statutory rate.

The effective tax rate for the three months ended June 30, 2011 and June 30, 2010 was 25% and 30%, respectively. The effective tax rate for the six months ended June 30, 2011 and June 30, 2010 was 26% and 27%, respectively. The tax rate for the three and six months ended June 30, 2011 included a \$4 million tax benefit recorded in the second quarter of 2011 related to the book gain recorded on the Company’s previous equity investment in Aster Data, which was reflected as a permanent non-taxable item. For further information regarding the Company’s acquisition of Aster Data, refer to Note 12. The tax rate for the six months ended June 30, 2010 included a \$5 million tax benefit associated with the recognition of certain foreign net operating loss carryforwards resulting from an audit settlement in the first quarter of 2010.

6. Derivative Instruments and Hedging Activities

As a portion of the Company’s operations and revenue occur outside the United States and in currencies other than the U.S. dollar, the Company is exposed to potential gains and losses from changes in foreign currency exchange rates. To mitigate the impact of currency fluctuations, the Company uses foreign exchange forward contracts to hedge transactional exposures resulting from foreign currency denominated inter-company receivables and payables. The forward contracts are designated as fair value hedges of specified foreign currency denominated inter-company receivables and payables and generally mature in three months or less. The Company does not hold or issue derivative financial instruments for trading purposes, nor does it hold or issue leveraged derivative instruments. By using derivative financial instruments to hedge exposures to changes in exchange rates, the Company exposes itself to credit risk. The Company manages exposure to counterparty credit risk by entering into derivative financial instruments with highly rated institutions that can be expected to fully perform under the terms of the applicable contracts.

All derivatives are recognized in the Condensed Consolidated Balance Sheet at their fair value. The fair values of foreign exchange contracts are based on market spot and forward exchange rates. As these fair value amounts relate to open foreign exchange contracts which have not yet reached maturity, they represent possible gains or losses that may not be realized in the future. Changes in the fair value of derivative financial instruments, along with the loss or gain on the hedged asset or liability, are recorded in current period earnings. The notional amounts represent agreed-upon amounts on which calculations of dollars to be exchanged are based, and are an indication of the extent of Teradata’s involvement in such instruments. These notional amounts do not represent amounts exchanged by the

Table of Contents

parties and, therefore, are not a measure of the instrument's fair value. Across its portfolio of contracts, Teradata has both long and short positions relative to the U.S. dollar. As a result, Teradata's net exposure is less than the total contract notional amount of the Company's foreign exchange forward contracts.

The contract notional amount of the Company's foreign exchange forward contracts was \$63 million (\$17 million on a net basis) at June 30, 2011, and \$91 million (\$51 million on a net basis) at December 31, 2010. The fair value derivative assets and liabilities recorded in other current assets and accrued liabilities at June 30, 2011 and December 31, 2010, were not material.

Gains and losses from the Company's fair value hedges (foreign currency forward contracts and related hedged items) were immaterial for the three and six months ended June 30, 2011 and June 30, 2010. Gains and losses from foreign exchange forward contracts are fully recognized each period and reported along with the offsetting gain or loss of the related hedged item, either in cost of products or in other income, depending on the nature of the related hedged item.

7. Commitments and Contingencies

In the normal course of business, the Company is subject to proceedings, lawsuits, claims and other matters, including those that relate to the environment, health and safety, employee benefits, export compliance, intellectual property, tax matters, and other regulatory compliance and general matters, including those described below.

The Company is subject to governmental investigations and requests for information from time to time. As previously reported prior to Teradata's Separation from NCR, the United States Department of Justice is conducting an investigation regarding the propriety of the Company's arrangements or understandings with others in connection with certain federal contracts and the adequacy of certain disclosures related to such contracts. The investigation arises in connection with civil litigation in federal district court filed under the qui tam provisions of the civil False Claims Act against a number of information technology companies, including the Company. The complaints against the Company remain under seal. The Company has conducted its analysis of such claims focusing on the propriety of certain transactions under federal programs under which Teradata was a contractor. The Company has shared evidence with the Justice Department of questionable conduct that the Company uncovered, has cooperated with the Justice Department in its investigation, and is in settlement discussions with the government to resolve this matter.

A separate portion of the government's investigation relates to the adequacy of pricing disclosures made to the government in connection with negotiation of NCR's General Services Administration Federal Supply Schedule as it relates to Teradata, prior to the Company's Separation from NCR, and to whether certain subsequent price reductions were properly passed on to the government. Both NCR and the Company are participating in this aspect of the investigation, with respect to certain products and services of each, and each will assume financial responsibility for its own exposures, if any, without indemnification from the other.

The Company has an accrual of approximately \$3 million related to the current best estimate of probable liability relating to these matters. The Company believes the amounts provided in its financial statements are adequate in light of the probable and estimable liabilities. The Company believes that there is not a reasonable possibility that the loss in respect of these contingent matters will materially exceed the liability reflected in the Company's financial statements, although there can be no assurance that this will in fact be the case.

Guarantees and Product Warranties. Guarantees associated with the Company's business activities are reviewed for appropriateness and impact to the Company's financial statements. Periodically, the Company's customers enter into various leasing arrangements coordinated with a leasing company. In some instances, the Company guarantees the leasing company a minimum value at the end of the lease term on the leased equipment. As of June 30, 2011, the maximum future payment obligation of this guaranteed value and the associated liability balance was \$2 million.

The Company provides its customers a standard manufacturer's warranty and records, at the time of the sale, a corresponding estimated liability for potential warranty costs. Estimated future obligations due to warranty claims are based upon historical factors such as labor rates, average repair time, travel time, number of service calls and

Table of Contents

cost of replacement parts. For each consummated sale, the Company recognizes the total customer revenue and records the associated warranty liability using pre-established warranty percentages for that product class.

The following table identifies the activity relating to the warranty reserve for the six months ended June 30:

In millions	2011	2010
Warranty reserve liability		
Beginning balance at January 1	\$ 6	\$ 5
Provisions for warranties issued	6	6
Settlements (in cash or in kind)	(6)	(6)
Balance at June 30	<u>\$ 6</u>	<u>\$ 5</u>

The Company also offers extended and/or enhanced coverage to its customers in the form of maintenance contracts. The Company accounts for these contracts by deferring the related maintenance revenue over the extended and/or enhanced coverage period. Costs associated with maintenance support are expensed as incurred. Amounts associated with these maintenance contracts are not included in the table above.

In addition, the Company provides its customers with certain indemnification rights. In general, the Company agrees to indemnify the customer if a third party asserts patent or other infringement on the part of the customer for its use of the Company's products. The Company has entered into indemnification agreements with the officers and directors of its subsidiaries. From time to time, the Company also enters into agreements in connection with its acquisition and divestiture activities that include indemnification obligations by the Company. The fair value of these indemnification obligations is not readily determinable due to the conditional nature of the Company's potential obligations and the specific facts and circumstances involved with each particular agreement, and as such the Company has not recorded a liability in connection with these indemnification arrangements. Historically, payments made by the Company under these types of agreements have not had a material effect on the Company's consolidated financial condition, results of operations or cash flows.

8. Fair Value Measurements

GAAP has established a three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value. These tiers include: Level 1, defined as observable inputs such as quoted prices in active markets for identical assets or liabilities; Level 2, defined as significant other observable inputs, such as quoted prices in active markets for similar assets or liabilities, or quoted prices in less-active markets for identical assets; and Level 3, defined as unobservable inputs in which little or no market data exists, therefore requiring an entity to develop its own assumptions. Financial assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement.

The Company's assets and liabilities measured at fair value on a recurring basis include money market funds and foreign currency exchange contracts. A portion of the Company's excess cash reserves are held in money market funds which generate interest income based on the prevailing market rates. Money market funds are included in cash and cash equivalents in the Company's balance sheet. Money market fund holdings are measured at fair value using quoted market prices and are classified within Level 1 of the valuation hierarchy. When deemed appropriate, the Company minimizes its exposure to changes in foreign currency exchange rates through the use of derivative financial instruments, specifically, forward foreign exchange contracts. The fair value of these contracts are measured at the end of each interim reporting period using observable inputs other than quoted prices, specifically market spot and forward exchange rates. As such, these derivative instruments are classified within Level 2 of the valuation hierarchy. Fair value gains for open contracts are recognized as assets and fair value losses are recognized as liabilities. The fair value derivative assets and liabilities recorded in other current assets and accrued liabilities at June 30, 2011 and December 31, 2010, were not material. Any realized gains or losses would be mitigated by corresponding gains or losses on the underlying exposures.

Table of Contents

The Company's assets and liabilities measured at fair value on a recurring basis at June 30, 2011 were as follows:

In millions	June 30, 2011	Fair Value Measurements at Reporting Date Using		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets				
Money market funds	\$ 251	\$ 251	\$ 0	\$ 0

The Company's assets and liabilities measured at fair value on a recurring basis at December 31, 2010 were as follows:

In millions	December 31, 2010	Fair Value Measurements at Reporting Date Using		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets				
Money market funds	\$ 534	\$ 534	\$ 0	\$ 0

9. Debt

On October 1, 2007, Teradata entered into a five-year revolving credit agreement (the "Credit Facility"), under which the Company may borrow up to \$300 million. The current Credit Facility agreement ends on September 30, 2012, at which point any remaining outstanding borrowings would be due for repayment. The interest rate charged on borrowings pursuant to the Credit Facility can vary depending on the interest rate option the Company chooses to utilize and the Company's leverage ratio at the time of the borrowing. In the near term, Teradata would anticipate choosing a floating rate based on the London Interbank Offered Rate ("LIBOR"). The Credit Facility is unsecured and contains certain representations and warranties, conditions, affirmative, negative and financial covenants, and events of default customary for such facilities. As of June 30, 2011, the Company was in compliance with all covenants of the Credit Facility.

During the three months ended June 30, 2011, Teradata repaid the \$300 million in Credit Facility borrowings that were outstanding as of March 31, 2011. As of June 30, 2011, the Company had no borrowings outstanding under the Credit Facility, leaving \$300 million in additional borrowing capacity available under the Credit Facility.

On April 5, 2011, Teradata closed on a new \$300 million five-year term loan. The term loan is payable in quarterly installments, commencing on June 30, 2012, (with 1.25% of the initial principal amount due on each of the first eight payment dates; 2.50% of the initial principal amount due on each of the next four payment dates; and 5.0% of the initial principal amount due on each of the next three payment dates) with all remaining principal due on April 5, 2016. The outstanding principal amount of the term loan agreement bears interest at a floating rate based upon a negotiated base rate or a Eurodollar rate plus in each case a margin based on the leverage ratio of the Company. As of June 30, 2011, the term loan principal outstanding was \$300 million, and carried an interest rate of 1.56%.

