Voyager and Latent AI Bring Advanced AI to Orbit

2025-08-18

Initiative to drive edge computing and Golden Dome efforts

DENVER--(BUSINESS WIRE)-- Voyager Technologies, Inc. [NYSE: VOYG] is investing in Latent AI, a leading AI software company turning data into decisive action at the edge in any domain.

"AI is transforming the edge from a passive collector to an active combat multiplier," said Dylan Taylor, CEO, Voyager Technologies. "We're making the leap from merely collecting data at the edge to understanding it instantly, putting mission intelligence where the mission happens in real time."

Latent AI optimizes AI for contested and constrained environments, bringing faster, smarter and more resilient decision-making to the edge. Their AI models provide mission-critical intelligence where it's needed most.

The investment will enhance Voyager's ability to deliver faster targeting, sharper situational awareness and decisive advantage. This is critical in missions the company supports, where every second counts – on orbit, in theater and at the tactical edge.

"Traditional AI relies on sending data thousands of miles to cloud resources – impractical when operating in space or contested environments," said Jags Kandasamy, Co-founder and CEO, Latent AI. "Voyager's investment accelerates our mission to put AI processing power exactly where operators need it most: at the point of decision."

The investment gives Latent AI the resources to broaden their hardware reach while accelerating product development. Enhanced AI applications and analysis may be performed on Voyager's space-based platforms such as onboard processors and avionic suites, extending to additional hardware programs.

Together, Voyager and Latent AI will cultivate a larger partner ecosystem, speed up innovation cycles and deliver improved edge intelligence to defense, space and industrial customers.

About Voyager Technologies

Voyager is a defense and space technology company committed to advancing and delivering transformative, mission-critical solutions. By tackling the most complex challenges, Voyager aims to unlock new frontiers for human progress, fortify national security and protect critical assets from ground to space. Cautionary Statement Concerning Forward-Looking Statements

This press release contains "forward-looking statements." All statements, other than statements of historical fact, including those with respect to Voyager Technologies, Inc.'s (the "Company's") mission statement and growth strategy, are "forward-looking statements." Although the Company's management believes that such forward-looking statements are reasonable, it cannot guarantee that such expectations are, or will be, correct. These forward-looking statements involve many risks and uncertainties, which could cause the Company's future results to differ materially from those anticipated. Potential risks and uncertainties include, among others, general economic conditions and conditions affecting the industries in which the Company operates; the uncertainty of regulatory requirements and approvals; and the ability to obtain necessary financing on acceptable terms or at all. Readers should not place any undue reliance on forward-looking statements since they involve these known and unknown uncertainties and other factors which are, in some cases, beyond the Company's control and which could, and likely will, materially affect actual results, levels of activity, performance or achievements. Any forward-looking statement reflects the Company's current views with respect to future events and is subject to these and other risks, uncertainties and assumptions relating to operations, results of operations, growth strategy and liquidity. The Company assumes no obligation to publicly update or revise these forward-looking statements for any reason, or to update the reasons that actual results could differ materially from those anticipated in these forward-looking statements, even if new information becomes available in the future.
