## Via Named to 2026 GovTech 100 List

2026-03-05

NEW YORK--(BUSINESS WIRE)-- Via, the leading provider of technology for government transit systems, has been named to Government Technology's 2026 GovTech 100 list. This is the first time Via has been recognized as a [GovTech 100](#) company.

Published annually by Government Technology, the list serves as an exclusive compilation of 100 leading companies dedicated to providing impactful technology solutions to state and local government agencies across the United States.

"Via is incredibly passionate about building best-in-class technology for those that the tech industry has historically neglected: local governments and some of their most vulnerable constituents," said Daniel Ramot, Via's co-founder and CEO. "We know firsthand the criticality of the services that local governments provide, creating access to jobs, education, and healthcare. We are committed to ensuring that local government is not left behind in the AI revolution, and that our communities have the tools and digital infrastructure to drive economic and social prosperity."

Via provides a platform of software and technology-enabled services that transforms antiquated and siloed public transportation systems into smart, data-driven, and AI-powered efficient digital networks. This inclusion on the GovTech 100 highlights Via's role in modernizing public infrastructure and delivering essential services through innovative, scalable technology.

The GovTech 100 selection process involves rigorous evaluation by Government Technology's editorial team and a network of industry experts, recognizing companies with a proven track record of innovation and successful deployment of technology in the public sector.

### **About Via**

Via is the technology backbone of a modern transportation network. We transform public transportation systems into dynamic networks, based on data and demand. Cities and transit agencies around the world adopt Via's suite of software and technology-enabled services to replace fragmented legacy systems and consolidate operations. As a result, Via lowers the cost of providing transit,

improves the passenger experience, and brings more riders on board. Today, the Via platform is utilized by hundreds of cities across more than 30 countries to create public transportation systems that connect people with jobs, healthcare, and education.