10. Earnings Per Share

Basic earnings per share is calculated by dividing net income by the weighted average number of shares outstanding during the reported period. The calculation of diluted earnings per share is similar to basic earnings per share, except that the weighted average number of shares outstanding includes the dilution from potential shares resulting from stock options and unvested restricted stock awards.

Table of Contents

The components of basic and diluted earnings per share are as follows:

In millions, except per share amounts	Three Months Ended June 30,		Six Months Ended June 30,	
	2011	2010	2011	2010
Net income available for common stockholders	\$ 103	\$ 74	\$ 168	\$ 141
Weighted average outstanding shares of common stock	168.7	167.0	168.5	167.4
Dilutive effect of employee stock options and restricted stock	3.7	2.8	3.6	2.8
Common stock and common stock equivalents	172.4	169.8	172.1	170.2
Earnings per share:				
Basic	\$ 0.61	\$ 0.44	\$ 1.00	\$ 0.84
Diluted	\$ 0.60	\$ 0.44	\$ 0.98	\$ 0.83

Employee stock options to purchase 0.6 million shares of common stock for the six months ended June 30, 2010 were not included in the computation of diluted earnings per share because their exercise prices were greater than the average market price of the common shares for the period and, therefore, the effect would have been anti-dilutive. No stock options were excluded from the computation of diluted earnings per share for the three and six months ended June 30, 2011, or the three months ended June 30, 2010.

11. Segment and Other Supplemental Information

Teradata manages its business in three geographic regions, which are also the Company's operating segments: (1) the North America and Latin America ("Americas") region; (2) the Europe, Middle East and Africa ("EMEA") region; and (3) the Asia Pacific and Japan ("APJ") region. Management evaluates the performance of its segments based on revenue and segment margin, and does not include segment assets for management reporting purposes. Corporate-related costs are fully allocated to the segments.

The following table presents regional segment revenue and gross margin for the Company:

In millions	Three Months Ended June 30,		Six Months Ended June 30,	
	2011	2010	2011	2010
Revenue				
Americas	\$ 339	\$ 281	\$ 646	\$ 533
EMEA	145	108	270	214
APJ	97	81	171	152
Total revenue	581	470	1,087	899
Gross margin				
Americas	194	171	369	317
EMEA	76	57	146	114
APJ	46	40	76	73
Total gross margin	316	268	591	504
Selling, general and administrative expenses	165	126	315	244
Research and development expenses	41	36	75	68
Total income from operations	\$ 110	\$ 106	\$ 201	\$ 192

Table of Contents

The following table presents revenue by product and services for the Company:

In millions	Three Months Ended June 30,		Six Months Ended June 30,	
	2011	2010	2011	2010
Products (software and hardware) ⁽¹⁾	\$ 269	\$ 223	\$ 504	\$ 423
Consulting services	177	132	322	249
Maintenance services	135	115	261	227
Total services	312	247	583	476
Total revenue	\$ 581	\$ 470	\$ 1,087	\$ 899

⁽¹⁾ Our data warehousing software and hardware products are often sold and delivered together in the form of a “node” of capacity as an integrated technology solution. Accordingly, it is impracticable to provide the breakdown of revenue from various types of software and hardware products.

12. Business Combinations

Aprimo, Inc.

On January 21, 2011, Teradata completed its acquisition of 100 percent of the stock of Aprimo, pursuant to an Agreement and Plan of Merger, dated December 21, 2010. Aprimo is a global provider of integrated marketing software solutions. Aprimo is being integrated into Teradata’s operations, and the Aprimo organization will support Teradata’s applications strategy, including development, marketing, sales and services. The purpose of this acquisition is to advance Teradata’s position in integrated marketing management, building on Aprimo’s established and well-positioned business. Aprimo’s operations are being integrated into, and its actual results are reflected in, the Company’s three geographic operating regions.

The aggregate consideration payable with respect to all of the outstanding stock and equity interests (including all outstanding warrants, stock options and restricted stock units) of Aprimo in the acquisition was \$525 million in cash, subject to potential adjustments for closing working capital and certain of Aprimo’s indemnification obligations under the merger agreement. The purchase price was funded in part by using existing U.S. cash, and in part by drawing-down in full the Company’s Credit Facility. Additionally, for the six months ended June 30, 2011, Teradata recognized approximately \$3 million in acquisition-related expenses, which were recorded as General and Administrative expenses.

Preliminary Purchase Price Allocation

Pursuant to our business combinations accounting policy, the total preliminary purchase price for Aprimo was allocated to the net tangible and intangible assets based upon their preliminary fair values as of January 21, 2011 as set forth below. The excess of the purchase price over the net tangible and intangible assets was recorded as goodwill, which represents synergies of combining the businesses. The allocation of the purchase price was based upon a valuation and certain of our estimates and assumptions are subject to change within the measurement period (up to one year from the acquisition date). Areas of the purchase price allocation that are not yet finalized relate to the fair values of certain deferred taxes, tax contingencies and residual goodwill. It is expected that none of the goodwill will be deductible for tax purposes.

Table of Contents

Our purchase price allocation for Aprimo is as follows:

In millions	
Cash and cash equivalents	\$ 26
Accounts receivables	22
Goodwill	377
Intangible assets	123
Other assets	14
Deferred revenue	(25)
Other liabilities	(12)
Total preliminary purchase price	<u>\$525</u>

Valuations of Intangible Assets Acquired

The following table sets forth the components of intangible assets acquired in connection with the Aprimo acquisition:

Dollars in millions	Fair Value	Weighted Average
		Useful Life
Customer relationships - subscription, hosting, maintenance and perpetual software	\$ 37	10 years
Customer relationships - professional services	15	6 years
Developed technology	61	7 years
Trademarks/trade names	10	10 years
Total intangible assets	<u>\$ 123</u>	8 years

Aster Data Systems

On April 5, 2011, Teradata completed its acquisition of all remaining equity of Aster Data Systems, Inc. ("Aster Data"), pursuant to an Agreement and Plan of Merger, dated March 2, 2011. Aster Data is a market leader in advanced analytics and the management of diverse, multi-structured data. The combination of Teradata and Aster Data technologies will enable businesses to perform better analytics on large sets of multi-structured data, also known as "big data."

The aggregate consideration with respect to all of the outstanding stock and equity interests (including all outstanding warrants and vested stock options) of Aster Data was \$259 million. The aggregate consideration excluded the value of Teradata's pre-existing 11.2% equity investment in Aster Data. On April 5, 2011, the fair value of Teradata's previous 11.2% equity interest in Aster Data was \$36 million. Teradata recorded a gain of \$11 million related to this existing equity interest in Aster Data, and that gain was recorded in other income and (expense) in the Condensed Consolidated Statement of Income (Unaudited). Additionally, for the six months ended June 30, 2011, Teradata recognized approximately \$4 million in acquisition-related expenses, which were recorded primarily as General and Administrative expenses.

Teradata financed the acquisition of Aster Data using a portion of the funds from a new \$300 million five-year, unsecured term loan, which closed on April 5, 2011. Further information on the term loan is included in Note 9.

Preliminary Purchase Price Allocation

Pursuant to our business combinations accounting policy, the total preliminary purchase price for Aster Data was allocated to the net tangible and intangible assets based upon their preliminary fair values as of April 5, 2011 as set forth below. The excess of the preliminary purchase price over the preliminary net tangible and intangible assets was recorded as goodwill, which represents synergies of combining the businesses. The preliminary allocation of the purchase price was based upon a preliminary valuation and certain of our estimates and assumptions are subject to

Table of Contents

change within the measurement period (up to one year from the acquisition date). The primary areas of the purchase price allocation that are not yet finalized relate to the fair values of certain intangible assets, deferred taxes, tax contingencies and residual goodwill. It is expected that none of the goodwill will be deductible for tax purposes. We expect to continue to obtain information to assist us in determining the fair value related to certain of the net assets acquired at the acquisition date during the measurement period.

Our preliminary purchase price allocation for Aster Data is as follows:

In millions	
Cash and cash equivalents	\$ 14
Goodwill	199
Intangible assets	82
Other assets	3
Deferred revenue	(3)
Total preliminary purchase price	<u>\$295</u>

The difference between the total preliminary purchase price and the cash consideration paid represents the fair value of the Company's previous equity investment in Aster Data.

Preliminary Valuations of Intangible Assets Acquired

The following table sets forth the components of intangible assets acquired in connection with the Aster Data acquisition:

Dollars in millions	Preliminary	Weighted Average
	Fair Value	Useful Life
Customer relationships	\$ 3	4 years
Developed technology	67	5 years
In-process research and development	8	5 years
Trademarks/trade names	3	5 years
Non-compete agreements	1	2 years
Total intangible assets	<u>\$ 82</u>	5 years

Unaudited Supplemental Financial Information

The following table presents the unaudited amounts of Aprimo and Aster Data revenue and income included in Teradata's condensed consolidated results of operations for the six months ended June 30, 2011 (from their respective dates of acquisition), as well as pro forma results of Teradata (including Aprimo and Aster Data) for the six month periods ended June 30, 2011 and June 30, 2010, had both acquisitions been completed on January 1, 2010. The unaudited pro forma financial information is presented for informational purposes only and is not indicative of the results of operations that would have been achieved if the acquisitions had taken place at the beginning of fiscal 2010.

In addition to items already referenced above, the actual impact of results from Aprimo and Aster Data for the six months ended June 30, 2011 included:

- a \$14 million reduction in the recognition of deferred revenue and a \$2 million reduction in the recognition of associated cost of revenue for which there was no further performance obligation, and
- a \$10 million increase in amortization of intangible assets as a result of purchase price allocations.

Table of Contents

The unaudited pro forma results for the six months ended June 30, 2011 include:

- \$5 million in additional amortization charges for acquired intangible assets,
- \$12 million in additional revenue assuming that the majority of the required acquisition accounting-related revenue eliminations had taken place in the prior-year period, and
- \$9 million in eliminated transaction and integration expenses as if certain of those costs had been recognized in the prior-year period, and
- \$1 million in interest expense for acquisition-related borrowings.

The unaudited pro forma results for the six months ended June 30, 2010 include:

- \$16 million in additional amortization charges for acquired intangible assets,
- \$14 million in elimination of deferred revenue recognition and \$2 million in associated elimination of deferred cost of revenue for which there was no further performance obligation,
- \$16 million in transaction and integration expenses associated with the acquisition, and
- \$3 million in interest expense for acquisition-related borrowings.

Certain of these adjustments reflect preliminary estimates.

