

NEWS RELEASE

Voyager Appoints Joseph “Gus” Guastella as National Security Executive Vice President

2026-04-07

DENVER--(BUSINESS WIRE)-- Voyager Technologies (NYSE: VOYG) today announced the appointment of retired U.S. Air Force Lt. Gen. Joseph “Gus” Guastella as executive vice president of National Security, effective April 7. In this new role, Guastella will support Starlab and Voyager with their NASA civil Commercial LEO Development (CLD) program and key national security stakeholders, opening doors to new opportunities and positioning the organizations for future space station programs.

“Bridging Starlab, NASA and U.S. government national security users requires someone who understands how priorities are set at the highest levels of government and defense – and Gus is that person,” said Matt Kuta, president, Voyager. “He has built and defended the Air Force budget, led 28-nation coalitions in combat and spearheaded the integration of space capabilities into the warfighting domain – an extraordinarily rare combination. His experience will be critical to our ability to support the strategy between NASA and U.S. government national security users.”

Guastella retired from the U.S. Air Force as a lieutenant general following a distinguished 35-year career spanning warfighting command, defense budgeting and space modernization. He led a 28-nation coalition in air, space, and cyberspace campaigns across the Middle East, including Operation Inherent Resolve and Resolution Support in Afghanistan, while training and equipping 660,000 total force airmen. As director of operations for Air Force Space Command, the precursor to Space Force, Guastella led the integration of space capabilities into the warfighting domain and orchestrated the first concept of operations for space warfighting intelligence processes. Following his military service, he was vice president and regional executive for Europe and the Middle East at Northrop Grumman, where he focused on modernizing air, space and joint capabilities for allies and partners in alignment

with U.S. policy.

"Advancing national security by securing America's presence in low Earth orbit is a critical piece to ensuring the Department of War maintains the space-based capabilities the nation depends on," said Guastella. "What Voyager is doing matters to national security, and Starlab represents a generational opportunity to shape how America maintains leadership in space."

A combat-proven commander, Pentagon budget architect and space warfighting pioneer, Guastella brings unmatched credibility to the intersection of civil space and national security.

About Voyager Technologies

Voyager Technologies is a defense and space technology company committed to advancing and delivering transformative, mission-critical solutions. By tackling the most complex challenges, Voyager aims to unlock new frontiers for human progress, fortify national security, and protect critical assets from ground to space. Cautionary Statement Concerning Forward-Looking Statements:

This press release contains "forward-looking statements." All statements, other than statements of historical fact, including those with respect to Voyager Technologies, Inc.'s (the "Company's") mission statement and growth strategy, are "forward-looking statements." Although the Company's management believes that such forward-looking statements are reasonable, it cannot guarantee that such expectations are, or will be, correct. These forward-looking statements involve many risks and uncertainties, which could cause the Company's future results to differ materially from those anticipated. Potential risks and uncertainties include, among others, the Company's ability to sustain and generate growth, ability to generate a sustainable order rate for its products and services and develop new technologies to meet customer needs, general economic conditions and conditions affecting the industries in which the Company operates; the uncertainty of regulatory requirements and approvals; and the ability to obtain necessary financing on acceptable terms or at all. Readers should not place any undue reliance on forward-looking statements since they involve these known and unknown uncertainties and other factors which are, in some cases, beyond the Company's control and which could, and likely will, materially affect actual results, levels of activity, performance or achievements. Any forward-looking statement reflects the Company's current views with respect to future events and is subject to these and other risks, uncertainties and assumptions relating to operations, results of operations, growth strategy and liquidity. The Company assumes no obligation to publicly update or revise these forward-looking statements for any reason, or to update the reasons actual results could differ materially from those anticipated in these forward-looking statements, even if new information becomes available in the future.
