

NEWS RELEASE

Voyager Named Via Satellite's 10 Hottest Companies of 2026

2026-02-25

DENVER--(BUSINESS WIRE)-- Voyager Technologies (NYSE: VOYG) has been named one of Via Satellite's 10 Hottest Companies in 2026, an annual recognition honoring the most innovative and impactful companies shaping the future of satellite and space industries.

"This recognition underscores our accelerating impact across space infrastructure and space systems," said Dylan Taylor, chairman and CEO of Voyager. "We are executing on a clear strategy to deliver integrated, mission-ready solutions – everything from advanced propulsion and defense systems to commercial space stations and next-generation infrastructure. The opportunities ahead are substantial, and we are scaling with urgency to meet them."

The award recognizes Voyager's growth, expanding industrial footprint and advanced capabilities across civil space, commercial markets and national security. A key driver of that momentum is Starlab, the next-generation commercial space station. Designed as a single-launch, continuously crewed successor to the International Space Station, Starlab is built to preserve critical laboratory capabilities while enabling commercial expansion in low-Earth orbit. The platform supports research, manufacturing, national security applications and international partnerships, anchoring the emerging commercial space economy.

Voyager continues to expand its industrial base and deliver high-impact solutions across civil, commercial and defense markets, advancing resilient space systems, propulsion, advanced electronics and scalable space platforms aligned with customer priorities and long-term growth opportunities.

About Voyager Technologies

Voyager Technologies is a defense and space technology company committed to advancing and delivering transformative, mission-critical solutions. By tackling the most complex challenges, Voyager aims to unlock new frontiers for human progress, fortify national security, and protect critical assets from ground to space. Cautionary Statement Concerning Forward-Looking Statements:

This press release contains “forward-looking statements.” All statements, other than statements of historical fact, including those with respect to Voyager Space, Inc.’s (the “Company’s”) mission statement and growth strategy, are “forward-looking statements.” Although the Company’s management believes that such forward-looking statements are reasonable, it cannot guarantee that such expectations are, or will be, correct. These forward-looking statements involve many risks and uncertainties, which could cause the Company’s future results to differ materially from those anticipated. Potential risks and uncertainties include, among others, general economic conditions and conditions affecting the industries in which the Company operates; the uncertainty of regulatory requirements and approvals; and the ability to obtain necessary financing on acceptable terms or at all. Readers should not place any undue reliance on forward-looking statements since they involve these known and unknown uncertainties and other factors which are, in some cases, beyond the Company’s control and which could, and likely will, materially affect actual results, levels of activity, performance or achievements. Any forward-looking statement reflects the Company’s current views with respect to future events and is subject to these and other risks, uncertainties and assumptions relating to operations, results of operations, growth strategy and liquidity. The Company assumes no obligation to publicly update or revise these forward-looking statements for any reason, or to update the reasons actual results could differ materially from those anticipated in these forward-looking statements, even if new information becomes available in the future.