In millions	Revenue	Net Income
Actual impact of Aprimo and Aster Data results for six months ended June 30, 2011	\$ 28	(\$ 7)
Pro forma condensed combined results for six months ended June 30, 2011	\$1,107	\$ 162
Pro forma condensed combined results for six months ended June 30, 2010	\$ 935	\$ 117

Other Activity

On May 24, 2011, the Company completed the sale of an equity investment in Pliant Technology, Inc. The Company received proceeds of \$30 million and recognized a net gain of \$17 million on the transaction. The gain was recorded in other income and (expense) in the Condensed Consolidated Statement of Income (Unaudited).

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A")

You should read the following discussion in conjunction with the Condensed Consolidated Financial Statements and the notes to those statements included elsewhere in this Quarterly Report on Form 10-Q. This Quarterly Report on Form 10-Q contains certain statements that are forward-looking within the meaning of the Private Securities Litigation Reform Act of 1995. Certain statements contained in the MD&A are forward-looking statements that involve risks and uncertainties. The forward-looking statements are not historical facts, but rather are based on current expectations, estimates, assumptions and projections about our industry, business and future financial results. Our actual results could differ materially from the results contemplated by these forward-looking statements due to a number of factors, including those discussed in other sections of this Quarterly Report on Form 10-Q and in the 2010 Annual Report on Form 10-K.

Second Quarter Financial Overview

As more fully discussed in later sections of this MD&A, the following were significant financial items for the second quarter of 2011:

- Total revenue was \$581 million for the second quarter of 2011, up 24% from the second quarter of 2010, with double-digit growth in each of Teradata's three operating regions.

Table of Contents

- Gross margin decreased to 54.4% in the second quarter of 2011 from 57.0% in the second quarter of 2010, driven primarily by lower product margins and the impact of a greater percentage of consulting services revenue (which typically carries a lower margin). Gross margins for the second quarter of 2011 also included approximately \$6 million of amortization of acquired intangible assets, and \$6 million in acquisition-related purchase accounting adjustments for deferred revenue balances of Aprimo, Inc. (“Aprimo”) and Aster Data System, Inc (“Aster Data”) at the time of their respective acquisitions for which there was no further performance requirement.
- Operating income was \$110 million in the second quarter of 2011, compared to \$106 million in the second quarter of 2010, driven by revenue growth, and offset in part by higher Selling, General and Administrative (“SG&A”) expenses, which reflected the impact of our strategic initiative to add sales headcount, acquisition-related transactions and the impact of added headcount and infrastructure brought on by the acquisitions of Aprimo and Aster Data. Operating income for the second quarter of 2011 also included approximately \$10 million for acquisition-related transaction, integration and reorganization expenses, \$6 million for acquisition-related purchase accounting adjustments, and \$9 million for amortization of acquired intangible assets.
- Net income of \$103 million in the second quarter of 2011 increased 39% from \$74 million in the second quarter of 2010, as increased revenue was offset in part by higher SG&A expenses, as compared to the prior year. Net income for the second quarter of 2011 also includes the impact of approximately \$17 million in after-tax acquisition-related purchase accounting adjustments, transaction, integration and reorganization expenses, and amortization of acquired intangible assets, which were more than offset by a \$22 million after-tax gain on the Company’s equity investments, due to purchase and sale transactions which were completed during the second quarter.

Strategic Overview

Teradata is a leader in helping companies manage and analyze growing data volumes and complexity to gain business insight and competitive advantage. Teradata’s efforts are primarily focused on data warehousing, data analytics, and marketing and business applications. We have four key initiatives underway to broaden our position in the market and take advantage of this opportunity. These initiatives are to:

- Invest to extend Teradata’s core technology and software application offerings, and expand our family of compatible data warehouse platforms to address multiple market segments and solution offerings through internal development and targeted strategic acquisitions such as Aprimo and Aster Data,
- Differentiate Teradata technology and drive platform demand by delivering services that enable customers to achieve best-in-class analytics,
- Invest in partnerships to increase the number of solutions available on Teradata platforms, maximize customer value and increase our market coverage, and
- Continue to seek opportunities to increase our market coverage through additional sales territories (hiring incremental sales account executives as well as technology and industry consultants).

Future Trends

We believe that demand for our solutions will continue to increase due to the continued increase in data volumes and types of data, the scale and complexity of business requirements, and the growing use of new data elements and more near real-time analytics over time. The adoption by customers of more near real-time analysis for enterprise intelligence is driving more applications, usage and capacity.

Table of Contents

As a portion of the Company's operations and revenue occur outside the United States, and in currencies other than the U.S. dollar, the Company is exposed to fluctuations in foreign currency exchange rates. In 2011, Teradata expects approximately four percentage points of benefit from currency translation on its reported revenue and a corresponding currency impact on operating income, based on currency rates as of July 29, 2011.

The United States and other international economies, significant to Teradata's sales efforts, experienced severe economic recessions in recent years, which had an adverse impact on IT budgets and capital spending trends, and contributed to lengthened sales cycles for acquiring Teradata products and services. While there have been positive signs of economic recovery in 2010 and the first half of 2011, particularly with respect to information technology spending, the scope and stability of such recovery is not assured. Even in a strong economic environment, the size, timing and contracted terms of large customer orders for our products and services can impact, both positively and negatively, our operating results.

While macroeconomic challenges and fluctuations in the IT environment do occur, our long-term outlook remains positive. We did not experience significant changes in the first half of 2011 due to competitive and/or pricing trends for our EDW or appliance solutions, although there is always a risk that competitive and/or pricing pressure for our solutions could occur in the future. Additionally, as companies look to reduce ongoing operating expenses, customers may choose to go to lower maintenance service level agreements which could lead to revenue and margin pressure on our maintenance services business. We continue to be committed to new product development and achieving a responsive yield from our research and development spending and resources, which are intended to drive future demand. We also continue to evaluate opportunities to increase our market coverage and are committed to continuing to increase our number of sales territories, as well as consulting services resources, among other things, to drive future revenue growth. Given the length of sales cycles in the data warehouse market, new sales account territories typically take 18 to 24 months, on average, to become fully productive.

Results of Operations for the Three Months Ended June 30, 2011

Compared to the Three Months Ended June 30, 2010

In millions	2011	% of Revenue	2010	% of Revenue
Product revenue	\$269	46.3%	\$223	47.4%
Service revenue	312	53.7%	247	52.6%
Total revenue	581	100%	470	100%
Gross margin				
Product gross margin	176	65.4%	152	68.2%
Service gross margin	140	44.9%	116	47.0%
Total gross margin	316	54.4%	268	57.0%
Operating expenses				
Selling, general and administrative expenses	165	28.4%	126	26.8%
Research and development expenses	41	7.1%	36	7.7%
Total operating expenses	206	35.5%	162	34.5%
Operating income	\$110	18.9%	\$106	22.6%

Revenue

Teradata revenue increased 24% in the second quarter of 2011 compared to the second quarter of 2010. The revenue increase included 6% of benefit from foreign currency fluctuations. Product revenue increased 21% in the second quarter of 2011 from the prior-year period, with double-digit growth in each of Teradata's three operating regions. Service revenue in the second quarter of 2011 increased 26% from the prior-year period, with an underlying 34% increase in consulting services revenue, and 17% increase in maintenance services revenue, as compared to the prior-year period. Aprimo and Aster Data revenues, after taking into account \$8 million in required purchase

Table of Contents

accounting reductions in the recognition of deferred revenue, accounted for approximately 3% of the revenue increase in second quarter 2011 as compared to the second quarter of 2010.

Gross Margin

Gross margin for the second quarter of 2011 was 54.4% compared to 57.0% in the second quarter of 2010. Product gross margin decreased to 65.4% in the second quarter of 2011, compared to 68.2% in the prior-year period. The lower product margins were driven by deal mix in the North America and Latin America (“Americas”) region and the Asia Pacific and Japan (“APJ”) region as compared to the second quarter of 2010, \$6 million in additional amortization costs of acquired intangible assets, \$5 million in acquisition-related purchase accounting adjustments for deferred revenue balances of Aprimo and Aster Data at the time of the acquisition for which there was no further performance requirement, as well as \$3 million in additional amortization of capitalized internal software development costs. This impact was offset in part by favorable currency fluctuations. The term “deal mix” refers to the revenue mix of our product sales consummated in a particular period, including both software versus hardware content and mix, and amount and mix of third-party products re-sold. Service gross margin decreased to 44.9% in the second quarter of 2011 compared to 47.0% in the prior-year period. The lower service margins were driven primarily by the greater proportion of consulting revenue, as compared to maintenance revenue (which typically carries a higher margin).

Operating Expenses

Total operating expenses, characterized as SG&A and Research and Development (“R&D”) expenses, were \$206 million in the second quarter of 2011 compared to \$162 million in the second quarter of 2010. The \$39 million increase in SG&A expenses was largely driven by higher selling expense, due primarily to our strategic initiative to add sales headcount, as well as increased revenue-driven costs for sales commissions. SG&A expenses were also impacted by transaction, integration and reorganization expenses, as well as amortization of intangible assets associated with the acquisition of Aprimo and Aster Data, which totaled \$10 million in the second quarter of 2011, in addition to the impact of added headcount and infrastructure brought on by the Aprimo and Aster Data acquisitions. The \$5 million increase in R&D expenses was driven by higher engineering headcount expenses, including new engineering headcount from the Aprimo and Aster Data acquisitions, as well as \$2 million in acquisition-related transaction and integration expenses. This increase was offset in part by \$7 million more in capitalization of software development cost as compared to the prior-year period.

Revenue and Gross Margin by Operating Segment

As described in Note 11 of Notes to Condensed Consolidated Financial Statements (Unaudited), Teradata manages its business in three geographic regions, which are also the Company’s operating segments: (1) the Americas region; (2) the Europe, Middle East and Africa (“EMEA”) region; and (3) the Asia Pacific and Japan (“APJ”) region. Teradata believes this format is useful to investors because it allows analysis and comparability of operating trends by operating segment. It also includes the same information that is used by Teradata management to make decisions regarding the segments and to assess our financial performance. The discussion of our segment results describes the changes in results as compared to the prior-year period.

