

MEDIA ALERT: NETSCOUT Systems to Demonstrate Advanced Network Optimization Services to Protect Carrier Wi-Fi Experience at INTX 2015

2015-04-29

WESTFORD, Mass.--(BUSINESS WIRE)--Apr. 29, 2015-- **NetScout Systems, Inc.** (NASDAQ: NTCT), today announced that it will demonstrate how **nGeniusONE®** Service Assurance platform provides network visibility and service assurance for cable providers at INTX 2015: The Internet and Television Expo, being held May 5 - 7, 2015, at McCormick Place West, in Chicago, Illinois.

WHAT

NetScout executives will be on-site to discuss topics including:

- Protecting carrier Wi-Fi's user experience
- Delivering seamless service visibility through physical and virtual infrastructures
- Assuring broadband user experience and the delivery of over-the-top (OTT) services
- Providing visibility in multi-screen video service performance

The connected world requires that broadband networks are always on. In order to ensure there is no off, the nGeniusONE Service Assurance platform and patented Adaptive Service Intelligence™ (ASI) technology provides automated analytics that result in proactive and early warnings of service degradation. NetScout technology provides visibility and insight into OTT service performance, usage and traffic patterns in order to assure the user experience for video, music, gaming and social sharing allowing service providers to optimize networks based on subscriber behavior.

Carrier Wi-Fi and broadband network access have become a requirement for subscriber's connected lifestyles.

NetScout helps to safeguard the connected world.

WHERE

NetScout Systems, Inc. at **INTX 2015: The Internet & Television Expo**

Booth #2329

McCormick Place West

Chicago, Illinois

About NetScout Systems, Inc.

NetScout Systems, Inc. (NASDAQ:NTCT) is the market leader in service assurance solutions that enable enterprise and service provider organizations to assure the quality of the user experience for business and mobile services. NetScout technology helps these organizations proactively manage service delivery and identify emerging performance problems, helping to quickly resolve issues that cause business disruptions or negatively impact users of information technology.
