# Voyager Enables International Commercial Space Economy

2026-04-14

Global partnership accelerates access to in-space research and manufacturing

DENVER--(BUSINESS WIRE)-- Voyager Technologies (NYSE: VOYG) expanded the Voyager Institute for Space, Technology and Advancement (VISTA) science park ecosystem with Obuda University in Budapest, Hungary, further enabling the commercial space economy.

"This agreement reflects the global demand for in-space research and manufacturing capabilities," said Jeffrey Manber, special representative to the Chairman and CEO, Voyager. "By partnering with leading institutions like Obuda University, we are enabling an international pipeline for the commercial LEO economy."

The MOU grants Obuda University reserved research resources, tenant opportunities and a seat alongside Fortune 500 companies, startups and government agencies within the VISTA ecosystem. The partnership is anchored by a broad collaborative framework covering research, education and technology development.

Obuda University is a recognized leader in engineering and business across Central Europe, with a growing foothold in the space domain. The MOU brings this talent and research capacity into the VISTA ecosystem.

VISTA is the first-of-its-kind U.S. science park dedicated to in-space research, manufacturing and services, located on the campus of The Ohio State University. VISTA unites aerospace companies, fast-moving startups, leading academic institutions and government agencies in a dynamic, platform-agnostic ecosystem built to accelerate discovery, collaboration and commercialization. With access to the International Space Station and future commercial space platforms, VISTA tenants develop next-generation space-based technologies and services across

civil, commercial and national security markets. For more information, visit [vistaspacepark.com](http://vistaspacepark.com).

## About Voyager Technologies

Voyager Technologies is a defense and space technology company committed to advancing and delivering transformative, mission-critical solutions. By tackling the most complex challenges, Voyager aims to unlock new frontiers for human progress, fortify national security, and protect critical assets from ground to space. ## Cautionary Statement Concerning Forward-Looking Statements:

This press release contains “forward-looking statements.” All statements, other than statements of historical fact, including those with respect to Voyager Technologies, Inc.’s (the “Company’s”) mission statement and growth strategy, are “forward-looking statements.” Although the Company’s management believes that such forward-looking statements are reasonable, it cannot guarantee that such expectations are, or will be, correct. These forward-looking statements involve many risks and uncertainties, which could cause the Company’s future results to differ materially from those anticipated. Potential risks and uncertainties include, among others, the Company’s ability to sustain and generate growth, ability to generate a sustainable order rate for its products and services and develop new technologies to meet customer needs, general economic conditions and conditions affecting the industries in which the Company operates; the uncertainty of regulatory requirements and approvals; and the ability to obtain necessary financing on acceptable terms or at all. Readers should not place any undue reliance on forward-looking statements since they involve these known and unknown uncertainties and other factors which are, in some cases, beyond the Company’s control and which could, and likely will, materially affect actual results, levels of activity, performance or achievements. Any forward-looking statement reflects the Company’s current views with respect to future events and is subject to these and other risks, uncertainties and assumptions relating to operations, results of operations, growth strategy and liquidity. The Company assumes no obligation to publicly update or revise these forward-looking statements for any reason, or to update the reasons actual results could differ materially from those anticipated in these forward-looking statements, even if new information becomes available in the future.
