Voyager Announces Chief Administrative Officer

2026-03-02

DENVER--(BUSINESS WIRE)-- Voyager Technologies (NYSE: VOYG) announced the appointment of Shoshanna Moody as chief administrative officer, effective immediately, serving on the company's executive leadership team. As CAO, Moody will oversee enterprise operations, human resources, regulatory compliance, facilities, risk management and corporate services, supporting Voyager's continued scale and growth.

"Shoshanna will be a force multiplier as we continue to scale," said Dylan Taylor, chairman and CEO of Voyager. "She has a track record of building high-performing teams and systems, aligning complex organizations and driving disciplined execution, ensuring we scale with speed, rigor and operational excellence."

Moody brings nearly two decades of operational leadership across high-growth, regulated and multinational environments, designing enterprise frameworks, building scalable operating procedures and implementing performance systems for distributed, 24/7 teams. Most recently, she served as a fractional chief operating officer, preparing early-stage companies for launch through workforce planning, financial strategy and enterprise process development. Her experience spans annual strategic planning, risk and insurance oversight, facilities operations, compliance strategy and executive-level government engagement.

"Voyager is entering a defining phase, expanding facilities, increasing program velocity and growing our national presence," said Moody. "I'm excited to help build the infrastructure behind the mission, strengthening our people systems, operational discipline and enterprise alignment so our teams can execute with precision at scale."

She previously served in leadership roles at Instacart, where she led strategic market management and regulatory compliance operations across the United States and Canada, mitigating risk and safeguarding markets for the multibillion-dollar marketplace while working cross-functionally with executive teams across product, legal, finance

and operations. Prior to Instacart, she managed large-scale field operations for Lyft as well as global expansion and operational scaling for an international franchise organization.

About Voyager Technologies

Voyager Technologies is a defense and space technology company committed to advancing and delivering transformative, mission-critical solutions. Cautionary Statement Concerning Forward-Looking Statements:

This press release contains “forward-looking statements.” All statements, other than statements of historical fact, including those with respect to Voyager Space, Inc.’s (the “Company’s”) mission statement and growth strategy, are “forward-looking statements.” Although the Company’s management believes that such forward-looking statements are reasonable, it cannot guarantee that such expectations are, or will be, correct. These forward-looking statements involve many risks and uncertainties, which could cause the Company’s future results to differ materially from those anticipated. Potential risks and uncertainties include, among others, general economic conditions and conditions affecting the industries in which the Company operates; the uncertainty of regulatory requirements and approvals; and the ability to obtain necessary financing on acceptable terms or at all. Readers should not place any undue reliance on forward-looking statements since they involve these known and unknown uncertainties and other factors which are, in some cases, beyond the Company’s control and which could, and likely will, materially affect actual results, levels of activity, performance or achievements. Any forward-looking statement reflects the Company’s current views with respect to future events and is subject to these and other risks, uncertainties and assumptions relating to operations, results of operations, growth strategy and liquidity. The Company assumes no obligation to publicly update or revise these forward-looking statements for any reason, or to update the reasons actual results could differ materially from those anticipated in these forward-looking statements, even if new information becomes available in the future.
