Voyager Awarded \$22.4M DoW Contract for Next-Gen Satellite Deployment Systems

2026-10-05

Commercial technology unlocks new mission capacity for national security launches

DENVER--(BUSINESS WIRE)-- Voyager Technologies (NYSE: VOYG) announced the award of a \$22.4 million Other Transaction Agreement (OTA) with the Strategic Capabilities Office (SCO) from the Department of War (DoW) for a Research and Development (R&D) effort to prototype next-generation satellite deployment systems. The effort's ultimate objective is to transition new technology and capability to the U.S. Space Force.

"This award reflects Voyager's confidence in our ability to move rapidly from concept to on-orbit capability," said Matt Magaña, president, Space, Defense & National Security, Voyager. "We're excited to work with the DoW on this R&D effort that has the goal of providing the Space Force new tools to put more capability on orbit faster, and without displacing primary mission objectives."

Under the OTA, Voyager will deliver prototype, but flight-ready small sat dispensers purpose-built to extract new mission value from space launches that otherwise leave payload capacity on the table. The program directly supports SCO's mandate to rapidly deliver transformative capabilities and strategic effects to combatant commanders.

Voyager brings decades of mission heritage in small satellite programs across civil, commercial, and national security customers. The company delivers end-to-end mission management, spanning payload integration, launch coordination safety assurance and on-orbit operations, with a proven record of getting spacecraft to orbit and keeping them there.

About Voyager Technologies

Voyager Technologies is a defense and space technology company committed to advancing and delivering transformative, mission-critical solutions. By tackling the most complex challenges, Voyager aims to unlock new frontiers for human progress, fortify national security, and protect critical assets from ground to space. Cautionary Statement Concerning Forward-Looking Statements:

This press release contains “forward-looking statements.” All statements, other than statements of historical fact, including those with respect to Voyager Technologies, Inc.’s (the “Company’s”) mission statement and growth strategy, are “forward-looking statements.” Although the Company’s management believes that such forward-looking statements are reasonable, it cannot guarantee that such expectations are, or will be, correct. These forward-looking statements involve many risks and uncertainties, which could cause the Company’s future results to differ materially from those anticipated. Potential risks and uncertainties include, among others, the Company’s ability to sustain and generate growth, ability to generate a sustainable order rate for its products and services and develop new technologies to meet customer needs, general economic conditions and conditions affecting the industries in which the Company operates; the uncertainty of regulatory requirements and approvals; and the ability to obtain necessary financing on acceptable terms or at all. Readers should not place any undue reliance on forward-looking statements since they involve these known and unknown uncertainties and other factors which are, in some cases, beyond the Company’s control and which could, and likely will, materially affect actual results, levels of activity, performance or achievements. Any forward-looking statement reflects the Company’s current views with respect to future events and is subject to these and other risks, uncertainties and assumptions relating to operations, results of operations, growth strategy and liquidity. The Company assumes no obligation to publicly update or revise these forward-looking statements for any reason, or to update the reasons actual results could differ materially from those anticipated in these forward-looking statements, even if new information becomes available in the future.