Table of Contents

The following table presents revenue and operating performance by segment for the three months ended June 30:

In millions	2011	% of Revenue	2010	% of Revenue
Revenue				
Americas	\$339	58%	\$281	60%
EMEA	145	25%	108	23%
APJ	97	17%	81	17%
Total revenue	<u>581</u>	<u>100%</u>	<u>470</u>	<u>100%</u>
Gross margin				
Americas	194	57.2%	171	60.9%
EMEA	76	52.4%	57	52.8%
APJ	46	47.4%	40	49.4%
Total gross margin	<u>\$316</u>	54.4%	<u>\$268</u>	57.0%

Americas: Revenue increased 21% in the second quarter of 2011 from the second quarter of 2010, led by a 40% increase in consulting revenue. The revenue increase included 1% of benefit from foreign currency fluctuations. Gross margins decreased to 57.2% for the second quarter of 2011, from 60.9% in the second quarter of 2010, driven primarily by the impact of a greater proportion of consulting services revenue (which typically has a lower margin), as well as lower product margins due to deal mix and increased amortization of capitalized software development cost and acquired intangible assets, compared to the prior-year period.

EMEA: Revenue increased 34% in the second quarter of 2011 from the second quarter of 2010, led by a 47% increase in consulting revenue. The revenue increase included 14% of benefit from foreign currency fluctuations. Gross margins decreased somewhat to 52.4% for the second quarter of 2011, from 52.8% in the second quarter of 2010, driven primarily by the greater proportion of consulting services revenue, as compared to the second quarter of 2010.

APJ: Revenue increased 20% in the second quarter of 2011 from the second quarter of 2010, led by a 47% increase in product revenue. The revenue increase included 12% of benefit from foreign currency fluctuations. Gross margin decreased to 47.4% in the second quarter of 2011, from 49.4% in the second quarter of 2010. The gross margin decline was driven primarily by lower services margins, offset in part by the greater proportion of product revenue (as compared to services revenue), compared to the prior-year period.

Other Income (Expense)

The Company recognized \$27 million of other income in the second quarter of 2011, with zero other income recognized in the second quarter of 2010. The increase in other income in the current-year period was driven by \$28 million in gains on equity investments. As part of the required accounting for the acquisition of Aster Data on April 5, 2011, Teradata's existing 11.2% equity investment in Aster Data was valued at \$36 million, triggering the recognition of an \$11 million gain. Additionally, on May 24, 2011, the Company completed the sale of an equity investment in Pliant Technology, Inc. The Company received proceeds of \$30 million and recognized a net gain of \$17 million on the transaction.

Provision for Income Taxes

Income tax provisions for interim periods are based on estimated annual income tax rates, adjusted to reflect the effects of any significant infrequent or unusual items which are required to be discretely recognized within the current interim period. The Company's intention is to permanently reinvest its foreign earnings outside of the United States. As a result, the effective tax rates in the periods presented are largely based upon the forecasted pre-tax earnings mix between the United States and other foreign taxing jurisdictions where the Company conducts its business. The Company estimates its full-year forecasted global effective tax rate for the year ended December 31, 2011 to be approximately 26% to 27%. This estimate is based on the forecasted overseas profits being taxed at an overall effective tax rate of approximately 12.5%, as compared to the statutory tax rate of 35% in the United States.

Table of Contents

The effective tax rate in the second quarter of 2011 was 25% compared to 30% in the second quarter of 2010. The decrease in the effective tax rate for the three months ended June 30, 2011 was driven primarily by a \$4 million tax benefit related to the book gain recorded on the Company's previous equity investment in Aster Data, which was reflected as a permanent non-taxable item, and a lower mix of U.S.-based earnings as compared to the percentage of pre-tax income generated internationally. There were no material discrete tax items reflected in the effective tax rate for the three months ended June 30, 2010.

Results of Operations for the Six Months Ended June 30, 2011

Compared to the Six Months Ended June 30, 2010

In millions	2011	% of Revenue	2010	% of Revenue
Product revenue	\$ 504	46.4%	\$423	47.1%
Service revenue	583	53.6%	476	52.9%
Total revenue	1,087	100%	899	100%
Gross margin				
Product gross margin	332	65.9%	280	66.2%
Service gross margin	259	44.4%	224	47.1%
Total gross margin	591	54.4%	504	56.1%
Operating expenses				
Selling, general and administrative expenses	315	29.0%	244	27.1%
Research and development expenses	75	6.9%	68	7.6%
Total operating expenses	390	35.9%	312	34.7%
Operating income	\$ 201	18.5%	\$192	21.4%

Revenue

Teradata revenue increased 21% in the first six months of 2011 compared to the first six months of 2010. The revenue increase included 4% of benefit from foreign currency fluctuations. Product revenue increased 19% in the first six months of 2011 from the prior-year period, with double-digit growth in each of Teradata's three operating regions. Service revenue in the first six months of 2011 increased 22% from the prior-year period, with an underlying 29% increase in consulting services revenue, and 15% increase in maintenance services revenue, as compared to the prior-year period. Aprimo and Aster Data revenues, after taking into account \$14 million required purchase accounting reductions in the recognition of deferred revenue, accounted for less than 3% of the revenue increase in first half of 2011 as compared to the first half of 2010.

Gross Margin

Gross margin for the first six months of 2011 was 54.4% compared to 56.1% in the first six months of 2010. Product gross margin increased to 65.9% in the first half of 2011, compared to 66.2% in the prior-year period. Positive deal mix and benefit from foreign currency fluctuations did not fully offset \$11 million in acquisition-related purchase accounting adjustments for deferred revenue of Aprimo and Aster Data at the time of their respective acquisitions for which there was no further performance requirement, \$7 million in additional amortization costs of acquired intangible assets, and \$6 million in additional amortization of capitalized internal software development costs. Service gross margin decreased to 44.4% in the first half of 2011 compared to 47.1% in the prior-year period. The lower service margins were driven by the consulting services business, primarily due to expanding its headcount in response to growing and driving new business opportunities, as well as a greater proportion of consulting revenue, as compared to maintenance revenue. Incremental headcount can initially have a negative impact on margins, particularly while the employees are being trained and are not yet fully productive. Service gross margins for the

Table of Contents

first six months of 2011 also included \$3 million in acquisition-related purchase accounting adjustments, transaction, integration and reorganization costs.

Operating Expenses

Total operating expenses, characterized as SG&A and R&D expenses, were \$390 million in the first six months of 2011 compared to \$312 million in the first six months of 2010. The \$71 million increase in SG&A expenses was largely driven by higher selling expense, due primarily to our strategic initiative to add sales headcount, as well as increased revenue-driven costs for sales commissions and provisions for accounts receivable. SG&A expenses were also impacted by transaction, integration and reorganization expenses, as well as amortization of intangible assets associated with the acquisitions of Aprimo and Aster Data, which totaled \$17 million in the first half of 2011, in addition to the impact of added headcount and infrastructure brought on by the Aprimo and Aster Data acquisitions. The \$7 million increase in R&D expenses was driven by higher engineering headcount expenses, including new engineering headcount from the Aprimo and Aster Data acquisitions. This increase was offset in part by \$11 million more in capitalization of software development cost as compared to the prior-year period.

Revenue and Gross Margin by Operating Segment

As described in Note 11 of Notes to Condensed Consolidated Financial Statements (Unaudited), Teradata manages its business in three geographic regions, which are also the Company's operating segments: (1) the Americas region; (2) the EMEA region; and (3) the APJ region. Teradata believes this format is useful to investors because it allows analysis and comparability of operating trends by operating segment. It also includes the same information that is used by Teradata management to make decisions regarding the segments and to assess our financial performance. The discussion of our segment results describes the changes in results as compared to the prior-year period.

The following table presents revenue and operating performance by segment for the six months ended June 30:

In millions	2011	% of Revenue	2010	% of Revenue
Revenue				
Americas	\$ 646	59%	\$533	59%
EMEA	270	25%	214	24%
APJ	171	16%	152	17%
Total revenue	<u>1,087</u>	<u>100%</u>	<u>899</u>	<u>100%</u>
Gross margin				
Americas	369	57.1%	317	59.5%
EMEA	146	54.1%	114	53.3%
APJ	76	44.4%	73	48.0%
Total gross margin	<u>\$ 591</u>	54.4%	<u>\$504</u>	56.1%

Americas: Revenue increased 21% in the first half of 2011 from the first half of 2010, led by a 35% increase in consulting revenue. The revenue increase included 1% of benefit from foreign currency fluctuations. Gross margins decreased to 57.1% for the first half of 2011, from 59.5% in the first half of 2010, driven primarily by lower consulting margins due to recent headcount additions, as well as the greater proportion of consulting services revenue (as compared to product revenue), as compared to the prior-year period.

EMEA: Revenue increased 26% in the first six months of 2011 from the first six months of 2010, with comparable increases in both product and services revenue. The revenue increase included 8% of benefit from foreign currency fluctuations. Gross margins increased to 54.1% for the first six months of 2011, from 53.3% in the first six months of 2010, driven by improved product margins due to a favorable deal mix compared to the prior year, and benefit from currency translation.

APJ: Revenue increased 13% in the first half of 2011 from the first half of 2010, led by a 17% increase in product revenue. The revenue increase included 10% of benefit from foreign currency fluctuations. Gross margin decreased to 44.4% in the first half of 2011, from 48.0% in the first half of 2010. The gross margin decline was driven

Table of Contents

primarily by lower consulting margins, offset in part by the impact of a greater proportion of product revenue (as compared to services revenue), compared to the first six months of 2010.

Other Income (Expense)

The Company recognized \$26 million of other income in the six months ended June 30, 2011, with zero other income recognized in the six months ended June 30, 2010. The increase in other income in the current-year period was driven by \$28 million in gains on equity investments. As part of the required accounting for the acquisition of Aster Data on April 5, 2011, Teradata's existing 11.2% equity investment in Aster Data was valued at \$36 million, triggering the recognition of an \$11 million gain. Additionally, on May 24, 2011, the Company completed the sale of an equity investment in Pliant Technology, Inc. The Company received proceeds of \$30 million and recognized a net gain of \$17 million on the transaction.

Provision for Income Taxes

The effective tax rate in the first six months of 2011 was 26% compared to 27% in the first six months of 2010. The decrease in the effective tax rate for the six months ended June 30, 2011 was driven primarily by a \$4 million tax benefit reflected in the second quarter related to the book gain recorded on the Company's previous equity investment in Aster Data, which was reflected as a permanent non-taxable item, and a lower mix of U.S.-based earnings as compared to the percentage of pre-tax income generated internationally. The effective income tax rate for the six months ended June 30, 2010 was driven primarily by a discrete \$5 million tax benefit associated with the recognition of certain foreign net operating loss carryforwards resulting from an audit settlement in the first quarter of 2010.

Financial Condition, Liquidity and Capital Resources

Cash provided by operating activities increased by \$85 million in the first six months of 2011. In comparison to the prior-year period, the increase in cash provided by operating activities in the six months ended June 30, 2011 was principally due to a greater increase in deferred revenue and a smaller decrease in current payables and accrued expenses in the current-year period.

