

NEWS RELEASE

Media Alert: NETSCOUT to Demonstrate Service Assurance Solutions for Real-time Visibility, Insight, and Innovation at HPE Discover 2016

2016-06-01

WESTFORD, Mass.--(BUSINESS WIRE)--Jun. 1, 2016-- **NETSCOUT SYSTEMS, INC.** (NASDAQ: NTCT), a market leader in service assurance and cybersecurity solutions today announced that it will demonstrate how the NETSCOUT solutions, including nGeniusONE® Service Assurance platform and Adaptive Service Intelligence™ (ASI) technology, help IT organizations proactively discover the root cause of voice, video and data performance problems and how to quickly resolve them, at HPE Discover 2016, in Las Vegas, Nevada.

Next-generation IT initiatives and advancements in cloud, mobility, bring your own device (BYOD), software-defined networks (SDN), unified communications and collaboration services are improving the overall efficiency and speed of customer-impacting enterprise services. However, these changes can also cause disruptions or make them more difficult to remedy. Service delivery complexity is growing exponentially as more things can go wrong in physical, virtual and hybrid IT environments. Traditional silo- or vendor-specific performance monitoring tools simply cannot see the whole picture with disparate datasets.

NETSCOUT will showcase how IT professionals can leverage our innovative solutions to speed problem identification and resolution by utilizing continuous monitoring and real-time analysis of data, voice and video performance along with network and enablers' infrastructure performance. With NETSCOUT service assurance solutions, organizations will reduce the Mean Time to Knowledge (MTTK) of service problems and maximize the value of their enterprise business services.

WHERE:

Hewlett Packard Enterprise Discover 2016, NETSCOUT Booth #221

Sands Expo Center, Las Vegas, NV

WHEN:

Date: June 7 - 9, 2016

WHAT:

NETSCOUT Service Assurance solutions

NETSCOUT experts will be available to demonstrate how traffic data is used to gain a holistic view of the overall service delivery infrastructure. Attendees will learn how to keep enterprise services including CRM, ERP, web-based, cloud, and unified communications services running well all the time in our connected world.
