NEWS RELEASE

NETSCOUT Announces Service Assurance for Unified Communications Webinar Series

2015-11-11

Organizations learn how to improve quality performance of UC services with nGeniusONE platform

WESTFORD, Mass.--(BUSINESS WIRE)--Nov. 11, 2015-- **NETSCOUT SYSTEMS, INC.** (NASDAQ: NTCT), a market leader in service assurance and cybersecurity solutions, today announced a webinar series focused on service assurance for several high-value Unified Communications (UC) initiatives being deployed by enterprise organizations all over the world. The **nGeniusONE**® Service Assurance platform with Adaptive Service Intelligence™ (ASI) patented technology offers rich insights into VoIP, video, and telepresence simultaneously with business data services. The webinar series will highlight ways NETSCOUT's enterprise customers are using the unique capabilities of the nGeniusONE platform to successfully reduce the time to identify the source of degradations impacting performance of their unified communications services.

UC, and in particular voice and video, are critical parts of customer interaction and business operations that are constantly evolving, expanding and improving. At any given time, IT teams may be in the middle of a VoIP upgrade or new rollout, a Session Border Controller (SBC) deployment to support a SIP Trunk strategy or introducing a new collaboration service and there is no room for poor quality for any of these services.

UC comes with its own inherent complexity demanding increased collaboration within the IT Operations teams who need to manage an increasing number of components and servers to deliver voice and video services over the enterprise network, WANs, PSTN and SIP trunks. Solving UC issues requires the ability to quickly triage and identify the source of the problem. This webinar series will demonstrate how the innovative nGeniusONE™ Service Assurance platform makes this possible.

What: The first webinar, Delivering High Quality Voice & Video Services

Who: Featuring Ray Krug, NETSCOUT Solutions Engineer

When: Wednesday November 18 at 10:00 a.m. PST / 1:00 p.m. EST

Topics addressing how the nGeniusONE platform offers unique capabilities to support several specific UC technology areas will be the focus of additional webinars being offered through the end of March 2016. Subjects covered will include service assurance for:

- UC in Contact Centers
- SIP trunking deployments
- UC in Healthcare organizations