Teradata's management uses a non-GAAP measure called "free cash flow," which we define as net cash provided by operating activities less capital expenditures for property and equipment, and additions to capitalized software, as one measure of assessing the financial performance of the Company. Free cash flow does not have a uniform definition under GAAP; therefore, Teradata's definition of this measure may differ from the definition used by other companies. The components that are used to calculate free cash flow are GAAP measures taken directly from the Condensed Consolidated Statements of Cash Flows (Unaudited). We believe that free cash flow information is useful for investors because it relates the operating cash flow of the Company to the capital that is spent to continue and improve business operations. In particular, free cash flow indicates the amount of cash available after certain capital expenditures, for among other things, investments in the Company's existing businesses, strategic acquisitions and repurchase of Teradata common stock. Free cash flow does not represent the residual cash flow available for discretionary expenditures since there may be other non-discretionary expenditures that are not deducted from the measure. This non-GAAP measure should not be considered a substitute for, or superior to, cash flows from operating activities under GAAP.

Table of Contents

The table below shows net cash provided by operating activities and capital expenditures for the following periods:

In millions	Six Months Ended June 30,	
	2011	2010
Net cash provided by operating activities	\$ 285	\$ 200
Less:		
Expenditures for property and equipment	(22)	(17)
Additions to capitalized software	(38)	(27)
Free cash flow	<u>\$ 225</u>	<u>\$ 156</u>

Financing activities and certain other investing activities are not included in our calculation of free cash flow. Other investing activities in the first six months of 2011 primarily consisted of Teradata's acquisitions of Aprimo and Aster Data as discussed further below. Teradata's financing activities for the six months ended June 30, 2011 primarily consisted of \$300 million in proceeds from a new 5 year term loan, as discussed below, as well as repurchases of the Company's common stock. During the first six months of 2011, the Company purchased 0.7 million shares of its common stock at an average price per share of \$54.28 under share repurchase programs authorized by our Board of Directors in 2008. The first program (the "dilution offset program") authorizes the Company to purchase Teradata common stock to the extent of cash received from the exercise of stock options and the Teradata Employee Stock Purchase Plan ("ESPP") to offset dilution from shares issued pursuant to these plans. On May 4, 2009, the Company's Board of Directors authorized an additional \$300 million increase to the Company's second program (the "general share repurchase program"). As of June 30, 2011, the Company had \$155 million of authorization remaining on the \$300 million general share repurchase program to repurchase outstanding shares of Teradata common stock. Share repurchases made by the Company are reported on a trade date basis. Our share repurchase activity depends on factors such as our working capital needs, our cash requirements for capital investments, our stock price, and economic and market conditions. Proceeds from the ESPP and the exercise of stock options were \$16 million in the first six months of 2011 and \$12 million in the first six months of 2010. These proceeds are included in Other financing activities, net in the Condensed Consolidated Statement of Cash Flows (Unaudited).

Our total in cash and cash equivalents held outside the United States in various foreign subsidiaries was \$551 million as of June 30, 2011 and \$506 million as of December 31, 2010. The remaining balance held in the United States was \$131 million as of June 30, 2011 and \$377 million as of December 31, 2010. Under current tax laws and regulations, if cash and cash equivalents and short-term investments held outside the United States are distributed to the United States in the form of dividends or otherwise, we may be subject to additional U.S. income taxes (subject to an adjustment for foreign tax credits) and foreign withholding taxes. As of June 30, 2011, we have not provided for the U.S. federal tax liability on approximately \$665 million of foreign earnings that are considered permanently reinvested outside of the United States.

On January 21, 2011, Teradata completed the acquisition of Aprimo. The \$525 million purchase price of this all-cash acquisition was funded in part by using \$225 million of existing U.S. cash (offset by \$26 million of cash held by Aprimo at the time it was acquired), and in part by drawing-down the full \$300 million borrowing capacity from the Company's Credit Facility. The \$300 million in credit facility borrowings were repaid in full during the second quarter of 2011. As of June 30, 2011 the Company had no outstanding borrowings on the Credit Facility, and was in compliance with all covenants.

On April 5, 2011, Teradata completed the acquisition of Aster Data. The aggregate consideration payable by Teradata for all of the outstanding equity interests of Aster Data was \$259 million. The aggregate consideration payable excluded the value of Teradata's pre-existing 11.2% equity investment in Aster Data. Also on April 5, 2011, Teradata entered into a new \$300 million five-year, unsecured term loan, and used a portion of these funds to finance the Aster Data acquisition. The outstanding principal amount of the term loan agreement bears interest at a floating rate based upon a negotiated base rate or a Eurodollar rate plus in each case a margin based on the leverage

Table of Contents

ratio of the Company. As of June 30, 2011, the term loan principal outstanding was \$300 million, and carried an interest rate of 1.56%.

Management believes current cash and short-term investment resources, Company cash flows from operations and its \$300 million Credit Facility will be sufficient to satisfy future working capital, research and development activities, capital expenditures, pension contributions, and other financing requirements for at least the next twelve months. The Company principally holds its cash, cash equivalents and short-term investments in bank deposits and highly-rated money market funds.

The Company's ability to generate positive cash flows from operations is dependent on general economic conditions, competitive pressures, and other business and risk factors described in the Company's 2010 Annual Report on Form 10-K (the "2010 Annual Report"), and elsewhere in this Quarterly Report. If the Company is unable to generate sufficient cash flows from operations, or otherwise to comply with the terms of the credit facility and term loan agreement, the Company may be required to seek additional financing alternatives.

Contractual and Other Commercial Commitments. There has been no significant change in our contractual and other commercial commitments as described in the 2010 Annual Report. Our guarantees and product warranties are discussed in Note 7 of Notes to Condensed Consolidated Financial Statements (Unaudited).

Critical Accounting Policies and Estimates

Our financial statements are prepared in accordance with GAAP. In connection with the preparation of these financial statements, we are required to make assumptions, estimates and judgments that affect the reported amounts of assets, liabilities, revenues, expenses and the related disclosure of contingent liabilities. These assumptions, estimates and judgments are based on historical experience and assumptions that are believed to be reasonable at the time. However, because future events and their effects cannot be determined with certainty, the determination of estimates requires the exercise of judgment. Our critical accounting policies are those that require assumptions to be made about matters that are highly uncertain. Different estimates could have a material impact on our financial results. Judgments and uncertainties affecting the application of these policies and estimates may result in materially different amounts being reported under different conditions or circumstances. Our management periodically reviews these estimates and assumptions to ensure that our financial statements are presented fairly and are materially correct.

In many cases, the accounting treatment of a particular transaction is specifically dictated by GAAP and does not require significant management judgment in its application. There are also areas in which management's judgment in selecting among available alternatives would not produce a materially different result. The significant accounting policies and estimates that we believe are the most critical to aid in fully understanding and evaluating our reported financial results are discussed in the 2010 Annual Report. Teradata's senior management has reviewed these critical accounting policies and related disclosures and determined that with the exception of the revenue recognition policy, as discussed below, there were no significant changes in our critical accounting policies in the six months ended June 30, 2011. Also, there were no significant changes in our estimates associated with those policies.

Revenue Recognition

Teradata's solution offerings typically include software, software subscriptions (unspecified when-and-if-available upgrades), hardware, maintenance support services, and other consulting, implementation and installation-related ("consulting") services. Teradata records revenue when it is realized, or realizable, and earned. Teradata considers these requirements met when:

- Persuasive evidence of an arrangement exists
- The products or services have been delivered to the customer
- The sales price is fixed or determinable and free of contingencies or significant uncertainties
- Collectibility is reasonably assured

Table of Contents

Teradata reports revenue net of any taxes assessed by governmental authorities that are imposed on and concurrent with specific revenue-producing transactions. The Company assesses whether fees are fixed or determinable at the time of sale. Standard payment terms may vary based on the country in which the agreement is executed, but are generally between 30 and 90 days. Payments that are due within six months are generally deemed to be fixed or determinable based on a successful collection history on such arrangements, and thereby satisfy the required criteria for revenue recognition. Teradata delivers its solutions primarily through direct sales channels, as well as through alliances with system integrators, other independent software vendors and distributors, and value-added resellers (collectively referred to as “resellers”). In assessing whether the sales price to a reseller is fixed or determinable, the Company considers, among other things, past business practices with the reseller, the reseller’s operating history, payment terms, return rights and the financial wherewithal of the reseller. When Teradata determines that the contract fee to a reseller is not fixed or determinable, that transaction is deferred and recognized upon sell-through to the end customer.

The Company’s deliverables often involve delivery or performance at different periods of time. Revenue for software is generally recognized upon delivery with the hardware once title and risk of loss have been transferred. Revenue for software subscriptions, which provide for unspecified upgrades or enhancements on a when-and-if-available basis, is recognized straight-line over the term of the subscription arrangement. Revenue for maintenance support services is also recognized on a straight-line basis over the term of the contract. Revenue for other consulting, implementation and installation services is recognized as services are provided. In certain instances, acceptance of the product or service is specified by the customer. In such cases, revenue is deferred until the acceptance criteria have been met. Delivery and acceptance generally occur in the same reporting period. The Company’s arrangements generally do not include any customer negotiated provisions for cancellation, termination or refunds that would significantly impact recognized revenue.

In October 2009, the Financial Accounting Standards Board (“FASB”) amended the accounting standards for revenue recognition to remove tangible products containing software components and non-software components that function together to deliver the product’s essential functionality from the scope of the industry-specific software revenue recognition guidance. In October 2009, the FASB also amended the accounting standards for multiple deliverable revenue arrangements to:

- Provide updated guidance on whether multiple deliverables exist, how the deliverables in an arrangement should be separated, and how the consideration should be allocated;
- Require an entity to allocate revenue in an arrangement using its best estimate of selling prices (“BESP”) for deliverables if a vendor does not have vendor-specific objective evidence of selling price (“VSOE”) or third-party evidence of selling price (“TPE”); and
- Eliminate the use of the residual method and require an entity to allocate revenue using the relative selling price method.

The standard is effective prospectively for revenue arrangements entered into or materially modified in fiscal years beginning on or after June 15, 2010. Teradata adopted these standards on a prospective basis as of the beginning of fiscal 2011 for new and materially modified arrangements originating on or after January 1, 2011.

The Company evaluates all deliverables in an arrangement to determine whether they represent separate units of accounting. A deliverable constitutes a separate unit of accounting when it has standalone value, and if the contract includes a general right of return relative to the delivered item, delivery or performance of the undelivered items is considered probable and substantially in the control of Teradata. This guidance does not generally change the units of accounting for the Company’s revenue transactions. Most of the Company’s products and services qualify as separate units of accounting and are recognized upon meeting the criteria as described above.

