

NEWS RELEASE

Voyager Wins Contract with Sandia National Laboratories

2026-07-20

Mission accelerates national security research, delivering end-to-end execution in LEO

DENVER--(BUSINESS WIRE)-- Voyager Technologies (NYSE: VOYG) was awarded a new mission management contract with Sandia National Laboratories to fly their Big Boy demonstration aboard the International Space Station in 2027. The contract underscores the continued and growing demand for access to low-Earth orbit for national security research, with additional contracts expected to follow.

"Our station-agnostic, integrated approach to mission management enables space access for everyone from academia and government agencies to civil, commercial and defense industries," said Matt Magaña, president of Space, Defense and National Security, Voyager. "Supporting Sandia National Labs through every phase of execution from Earth to orbit is another proof point for how we are making America's presence in space durable, commercially viable and strategically strong."

Under the contract, Voyager will provide end-to-end mission management, including experiment design, payload integration, safety review, manifest and mission planning, and on-orbit operations. The payload will integrate with the company's NEL, an external payload platform mountable on Voyager's Bishop Airlock, the first and only permanent commercially owned module on the Space Station.

The first NEL platform will fly to the Space Station aboard Japan Aerospace Exploration Agency's HTV-X2. A second NEL platform will follow in the spring of 2027 to meet growing customer demand.

Based in New Mexico, Sandia National Labs is a multi-mission laboratory with the primary goal of advancing U.S.

national security through science-based technology development. The Big Boy demonstration and validation mission will validate on-orbit operations of parallel sensors that will improve understanding of lightning emissions and signals, the natural radiation environment, and sensor and optics degradation when exposed to launch, vacuum and reentry forces.

About Voyager Technologies

Voyager Technologies is a defense technology and space solutions company that enables mission-ready systems that secure today and power what's next for the U.S. and partner nations. From propulsion and energetics to advanced electronics, mission management and space exploration, Voyager delivers capabilities that protect national security, reinforce the industrial base and expand human presence beyond Earth. Cautionary Statement Concerning Forward-Looking Statements:

This press release contains "forward-looking statements." All statements, other than statements of historical fact, including those with respect to Voyager Technologies, Inc.'s (the "Company's") mission statement and growth strategy, are "forward-looking statements." Although the Company's management believes that such forward-looking statements are reasonable, it cannot guarantee that such expectations are, or will be, correct. These forward-looking statements involve many risks and uncertainties, which could cause the Company's future results to differ materially from those anticipated. Potential risks and uncertainties include, among others, the Company's ability to sustain and generate growth, ability to generate a sustainable order rate for its products and services and develop new technologies to meet customer needs, general economic conditions and conditions affecting the industries in which the Company operates; the uncertainty of regulatory requirements and approvals; and the ability to obtain necessary financing on acceptable terms or at all. Readers should not place any undue reliance on forward-looking statements since they involve these known and unknown uncertainties and other factors which are, in some cases, beyond the Company's control and which could, and likely will, materially affect actual results, levels of activity, performance or achievements. Any forward-looking statement reflects the Company's current views with respect to future events and is subject to these and other risks, uncertainties and assumptions relating to operations, results of operations, growth strategy and liquidity. The Company assumes no obligation to publicly update or revise these forward-looking statements for any reason, or to update the reasons actual results could differ materially from those anticipated in these forward-looking statements, even if new information becomes available in the future.
