NETSCOUT

NEWS RELEASE

MEDIA ALERT: NETSCOUT to Demonstrate Service Assurance Solutions for Software-Defined Data Centers, Hybrid Clouds and BYOD at VMworld 2015

2015-08-31

SAN FRANCISCO--(BUSINESS WIRE)--Aug. 31, 2015-- Today at VMworld, VMware's Annual User Conference, **NETSCOUT SYSTEMS, INC.** (NASDAQ: NTCT), a market leader in service assurance and cyber security solutions, and a VMworld Solutions Exchange sponsor, announced that it will demonstrate how the NETSCOUT **nGeniusONE**® Service Assurance platform and **Adaptive Service Intelligence™** (ASI) technology allows IT teams to rapidly triage performance issues in virtual, physical and hybrid IT environments to provide a flawless user experience by achieving extraordinary service quality at VMworld 2015 US, in San Francisco, California.

Service delivery complexity is growing with virtualization as more things can go wrong in the data center, cloud and end-user computing. Traditional performance monitoring tools simply can't see the whole picture with disparate data sets and when users and customers experience service degradations IT organizations tend to respond with finger pointing and wasted time looking for the root cause of the problem. IT teams look to NETSCOUT for innovative ways to speed up problem identification and resolution with traffic-based intelligence. NETSCOUT solutions can be used for continuous monitoring and real-time analysis of VMware environments and initiatives including software-defined data center, hybrid cloud, and BYOD. VMworld is where NETSCOUT will demonstrate how IT professionals move from defense to offense by leveraging ASI technology across different physical and virtual instrumentation form factors to gain real-time infrastructure-wide performance visibility, reduce Mean-Time-To-Knowledge (MTTK) of service issues and save millions of dollars in the process.

WHERE:

NETSCOUT at VMworld 2015, Booth #1912

Moscone Convention Center, San Francisco, California

WHEN:

Date: August 30 –September 3, 2015

WHAT:

Service Assurance Challenge

Presentation: “Explore our Connected World.” NETSCOUT solution experts will be in the booth to discuss how the solutions can help assure service delivery in a shared connected world.

Location: NETSCOUT, Booth #1912

NETSCOUT Sponsor Breakout Session

Location: @ Use **Schedule Builder** for Location and Sign Up for Session SDDC6593-SPO

Date/Time: September 1, 2015 @ 2:00 - 3:00 p.m. PT

Title: Service Assurance Best Practices and Use Cases for the Software-Defined Enterprise

NETSCOUT has partnered with VMware to deliver service assurance solutions on vSphere and in VMware NSX environments. These solutions enable NETSCOUT customers to gain full service delivery insight for their virtual, physical and hybrid IT environments. In this session, you will learn how time is primarily wasted on identifying where a problem has originated when using traditional service degradation monitoring and resolution processes. NETSCOUT experts will present how traffic data is the singular source of truth for IT teams, providing full visibility into layers 2 through 7 as well as much needed insight into service performance interrelationships and their dependencies. This insight helps dramatically reduce the MTTK of service issues and save millions of dollars in the process.

NETSCOUT Speakers: Michael Segal, director of solutions marketing, (**LinkedIn**), and Eric Gray, chief solutions architect, (**LinkedIn**)

NETSCOUT Session

Location: @ Solutions Exchange Theater, Solutions Exchange Floor

Date/Time: Tuesday, September 1, 2015 @ 4:50 p.m. PT

Title: Service Assurance for the Physical, Virtual and Hybrid Connected World

You will learn how actionable traffic-based intelligence enables a flawless user experience by assuring service performance across the most demanding VMware environments including VMware NSX. This session will explore how to accomplish this objective by gaining full visibility and analyzing the performance of business services traversing VMs on the same and different hypervisors in multi-tier data centers. NetScout Speaker: Eric Gray, chief solutions architect, (**LinkedIn**)

About VMworld

VMworld is VMware's premier education and training destination for IT professionals worldwide. There are four full days of learning—best practices, training, new innovations—all on virtualization and the cloud. This year's conference focuses on real solutions with case studies, solutions, or best practices