For multiple deliverable arrangements that contain non-software related deliverables, the Company allocates revenue to each deliverable based upon the relative selling price hierarchy and if software and software-related deliverables are also included in the arrangement, to those deliverables as a group based on the BESP for the group. The selling price for a deliverable is based on its VSOE if available, TPE if VSOE is not available, or BESP if neither VSOE nor TPE is available. The Company then recognizes revenue when the revenue recognition criteria are met for each

Table of Contents

deliverable. For the software group or arrangements that contain only software and software-related deliverables, the revenue recognition criteria remain unchanged as further described below.

Teradata's data warehousing software and hardware products are sold and delivered together in the form of a "Node" of capacity as an integrated technology solution. Because both the database software and hardware platform are necessary to deliver the data warehouse's essential functionality, the database software and hardware (Node) are excluded from the software rules and considered a non-software related deliverable. Teradata software applications and related support are considered software-related deliverables. Additionally, the amount of revenue allocated to the delivered items utilizing the relative selling price method is limited to the amount that is not contingent upon the delivery of additional items or meeting other specified performance conditions (the non-contingent amount).

VSOE is based upon the normal pricing and discounting practices for those products and services when sold separately. Teradata uses the stated renewal rate approach in establishing VSOE for maintenance and subscriptions (collectively referred to as postcontract customer support "PCS"). Under this approach, the Company assesses whether the contractually stated renewal rates are substantive and consistent with the Company's normal pricing practices. Renewal rates greater than the lower level of our targeted pricing ranges are considered to be substantive and, therefore, meet the requirements to support VSOE. In instances where there is not a substantive renewal rate in the arrangement, the Company allocates revenue based upon BESP, using the minimum established pricing targets as supported by the renewal rates for similar customers utilizing the bell-curve method. Teradata also offers consulting and installation-related services to its customers, which are considered non-software deliverables if they relate to the nodes. These services are rarely considered essential to the functionality of the enterprise data warehouse ("EDW") solution deliverable and there is never software customization of the proprietary database software. VSOE for consulting services is based on the hourly rates for standalone consulting services projects by geographic region and are indicative of the Company's customary pricing practices. Pricing in each market is structured to obtain a reasonable margin based on input costs.

In nearly all multiple-deliverable arrangements, the Company is unable to establish VSOE for all deliverables in the arrangement. This is due to infrequently selling each deliverable separately (such is the case with our nodes), not pricing products or services within a narrow range, or only having limited sales history. When VSOE cannot be established, attempts are made to establish TPE of the selling price for each deliverable. TPE is determined based on competitor prices for similar deliverables when sold separately. However, Teradata's offerings contain significant differentiation such that the comparable pricing of products with similar functionality cannot be obtained. This is because Teradata's products contain a significant amount of proprietary technology and its solutions offer substantially different features and functionality than other available products. As Teradata's products are significantly different from those of its competitors, the Company is unable to establish TPE for the vast majority of its products.

When the Company is unable to establish selling price using VSOE or TPE, the Company uses BESP in its allocation of arrangement consideration. The objective of BESP is to determine the price at which the Company would transact a sale if the product or service was sold on a standalone basis. The Company determines BESP for a product or service by considering multiple factors including, but not limited to, geographies, market conditions, competitive landscape, internal costs, gross margin objectives, purchase volumes and pricing practices.

The Company reviews VSOE, TPE and its determination of BESP on a periodic basis and updates it, when appropriate, to ensure that the practices employed reflect the Company's recent pricing experience. The Company maintains internal controls over the establishment and updates of these estimates, which includes review and approval by the Company's management. For the six months ended June 30, 2011 there was no material impact to revenue resulting from changes in VSOE, TPE or BESP, nor does the Company expect a material impact from such changes in the near term.

The adoption of the amended revenue recognition guidelines did not have a material impact on the Company's results of operations or financial condition. The Company is not able to reasonably estimate the effect of adopting these standards on future financial periods as the impact will vary based on the nature and volume of new or materially modified deals in any given period. However, in terms of the timing and pattern of revenue recognition,

Table of Contents

the new accounting guidance for revenue recognition is not expected to have a significant effect on total revenue in periods after the initial adoption.

Revenue recognition for complex contractual arrangements requires a greater degree of judgment, including a review of specific contracts, past experience, creditworthiness of customers, international laws and other factors. We must also apply judgment in determining all deliverables of the arrangement, and in determining the relative selling price of each deliverable, considering the price charged for each product when sold on a standalone basis, and applicable renewal rates for services. Changes in judgments about these factors could impact the timing and amount of revenue recognized between periods.

Accounting for arrangements prior to January 1, 2011. For transactions entered into prior to January 1, 2011, the Company allocates revenue for multiple deliverable arrangements for which VSOE exists for undelivered elements but not for the delivered elements, using the “residual method”. Teradata does not typically have VSOE for its hardware and software products. Therefore, in a substantial majority of Teradata arrangements entered into prior to January 1, 2011, the residual method is used to allocate the arrangement consideration. Under the residual method, the VSOE of the undelivered elements is deferred and accounted for under the applicable revenue recognition guidance, and the remaining portion of the arrangement fee is allocated to the delivered elements and is recognized as revenue. For arrangements in which VSOE does not exist for each undelivered element, revenue for the entire arrangement is deferred and not recognized until delivery of all the elements without VSOE has occurred, unless the only undelivered element is PCS in which case the entire contract is recognized ratably over the PCS period.

Contract accounting. If an arrangement involves significant production, modification or customization of the application software or the undelivered services are essential to the functionality of the delivered software then the Company uses the percentage-of-completion or completed-contract method of accounting. The percentage-of-completion method is used when estimates of costs to complete and extent of progress toward completion are reasonably dependable. The Company typically uses labor hours or costs incurred to date as a percentage of the total estimated labor hours or costs to fulfill the contract as the most reliable and meaningful measure that is available for determining a project’s progress toward completion. In circumstances when reasonable and reliable cost estimates for a project cannot be made, the completed-contract method is used whereas no revenue is recognized until the project is complete. When total cost estimates exceed revenues, the Company accrues the estimated losses immediately. For purposes of allocation of the arrangement consideration, any products for which the services are not essential are separated utilizing the relative selling price method discussed above. PCS is also separated and allocated based on VSOE and then recognized ratably over the term. The remaining contract value, which typically include application software and essential services, is then recognized utilizing the percentage-of-completion method or completed-contract methods discussed above.

Term licenses, hosting arrangements and software-as-a-service (“SaaS”). As a result of the Company’s acquisition of Aprimo, Inc. (“Aprimo”) on January 21, 2011 (See Note 12), Teradata’s application offerings will be expanded to include, term licenses, hosting arrangements and SaaS. Teradata previously offered its software applications primarily through a perpetual licensing arrangement. In cases where the contract requires the software to be hosted by the Company and provided via an on-demand arrangement, the software is considered a subscription. If the license is of limited life and does not require the Company to host the software for the customer, the software is considered a term license. In both types of these arrangements, revenues are recognized over the term of the agreement. For hosting arrangements where customers have the right to take possession of the Company’s software at any time during the hosting period, the customer’s rights to the software in these circumstances are not dependent on additional software payments or significant penalties.

New Accounting Pronouncements

See discussion in Note 2 of Notes to Condensed Consolidated Financial Statements (Unaudited) for new accounting pronouncements.

Table of Contents

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

There have not been any material changes to the market risk factors previously disclosed in Part II, Item 7A of the Company's 2010 Annual Report on Form 10-K.

Item 4. Controls and Procedures.

Evaluation of Disclosure Controls and Procedures

Teradata maintains a system of disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934 (the "Exchange Act")) that are designed to provide reasonable assurance that information required to be disclosed in its reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to management, including, as appropriate, the Chief Executive Officer and the Chief Financial Officer, to allow timely decisions regarding required disclosures. In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives.

Based on their evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures were effective to provide reasonable assurance as of June 30, 2011.

Changes in Internal Control over Financial Reporting

There have been no changes in our internal control over financial reporting that occurred during the last fiscal quarter ended June 30, 2011 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Part II—OTHER INFORMATION

Item 1. Legal Proceedings.

The information required by this item is included in the material under Note 7 of Notes to Condensed Consolidated Financial Statements (Unaudited) of this Quarterly Report on Form 10-Q and is incorporated herein by reference.

Item 1A. Risk Factors.

There have not been any material changes to the risk factors previously disclosed in Part I, Item 1A of the Company's 2010 Annual Report on Form 10-K.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

Purchase of Company Common Stock

During the second quarter of 2011, the Company executed purchases for approximately 0.7 million shares of its common stock at an average price per share of \$54.28 under the two share repurchase programs authorized by our Board of Directors in 2008. The first program (the "dilution offset program") authorizes the Company to purchase Teradata common stock to the extent of cash received from the exercise of stock options and the Teradata Employee Stock Purchase Plan ("ESPP") to offset dilution from shares issued pursuant to these plans. On May 4, 2009, the Company's Board of Directors authorized an additional \$300 million increase to the Company's second program (the "general share repurchase program"). As of June 30, 2011, the Company had \$155 million of authorization remaining on the \$300 million general share repurchase program to repurchase outstanding shares of Teradata common stock.

Table of Contents

Section 16 officers occasionally sell vested shares of restricted stock to the Company at the current market price to cover their withholding taxes. For the six months ended June 30, 2011, the total of these purchases was 56,609 shares at an average price of \$48.29 per share.

The following table provides information relating to the Company's share repurchase programs for the six months ended June 30, 2011:

Month	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Dilution Offset Program	Total Number of Shares Purchased as Part of Publicly Announced General Share Repurchase Program	Maximum Dollar Value that May Yet Be Purchased Under the Dilution Offset Program	Maximum Dollar Value that May Yet Be Purchased Under the General Share Repurchase Program
First Quarter Total	<u>—</u>	<u>N/A</u>	<u>—</u>	<u>—</u>	<u>\$27,026,721</u>	<u>\$160,604,657</u>

**SECOND AMENDMENT TO
TERADATA CORPORATION EMPLOYEE STOCK PURCHASE PLAN
(Amended and Restated as of August 1, 2008)**

This Second Amendment to the Teradata Corporation Employee Stock Purchase Plan (the “ESPP”) by Teradata Corporation (the “Company”) is effective as of April 1, 2011 (the “Effective Date”).

