# Voyager Onboards With U.S. GSA Government-wide OASIS+ Contract

2025-05-28

The IDIQ positions businesses to develop innovative solutions for all federal agencies

DENVER--(**BUSINESS WIRE**)--Voyager Technologies, Inc. (Voyager), a global leader in defense technology and space solutions, is on contract for Research & Development (R&D) services under the U.S. General Services Administration's (GSA) One Acquisition for Integrated Services Plus (OASIS+) Indefinite Delivery Indefinite Quantity (IDIQ) contract vehicle.

"The contract opens the door for all federal agencies to tap into Voyager's mission-critical solutions," said Marshall Smith, president, Space Solutions, Voyager. "This includes space infrastructure, autonomous systems, aerospace engineering, materials science, secure communications and next-generation defense technologies."

Under the R&D domain, Voyager may provide technology and services in nanotechnology and biotechnology; physical engineering and life sciences; aircraft, aircraft engine and engine parts; and guided missiles and space vehicles, their propulsion units and propulsion parts.

"This IDIQ positions the government to move fast given the advancing threats our nation faces," said Matt Magaña, president, Defense & National Security, Voyager. "Now the government can take advantage of already developed components and parts for propulsion and weapon systems as well as satellites."

OASIS+ is a flexible, government-wide contract vehicle designed by GSA to simplify how federal agencies acquire complex non-IT service requirements such as research & development, engineering, logistics and consulting. As an IDIQ, OASIS+ allows federal buyers to issue task orders tailored to their unique program needs with confidence in

the quality and capability of awarded vendors.

About Voyager Technologies:

Voyager is a defense and space technology company committed to advancing and delivering transformative, mission-critical solutions. By tackling complex challenges, Voyager aims to unlock new frontiers for human progress, fortify national security and protect critical assets from ground to space. #### Cautionary Statement Concerning Forward-Looking Statements

This press release contains "forward-looking statements." All statements, other than statements of historical fact, including those with respect to Voyager Technologies, Inc.'s (the "Company's") mission statement and growth strategy, are "forward-looking statements." Although the Company's management believes that such forward-looking statements are reasonable, it cannot guarantee that such expectations are, or will be, correct. These forward-looking statements involve many risks and uncertainties, which could cause the Company's future results to differ materially from those anticipated. Potential risks and uncertainties include, among others, general economic conditions and conditions affecting the industries in which the Company operates; the uncertainty of regulatory requirements and approvals; and the ability to obtain necessary financing on acceptable terms or at all. Readers should not place any undue reliance on forward-looking statements since they involve these known and unknown uncertainties and other factors which are, in some cases, beyond the Company's control and which could, and likely will, materially affect actual results, levels of activity, performance or achievements. Any forward-looking statement reflects the Company's current views with respect to future events and is subject to these and other risks, uncertainties and assumptions relating to operations, results of operations, growth strategy and liquidity. The Company assumes no obligation to publicly update or revise these forward-looking statements for any reason, or to update the reasons that actual results could differ materially from those anticipated in these forward-looking statements, even if new information becomes available in the future.
