NEWS RELEASE

Voyager Awarded $35M Contract to Manage NASA HUNCH

2026-11-04

Program supports a skilled workforce for commercial space economy

DENVER--(BUSINESS WIRE)-- Voyager Technologies (NYSE: VOYG) was awarded a new contract to manage NASA's High school students United with NASA to Create Hardware (HUNCH) program for the next five years at a value of $35M, extending the management role Voyager has held since 2021.

"Human spaceflight operations run on skilled people, and we're building that pipeline," said Matt Magaña, president, Space, Defense & National Security, Voyager. "We're advancing workforce development with HUNCH and strengthening the operational foundation we're scaling from the International Space Station to future commercial platforms like Starlab."

HUNCH provides high school students with hands-on experience designing and fabricating hardware used by NASA, with a facility in Webster, Texas, and a new location at Voyager's facility in Long Beach, California. To date, HUNCH has engaged more than 24,000 students from more than 1,700 schools in 46 states.

Voyager provides engineering and program support to bridge the gap between student innovation and operational space missions. More than 3,000 student-created items have flown to the International Space Station.

"Many students get their first real look at spaceflight through the HUNCH program," said Scott Rodriguez, vice president of Government Programs, Voyager. "With the support of Voyager, these students are solving real problems for NASA while learning the skills that can make them future assets to the industry."

Voyager's support of HUNCH builds a skilled pipeline of engineers, technicians and operators for civil, commercial and national security missions. The program aligns with Voyager's broader mission management capabilities and their efforts to grow a sustainable commercial space economy. Press assets available **here**. Cautionary Statement Concerning Forward-Looking Statements:

This press release contains "forward-looking statements." All statements, other than statements of historical fact, including those with respect to Voyager Technologies, Inc.'s (the "Company's") mission statement and growth strategy, are "forward-looking statements." Although the Company's management believes that such forward-looking statements are reasonable, it cannot guarantee that such expectations are, or will be, correct. These forward-looking statements involve many risks and uncertainties, which could cause the Company's future results to differ materially from those anticipated. Potential risks and uncertainties include, among others, the Company's ability to sustain and generate growth, ability to generate a sustainable order rate for its products and services and develop new technologies to meet customer needs, general economic conditions and conditions affecting the industries in which the Company operates; the uncertainty of regulatory requirements and approvals; and the ability to obtain necessary financing on acceptable terms or at all. Readers should not place any undue reliance on forward-looking statements since they involve these known and unknown uncertainties and other factors which are, in some cases, beyond the Company's control and which could, and likely will, materially affect actual results, levels of activity, performance or achievements. Any forward-looking statement reflects the Company's current views with respect to future events and is subject to these and other risks, uncertainties and assumptions relating to operations, results of operations, growth strategy and liquidity. The Company assumes no obligation to publicly update or revise these forward-looking statements for any reason, or to update the reasons actual results could differ materially from those anticipated in these forward-looking statements, even if new information becomes available in the future.