WHEREAS, the ESPP was originally adopted by the Company effective October 1, 2007, and as amended and restated effective as of August 1, 2008, for the benefit of eligible employees;

WHEREAS, pursuant to Section 19 of the ESPP, the Company’s Board of Directors (the “Board”) may amend the ESPP at any time;

WHEREAS, the Company desires to amend the ESPP to (i) clarify that separate Offerings (as defined under the ESPP) with different terms may be established from time to time under the ESPP and further that Offerings may be established under the ESPP that are not intended to comply with Section 423 of the Code for certain Designated Subsidiaries (as defined in the ESPP) located outside of the United States and (ii) to make certain other clarifications regarding what is considered compensation for purposes of the ESPP;

WHEREAS, the Board has approved this Second Amendment to the ESPP;

NOW, THEREFORE, effective April 1, 2011, the ESPP is hereby amended as follows:

1. Section 1 of the ESPP is hereby amended by adding the following to the end of the second paragraph thereunder:

“Notwithstanding the forgoing, the Company may make Offerings under the Plan that are not intended to qualify under Section 423 of the Code to the extent deemed advisable for Designated Subsidiaries outside the United States (“Non-423 Component”). Furthermore, the Company may make separate Offerings under the Plan, each of which may have different terms, but each separate Offering will be intended to comply with the requirements of Section 423 of the Code.”

2. A new Section 2.3 is hereby inserted to the ESPP to provide as follows and each of the existing Sections 2.3 through 2.23 is renumbered to Sections 2.4 through 2.24, respectively:

“2.3 “Benefits Committee” means the Teradata Corporation Benefits Committee.”

3. The definition of “Eligible Employee” as set forth in Section 2.10 of the ESPP is hereby amended by adding the following to the end thereof:

“With respect to Offerings made under the Non-423 Component of the Plan, the definition of “Eligible Employee” may be further limited.”

4. With respect to any Offerings which begin after the Effective Date, Section 2.6 of the ESPP is hereby amended in its entirety to read as follows:

“2.6 “ Compensation ” means the total amount received by a Participant from the Company or a Subsidiary as salary, wages, bonus or other remuneration including (i) overseas premium pay, (ii) appropriate commission or other earnings by sales personnel, (iii) overtime pay, (iv) payments for cost-of-living increases, and (v) sick pay, but excluding retention and work completion bonuses and contributions of the Company or a Subsidiary to an employee benefit plan thereof.”

5. The ESPP is hereby amended by replacing each reference therein to either “Senior Vice President, Human Resources” or “Vice President, Human Resources” with a reference to the “Teradata Benefits Committee.”

6. Full Force and Effect. To the extent not expressly amended hereby, the ESPP shall remain in full force and effect.

IN WITNESS WHEREOF , the Company, by its duly authorized officer, has executed this Second Amendment to the Teradata Corporation Employee Stock Purchase Plan as of the day and year set forth above.

**TERADATA CORPORATION
DIRECTOR COMPENSATION PROGRAM**

Amended and Restated Effective April 26, 2011

PREAMBLE

This Teradata Corporation Director Compensation Program (“Program”) was adopted effective as of October 1, 2007 (the “Effective Date”).

The Program is intended to provide competitive remuneration to individuals serving as non-employee members of the Board of Directors of Teradata Corporation, and to align their interests with the interests of the company’s stockholders.

The Program was previously amended and restated effective as of April 28, 2008.

Effective as of April 26, 2011, the Program is amended and restated as set forth herein.

ARTICLE I

Definitions

- 1.1 Code means the Internal Revenue Code of 1986, as amended.
- 1.2 Committee means the Committee on Directors and Governance of the Board of Directors of Teradata Corporation.
- 1.3 Common Stock means the common stock of Teradata Corporation, par value \$.01 per share.
- 1.4 Company means Teradata Corporation, a Delaware corporation.
- 1.5 Deferred Stock Award means the annual retainer and/or meeting fees, if any, elected by a Participant to be deferred as set forth in ARTICLE III.
- 1.6 Deferred Stock Grant means the initial, annual or mid-year equity grants, if any, elected by a Participant to be deferred as set forth in ARTICLE IV.
- 1.7 Director means a member of the Board of Directors of Teradata Corporation who is not an employee of the Company.
- 1.8 Effective Date has the meaning set forth in the preamble of this Program.

-
- 1.9 Fair Market Value of a share of Common Stock as of a specified date means, unless otherwise determined by the Committee, the closing price of a share of Common Stock on the New York Stock Exchange or such other securities exchange as may at the applicable time be the principal market for the Common Stock (the “Applicable Exchange”) on the trading date, or if shares of Common Stock were not traded on the Applicable Exchange on the trading date, then on the immediately preceding date on which shares of Common Stock were traded, all as reported by such source as the Committee may select. If the Common Stock is not listed on a national securities exchange, Fair Market Value shall be determined by the Committee in its good faith discretion (and, if applicable, in accordance with the requirements of Section 409A of the Code).
- 1.10 Participant means a Director, and any former Director entitled to payment of a benefit from the Program.
- 1.11 Restricted Stock means actual shares of Common Stock bearing restrictions or conditions and issued to a Director pursuant to the Stock Incentive Plan.
- 1.12 Restricted Stock Units means awards granted pursuant to the Stock Incentive Plan that are denominated in shares of Common Stock that will be settled in an amount in cash, shares of Common Stock, or both, as designated in a Director’s individual award statement or agreement, based upon the Fair Market Value of a specified number of shares of Common Stock.
- 1.13 Stock Incentive Plan means the Teradata Corporation 2007 Stock Incentive Plan, as amended and restated, or its successor.
- 1.14 Stock Options means awards granted pursuant to the Stock Incentive Plan of “Nonqualified Options” (as defined in the Stock Incentive Plan) to acquire shares of Common Stock.
- 1.15 Year of Service means the approximately 12 month period beginning on the date of an annual stockholders’ meeting of the Company and ending on the day before the Company’s annual stockholders’ meeting of the next following year, during which an individual serves as a Director.

ARTICLE II

Compensation

- 2.1 Annual Compensation . A Director will receive the compensation described in Sections 2.2 through 2.5 below, as determined by the Committee in its discretion, based on review of competitive data.
- 2.2 Annual Retainer . For each Year of Service, a Director will receive an annual retainer as determined by the Committee, which may include an additional retainer amount for Committee Chairs. A Director may elect to receive the retainer in cash,

in Common Stock, or as a Deferred Stock Award, as described in ARTICLE III. If no election is made, the retainer will be paid in cash. If paid in cash or Common Stock, payment of 25% of the annual amount will be made on June 30, September 30, December 31, and March 31, provided the individual is serving as a Director on such dates. If the individual is not serving as a Director on any such date, the remaining amount of the retainer shall be forfeited.

If paid in Common Stock, the number of shares of Common Stock to be paid shall be determined by dividing the cash amount of the retainer due to the Director by the Fair Market Value of the Common Stock on the date the payment is due, rounding up to the next whole share.

- 2.3 Meeting Fees . The Committee may determine that Directors will receive a meeting fee for each meeting attended, and may determine that Committee Chairs will determine whether a particular special meeting is subject to a meeting fee. Meeting fees, if any, will be paid quarterly at the same time as the retainer, for meetings attended in the immediately preceding quarter, and may be paid in cash, Common Stock or as a Deferred Stock Award as provided in Article III.
- 2.4 Initial Equity Grant . On the date of first election to the Board, each Director will receive an initial equity grant in the form of Restricted Stock or Restricted Stock Units under the Stock Incentive Plan, as determined by the Committee in its discretion. If such grant is made in the form of Restricted Stock Units, a Director may elect to defer receipt of the Common Stock payable in respect of vested Restricted Stock Units as a Deferred Stock Grant as provided in Article IV. A Director will receive only one initial equity grant for any continuous period served as a Director. If a Director ceases to serve as a Director for a period of at least three years and is later again elected as a Director, he or she will receive a second initial equity grant for the second period served as a Director.
- 2.5 Annual Equity Grant . At each annual stockholders' meeting of the Company, each individual then serving as a Director or newly elected as a Director shall receive an equity grant under the Stock Incentive Plan, determined by the Committee, consisting of Restricted Stock, Restricted Stock Units and/or Stock Options. If Stock Options are granted, the exercise price for each optioned share will be the Fair Market Value of one share of Common Stock on the grant date. Except as otherwise provided in the applicable award agreement, any Stock Options that are granted will be fully vested and exercisable on the first anniversary of the grant date, subject to the Director's continued service through the vesting date. Except as otherwise provided in the applicable award agreement, any Restricted Stock Units awarded will vest in four equal, quarterly installments commencing three months after the grant date, subject to the Director's continued service through the applicable vesting date. If Restricted Stock or Restricted Stock Units are awarded, the Committee may determine that the shares or units will be forfeited if the Director ceases to serve as a director during a restriction period determined by the Committee. If the annual equity grant is made in the form of Restricted Stock Units, a Director may elect to defer receipt of the Common Stock payable in respect

of vested Restricted Stock Units as a Deferred Stock Grant as provided in ARTICLE IV.

- 2.6 Mid-Year Equity Grants. The Committee in its discretion may grant Stock Options and/or awards of Restricted Stock or Restricted Stock Units, as described in Section 2.5, to Directors who are newly elected to the Board after the annual stockholders' meeting. If a mid-year equity grant is made in the form of Restricted Stock Units, a Director may elect to defer receipt of the Common Stock payable in respect of vested Restricted Stock Units as a Deferred Stock Grant as provided in ARTICLE IV.

