NETSCOUT Highlights Cyber Threat Analytics at Black Hat 2018

2018-08-01

Visit Booth 536 For Product Demos and Insightful Talks on The Cyber Threat Landscape

WESTFORD, Mass.--(BUSINESS WIRE)-- **NETSCOUT SYSTEMS, INC.** (NASDAQ: NTCT), a leading provider of service assurance, security, and business analytics, announced today it will be exhibiting its suite of service assurance and security solutions at Black Hat USA (Booth #536) from August 8-9 in Las Vegas, Nevada at the Mandalay Bay Convention Center.

As digital transformation continues to accelerate, application and service complexities are creating unique business challenges. To deliver uninterrupted, high-quality services in the digital economy, companies must find new ways to extract value from the mountains of data they are accumulating, and new ways to secure that data and the availability of their business services. NETSCOUT makes this possible, enabling enterprises' to successfully deliver, deploy, and secure applications and services across physical, virtual, and cloud environments. **nGenius™ hybrid cloud monitoring** and **Arbor security solutions** are the key to achieving performance and security assurance.

NETSCOUT Smart Data Driven Visibility for Security

NETSCOUT creates Smart Data by distilling real-time, precise intelligence from the noise of traffic data, simplifying the complex without losing the details. NETSCOUT Smart Data instantly provides the intelligence enterprises need to drive network and application performance, deliver unmatched user experience, and find and fix advanced cyber and DDoS threats. Visit us in Booth 536 to learn:

- Why no other company has Smart Data Visibility for superior advanced cyber threat analytics and DDoS defense.

- How NETSCOUT empowers organizations to connect and apply the macro view of emerging internet threats and trends with a micro view of what is happening across their entire internal organization from a security and visibility perspective.
- NETSCOUT will be conducting live product demonstrations of its award-winning enterprise tools, technology, and software solutions that help businesses achieve service and security assurance.

NETSCOUT Arbor Edge Defense: Automated Inbound and Outbound Threat Mitigation

Building on top of the capabilities of the market leading Arbor Availability Protection System (APS), NETSCOUT Arbor Edge Defense™ provides consolidated DDoS, Threat Intelligence Gateway (TIG) and Advanced Threat detection and mitigation capability at the network edge. Arbor Edge Defense consolidates multiple capabilities within a high-performance physical or virtual instance, integrating with other aspects of the enterprise security stack to detect and contain inbound and outbound threats. Arbor Edge Defense leverages the ATLAS global threat intelligence system, leading to continuous attack protections being fed directly into the product via the ATLAS Intelligence Feed.

The Science Behind the Madness – How Intelligence and Research Fuel Full Scope DDoS Protection

NETSCOUT security researchers will review the current state of malware propagation and source code distribution as larger and more advanced botnets are built around the world. The team will then demonstrate how this data forms the building blocks of knowledge necessary to respond to large scale DDoS attacks that are beginning to exceed 1 Tbps.

WHO: NETSCOUT Arbor's Security Engineering & Response Team
WHAT: Insight into Malware, Botnets & DDoS Attacks
WHEN: Wednesday, August 8 | 1:50pm-2:40pm
WHERE: Oceanside E, Mandalay Bay, Las Vegas

About NETSCOUT

NETSCOUT SYSTEMS, INC. (NASDAQ: NTCT) assures digital business services against disruptions in availability, performance, and security. Our market and technology leadership stems from combining our patented smart data technology with smart analytics. We provide real-time, pervasive visibility, and insights customers need to accelerate and secure their digital transformation. Our approach transforms the way organizations plan, deliver, integrate, test, and deploy services and applications. Our nGenius service assurance solutions provide real-time, contextual analysis of service, network, and application performance. Arbor security solutions protect against DDoS attacks that threaten availability and advanced threats that infiltrate networks to steal critical business assets. To

learn more about improving service, network, and application performance in physical or virtual data centers, or in the cloud, and how NETSCOUT's performance and security solutions, powered by service intelligence can help you move forward with confidence, visit **www.netscout.com** or follow @NETSCOUT and @ArborNetworks on Twitter, Facebook, or LinkedIn.

Safe Harbor

Forward-looking statements in this release are made pursuant to the safe harbor provisions of Section 21E of the Securities Exchange Act of 1934 and other federal securities laws. Investors are cautioned that statements in this press release, which are not strictly historical statements, including without limitation, the statements related to the benefits and capabilities of NETSCOUT's nGeniusPULSE solution and the Arbor Edge Defense solution, constitute forward-looking statements which involve risks and uncertainties. Actual results could differ materially from the forward-looking statements due to known and unknown risk, uncertainties, assumptions and other factors. Such factors include slowdowns or downturns in economic conditions generally and in the market for advanced network, service assurance and cybersecurity solutions specifically; the volatile foreign exchange environment; the Company's relationships with strategic partners and resellers; dependence upon broad-based acceptance of the Company's network performance management solutions; the presence of competitors with greater financial resources than we have, and their strategic response to our products; our ability to retain key executives and employees; lower than expected demand for the Company's products and services; and the timing and magnitude of stock buyback activity based on market conditions, corporate considerations, debt agreements, and regulatory requirements. For a more detailed description of the risk factors associated with the Company, please refer to the Company's Annual Report on Form 10-K for the fiscal year ended March 31, 2018, which is on file with the Securities and Exchange Commission. NETSCOUT assumes no obligation to update any forward-looking information contained in this press release or with respect to the announcements described herein.
