

NEWS RELEASE

# Voyager Awarded \$24.5M NASA JSC Mission Management Contract

2026-02-09

Multi-year contract anchors International Space Station mission execution through 2030

DENVER--(BUSINESS WIRE)-- Voyager Technologies (NYSE: VOYG) was awarded a new Indefinite Delivery/Indefinite Quantity contract for NASA's Johnson Space Center, with a ceiling of \$24.5 million for a four-year period, to provide full-service mission management services to the International Space Station.

"Exploration depends on execution," said Scott Rodriguez, vice president, Government Programs, Voyager. "We make missions routine, safe and repeatable, integrating payloads, managing risk and executing in real-time."

Under the task-order contract, Voyager will deliver end-to-end mission services spanning payload integration, mission operations, safety and compliance, and post-mission closeout. NASA may add options that extend the scope and value of the agreement over its life, providing Voyager with a multi-year framework for recurring mission execution.

Voyager anticipates onboarding three payload missions over the next quarter, reflecting near-term demand and a steady pipeline of task orders supporting ongoing ISS operations.

The award builds on Voyager's performance under a previous NASA Johnson Space Center services contract, during which the company successfully executed more than 50 task orders. Those missions included waste deployment operations through the Bishop Airlock aboard the International Space Station and support for NASA's Established Program to Stimulate Competitive Research payloads, demonstrating Voyager's ability to manage diverse, high-tempo operational requirements.

The contract reinforces the company's position as a premiere mission management service provider, with proven, end-to-end human spaceflight execution experience. Voyager bridges ISS operations to the next generation of commercial platforms, including Starlab, where the company will apply the same integrated approach to payload readiness, safety and real-time mission execution.

## About Voyager Technologies

Voyager Technologies is a defense and space technology company committed to advancing and delivering transformative, mission-critical solutions. By tackling the most complex challenges, Voyager aims to unlock new frontiers for human progress, fortify national security, and protect critical assets from ground to space. ## Cautionary Statement Concerning Forward-Looking Statements:

This press release contains "forward-looking statements." All statements, other than statements of historical fact, including those with respect to Voyager Space, Inc.'s (the "Company's") mission statement and growth strategy, are "forward-looking statements." Although the Company's management believes that such forward-looking statements are reasonable, it cannot guarantee that such expectations are, or will be, correct. These forward-looking statements involve many risks and uncertainties, which could cause the Company's future results to differ materially from those anticipated. Potential risks and uncertainties include, among others, general economic conditions and conditions affecting the industries in which the Company operates; the uncertainty of regulatory requirements and approvals; and the ability to obtain necessary financing on acceptable terms or at all. Readers should not place any undue reliance on forward-looking statements since they involve these known and unknown uncertainties and other factors which are, in some cases, beyond the Company's control and which could, and likely will, materially affect actual results, levels of activity, performance or achievements. Any forward-looking statement reflects the Company's current views with respect to future events and is subject to these and other risks, uncertainties and assumptions relating to operations, results of operations, growth strategy and liquidity. The Company assumes no obligation to publicly update or revise these forward-looking statements for any reason, or to update the reasons actual results could differ materially from those anticipated in these forward-looking statements, even if new information becomes available in the future.
