Voyager Awarded Space Force Contract for Resilient Satellite Communications

2026-08-10

DENVER--(BUSINESS WIRE)-- Voyager Technologies (NYSE: VOYG) was awarded a contract with the U.S. Space Force Space Systems Command to develop space-to-space communication capabilities. The effort supports a resilient data transport architecture for the Department of Defense.

"The system we're developing will securely connect tactically linked spacecraft and systems across every orbit, but the best technology only changes the game if the government can afford to field it at speed and scale," said Matt Magaña, president, Space, Defense & National Security, Voyager. "Our ability to deliver commercially with manufacturing capacity, transparent pricing and cost predictability is critical as the Space Force scales their data network."

Under the contract, Voyager will develop a flight-ready waveform design capable of operating for a variety of orbits, with specific requirements for weight, power and design life. This requirement is one of many Space Force standards for space-to-space data link communications. The company will also perform an on-orbit communication demonstration.

The program accelerates the Space Force's mission to advance space-to-space communication technologies and enhance proliferated LEO capabilities, building directly on Voyager's extensive heritage in advanced space electronics and flight-proven performance. This includes radiation-hardened designs, precision radio frequency payloads and on-orbit electronics validated across multiple missions.

About Voyager Technologies

Voyager Technologies is a defense and space technology company committed to advancing and delivering transformative, mission-critical solutions. By tackling the most complex challenges, Voyager aims to unlock new frontiers for human progress, fortify national security, and protect critical assets from ground to space. Cautionary Statement Concerning Forward-Looking Statements:

This press release contains “forward-looking statements.” All statements, other than statements of historical fact, including those with respect to Voyager Technologies, Inc.’s (the “Company’s”) mission statement and growth strategy, are “forward-looking statements.” Although the Company’s management believes that such forward-looking statements are reasonable, it cannot guarantee that such expectations are, or will be, correct. These forward-looking statements involve many risks and uncertainties, which could cause the Company’s future results to differ materially from those anticipated. Potential risks and uncertainties include, among others, the Company’s ability to sustain and generate growth, ability to generate a sustainable order rate for its products and services and develop new technologies to meet customer needs, general economic conditions and conditions affecting the industries in which the Company operates; the uncertainty of regulatory requirements and approvals; and the ability to obtain necessary financing on acceptable terms or at all. Readers should not place any undue reliance on forward-looking statements since they involve these known and unknown uncertainties and other factors which are, in some cases, beyond the Company’s control and which could, and likely will, materially affect actual results, levels of activity, performance or achievements. Any forward-looking statement reflects the Company’s current views with respect to future events and is subject to these and other risks, uncertainties and assumptions relating to operations, results of operations, growth strategy and liquidity. The Company assumes no obligation to publicly update or revise these forward-looking statements for any reason, or to update the reasons actual results could differ materially from those anticipated in these forward-looking statements, even if new information becomes available in the future.
