

Media Alert: NETSCOUT to Showcase Expanded Service Assurance Portfolio at Mobile World Congress 2016

2016-02-16

WESTFORD, Mass.--(BUSINESS WIRE)--Feb. 16, 2016-- **MOBILE WORLD CONGRESS 2016 – NETSCOUT SYSTEMS, INC.** (NASDAQ:NTCT), a market leader in service assurance and cybersecurity solutions, today announced it will showcase its portfolio for mobile network operators at Mobile World Congress 2016 (MWC).

NETSCOUT provides a top-down, service-centric perspective of networks, services, devices and subscribers into a single-pane-of-glass, addressing the requirements of multiple operations groups. NETSCOUT's portfolio of products, leverages its patented Adaptive Service Intelligence (ASI) technology, monitors data and control plane traffic and correlates data, signaling and service enabler performance metrics to reveal critical interactions and interdependencies that affect service performance.

WHO: NETSCOUT welcomes Mobile Network Operators to the booth to view our service assurance suite for:

- Radio Access Network service visibility,
- LTE/VoLTE/IMS monitoring,
- Big Data Analytics,
- RF and WiFi Field Tools, and
- Cyber Threat Detection and Mitigation.

Our staff of service assurance experts will be available to discuss our unique ability to monitor the performance and user experience of next-generation wireless service.

WHAT: NETSCOUT provides advanced service assurance solutions. Together, TrueCall, Iris Session Analyzer and nGeniusONE are able to completely deconstruct the traffic flow to understand both the signaling as well as the media quality from the radio access network to the core to the cloud.

NETSCOUT is able to provide both end-to-end user experience analytics as well as hop-by-hop analytics. This allows us to support both service triage (top down) as well as user specific (bottom-up) analytics for user experience and performance management.

This level of support allows Network Operation and Engineering teams the ability to view and proactively monitor service-level performance and will allow call center staff the ability to troubleshoot subscriber issues. Additionally, our automated analytics provides early warning of service degradation prior to it becoming a customer issue.

WHEN: February 22-25, 2016

WHERE: Mobile World Congress 2016

NETSCOUT Exhibits in Hall 1, Booth 1C40

Fira Gran Via

Av. Joan Carles I
64 08908 L'Hospitalet de Llobregat
Barcelona, Spain

IN-BOOTH: **Global Telecom Business** (GTB) will broadcast daily from the NETSCOUT booth. GTB will interview C-level industry leaders discussing trends in the industry. These videos will be available to view on both the NETSCOUT website as well as the GTB website the following day. Look for an upcoming interview in GTB with Bruce Kelley, chief technology officer at NETSCOUT as well as Richard Kenedi, president of NETSCOUT Service Provider Business Unit.

About NETSCOUT SYSTEMS, INC.

NETSCOUT SYSTEMS, INC. (NASDAQ:NTCT) is a market leader in real-time service assurance and cybersecurity solutions for today's most demanding service provider, enterprise and government networks. NETSCOUT's Adaptive Service Intelligence (ASI) technology continuously monitors the service delivery environment to identify performance issues and provides insight into network-based security threats, helping teams to quickly resolve issues that can cause business disruptions or impact user experience.