ARTICLE III

Deferred Stock Awards

- 3.1 Election to Defer. For each calendar year, a Director may elect to defer receipt of pay for services relating to the retainer and meeting fees, if any, to be received in that calendar year, and receive them instead as a Deferred Stock Award. The election must be made prior to the January 1 of the calendar year in which the services relating to the retainer or meeting fees will be rendered by a Director or such later date as is permitted by guidance issued under Section 409A of the Code. The election to defer shall be irrevocable commencing on December 31 of the calendar year prior to the calendar year that such election is in effect (or such earlier date as specified on the deferral election form). Notwithstanding the foregoing, a newly-elected Director may make an election no later than 30 days after the date of his or her election to the Board of Directors, which deferral election shall become irrevocable as of the thirtieth (30th) day following the Director's election to the Board of Directors (or such earlier date as specified on the deferral election form) and shall apply only to the retainer and meeting fees for services to be performed after the deferral election becomes irrevocable. A new election to defer may be made for each subsequent calendar year, provided the deferral election is made prior to the January 1 of the calendar year and shall be irrevocable for the following calendar year. If a new election is not made, or a prior election is not revoked for the immediately succeeding calendar year, the most recent election to defer will remain in effect and be irrevocable for the following calendar year.
- 3.2 Form of Election. The election to defer must be made in writing, on a form provided by the Company.
- 3.3 Deferral Periods. A Director may elect to receive the Deferred Stock Award at one of the following times:
- (a) on the date of termination as a Director consistent with the definition of separation from service as defined pursuant to Section 409A of the Code;
 - (b) on the date either five or ten years from the date of grant; or

- (c) in one to five equal annual installments, payable on April 30 of each year, beginning on the April 30 next following the date of termination as a Director consistent with the definition of separation from service as defined pursuant to Section 409A of the Code.
- 3.4 Deferred Stock Awards. If a Director elects to receive the annual retainer and meeting fees, if any, as a Deferred Stock Award, the Company will maintain a deferred stock account credited, as of the date a payment of the retainer or meeting fee would have otherwise been paid, with a number of stock units equal to the shares of Common Stock (rounded up to the nearest whole share) that could have been purchased with the amount deferred as of such date at the Fair Market Value of the Common Stock on such date. As of the date any dividend is paid to stockholders of Common Stock, the Director's deferred stock account shall also be credited with an additional number of stock units equal to the number of shares of Common Stock (including fractions of a share) that could have been purchased at the Fair Market Value on such date with the dividend paid on the number of shares of Common Stock equivalent to the number of share units credited to the Director's deferred stock account. In case of dividends paid in property, the dividend shall be deemed to be the fair market value of the property at the same time of distribution of the dividend, as determined by the Committee.
- 3.5 Distribution of Deferred Stock Award. Payment of a Director's Deferred Stock Award shall be made at the times elected by the Director at the time of his or her election. Distribution shall be made in shares of Common Stock. The Participant shall receive the number of whole shares of Common Stock to which the distribution is equivalent. The shares of Common Stock shall be paid from, and shall count against the share reserve of, the Stock Incentive Plan.

ARTICLE IV

Deferred Stock Grants

- 4.1 Election to Defer. If and to the extent Restricted Stock Units are granted to a Director for the initial equity grant described in Section 2.4 and/or in connection with the annual or mid-year equity grants described in Sections 2.5 and 2.6, respectively, a Director may elect to defer receipt of the Common Stock otherwise payable to the Director as such Restricted Stock Units vest. For the annual equity grant, the election to defer must be made prior to the January 1 of the calendar year in which the grant is made. The election to defer shall be irrevocable commencing on December 31 of the calendar year prior to the calendar year that such election is in effect (or such earlier date as specified on the deferral election form). For both the initial and mid-year equity grants for newly-elected Directors, such Directors must make the deferral election no later than 30 days after the date of his or her election to the Board of Directors, which deferral election shall become irrevocable as of the thirtieth (30th) day following the Director's election to the Board of Directors (or such earlier date as specified on the deferral election form) and shall

apply only to the initial and mid-year equity grants for services to be performed after the deferral election becomes irrevocable.

A new deferral election for annual equity grants may be made for each subsequent calendar year, provided the election to defer is made prior to the January 1 of that calendar year. If a new election is not made, or a prior election is not revoked for the immediately succeeding calendar year, the most recent election to defer will remain in effect and be irrevocable for the following calendar year.

- 4.2 Form of Election. The election to defer must be made in writing, on a form provided by the Company.
- 4.3 Deferral Periods. A Director may elect to receive the Common Stock at one of the times specified in Section 3.3 above.
- 4.4 Deferred Stock Accounts. If a Director elects to defer receipt of the Common Stock otherwise payable in respect of Restricted Stock Units awarded as initial, annual or mid-year equity grants, the Company will maintain a deferred stock account credited, as of the date of election to the Board, with a number of stock units equal to the shares of Common Stock the Director was entitled to receive as such Restricted Stock Units vested. As of the date any dividend is paid to stockholders of Common Stock, the Director's deferred stock account shall also be credited with an additional number of stock units equal to the number of shares of Common Stock (including fractions of a share) that could have been purchased at the Fair Market Value on such date with the dividend paid on the number of shares of Common Stock equivalent to the number of share units credited to the Director's deferred stock account. In case of dividends paid in property, the dividend shall be deemed to be the fair market value of the property at the same time of distribution of the dividend, as determined by the Committee.
- 4.5 Distribution of Deferred Stock Grant. Payment of a Director's Deferred Stock Grant shall be made at the times elected by the Director at the time of deferral, in shares of Common Stock. The Participant shall receive the number of whole shares of Common Stock to which the amount of the distribution is equivalent. The shares of Common Stock shall be paid from, and shall count against the share reserve of, the Stock Incentive Plan.

ARTICLE V

Distribution Upon Death

- 5.1 Distribution Upon Death. In the event of the death of a Participant, whether before or after termination of service, any Deferred Stock Award or Deferred Stock Grant due and unpaid on the date of the Participant's death shall be distributed in shares of Common Stock, and any retainer or meeting fees due and unpaid on the date of the Participant's death shall be paid in cash, to the Participant's designated beneficiary, or if no beneficiary is designated, to the Participant's estate, in a single lump sum

within 90 days after the Participant's death. Distribution of a Participant's Stock Options will be according to the terms of the Stock Option agreements.

- 5.2 Designation of Beneficiary . On the terms and subject to the conditions established by the Company or its designee, a Participant may designate one or more individuals or trusts as his or her beneficiary to receive payment of all or any designated portion of Deferred Stock Awards, Deferred Stock Grants, or retainer or meeting fees due and unpaid on the date of the Participant's death, or revoke or change any such designation.

ARTICLE VI

Administration

- 6.1 Withholding Taxes . The Company shall deduct from all distributions under the Program any taxes required to be withheld by federal, state or local governments. If distributions are made in shares of Common Stock, the Company shall have the right to retain the value of sufficient shares equal to the amount of the tax required to be withheld with respect to such distributions. In lieu of withholding the value of shares, the Company may require a recipient of a distribution in Common Stock to reimburse the Company for any such taxes required to be withheld upon such terms and conditions as the Company may prescribe.
- 6.2 Unfunded Nature of Program . This Program shall be unfunded. The funds used for payment of benefits hereunder shall, until such actual payment, continue to be part of the general funds of the Company, and no person other than the Company shall, by virtue of this Program, have any interest in any such funds. Nothing contained herein shall be deemed to create a trust of any kind or create any fiduciary relationship. To the extent that any person acquires a right to receive payments from the Company under this Program, such right shall be no greater than the right of any unsecured general creditor of the Company.
- 6.3 Non-alienation of Benefits . No benefit under the Plan shall be subject in any manner to anticipation, alienation, sale, transfer, assignment, pledge, encumbrance, or charge, including assignment pursuant to a domestic relations order, and any attempt to do so shall be void. No such benefit shall, prior to receipt thereof by the Participant, be in any manner liable for or subject to the debts, contracts, liabilities, or torts of the Participant.
- 6.4 Acceleration Upon a Change in Control . As provided in Section 10 of the Stock Incentive Plan and applicable provisions of a Director's individual award agreement or statement under this Program, the vesting of Stock Options, Restricted Stock and Restricted Stock Units, and the payment of Deferred Stock Awards and Deferred Stock Grants, may accelerate upon the occurrence of a Change in Control (as defined in Section 10(b) of the Plan). Notwithstanding the foregoing, to the extent necessary to comply with Section 409A, payment of Deferred Stock Awards and Deferred Stock Grants shall be made on the earlier of (a) a "change in the ownership," a "change in the ownership of a substantial portion of the assets" or a

“change in the effective control” of the Company within the meaning of Section 409A of the Code; or (b) at the time(s) specified in Section 3.3 pursuant to an election in effect under Section 3.1 or Section 4.1.

- 6.5 Amendment or Termination of the Program . The Committee at any time may amend or terminate the Program, provided that no such action shall adversely affect the right of any Participant or Beneficiary to a benefit to which he or she has become entitled pursuant to the Program, and no amendment or termination of the Program can alter the Participant’s deferrals of compensation in noncompliance with Section 409A of the Code, or the rules and regulations issued pursuant thereto. Any amendment or termination of the Program that is inconsistent with, or in violation of Code Section 409A, shall be void and of no effect.
- 6.6 Adjustments . In the event of a “Corporate Transaction” or a “Share Change” (each as defined in the Stock Incentive Plan), the number and kind of shares of Common Stock subject to Stock Options, Restricted Stock, Restricted Stock Units, Deferred Stock Awards and Deferred Stock Grants, and the exercise price of Stock Options, shall be subject to adjustment in accordance with the provisions of the Stock Incentive Plan.
- 6.7 Compliance with Section 409A . Notwithstanding any of the foregoing provisions of the Program, to the extent required in order to comply with Section 409A(a)(2)(B)(i) of the Code, Deferred Stock Awards and Deferred Stock Grants shall be paid on the first business day after the date that is six months following a Director’s “separation from service” within the meaning of Section 409A of the Code. The Program is intended to comply with the provisions of Section 409A of the Code, and the Treasury Regulations issued pursuant thereto; and the provisions of the Program will at all times be administered consistent therewith. Any provision of the Program that is inconsistent with, or in violation of, Section 409A of the Code, shall be void and of no effect. The Senior Vice President, Human Resources, and the General Counsel of the Company are delegated the responsibility to interpret and administer the Program consistent with Section 409A of the Code and to take necessary action pursuant to this Section 6.6 and Section 6.5 to assure that the Program is administered consistent with such provision.

**CERTIFICATION OF CHIEF EXECUTIVE OFFICER
PURSUANT TO SECURITIES
EXCHANGE ACT RULE 13a-14**

I, Michael F. Koehler, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Teradata Corporation;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting;
5. The registrant's other certifying officers and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

**CERTIFICATION PURSUANT TO
18 U.S.C. SECTION 1350,
AS ADOPTED PURSUANT TO
SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002**

In connection with the Quarterly Report of Teradata Corporation, a Delaware corporation (the “Company”), on Form 10-Q for the period ended June 30, 2011 as filed with the U.S. Securities and Exchange Commission on the date hereof (the “Report”), each of the undersigned officers of the Company does hereby certify, pursuant to 18 U.S.C. § 1350 (section 906 of the Sarbanes-Oxley Act of 2002), that:

- (1) the Report fully complies with the requirements of section 13(a) or 15(d) of the Securities Exchange Act of 1934; and
- (2) the information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.

The foregoing certification (i) is given to such officers’ knowledge, based upon such officers’ investigation as such officers reasonably deem appropriate; and (ii) is being furnished solely pursuant to 18 U.S.C. § 1350 (section 906 of the Sarbanes-Oxley Act of 2002) and is not being filed as part of the Report or as a separate disclosure document.
