- Midnight will be the featured eVTOL aircraft on display at the Dubai Air Show, which runs from November 13-17
- Various members of the UAE Royal Family, UAE's General Civil Aviation Authority and other key stakeholders from the region set to experience Midnight at the event
- Archer CEO & Founder, Adam Goldstein, set to deliver opening keynote unveiling Archer's plans to bring electric air taxis to the UAE in 2026

DUBAI, United Arab Emirates--(BUSINESS WIRE)-- **Archer Aviation Inc.** (NYSE: ACHR), a leader in electric vertical takeoff and landing (eVTOL) aircraft, announced today its Midnight aircraft will make its Middle Eastern debut at the Dubai Air Show from November 13-17 as the featured aircraft in the Advanced Air Mobility (AAM) Pavilion. Additionally, Archer founder and CEO, Adam Goldstein, is set to deliver a keynote address as part of the show's opening ceremony unveiling Archer's plans to bring electric air taxis to the United Arab Emirates (UAE) in 2026. Archer will also have a presence in Mubadala Investment Company's booth, reflecting the two companies' long-standing relationship.

The Middle Eastern debut of Midnight at the Dubai Air Show will give a wide array of key regional stakeholders from the Royal Family to the UAE's General Civil Aviation Authority and beyond the opportunity to experience sitting in an

electric air taxi, providing an unprecedented glimpse at the future of urban air mobility in the UAE from one of the global leaders in the industry.

Recently, Archer and the Abu Dhabi Investment Office announced plans to make the UAE its first international launch partner, with plans to commence air taxi operations in both Abu Dhabi and Dubai in 2026. In addition, Archer is working with global manufacturing partner Stellantis and regional partners Falcon Aviation and GAL-AMMROC to build out aircraft manufacturing capabilities to service regional demands in the UAE and surrounding areas.

Archer's goal is to transform urban travel, replacing 60–90-minute commutes by car with estimated 10-20 minute electric air taxi flights that are safe, sustainable, low noise, and cost-competitive with ground transportation. Archer's Midnight is a piloted, four-passenger aircraft designed to perform rapid back-to-back flights with minimal charge time between flights.

About Archer

Archer is designing and developing electric vertical takeoff and landing aircraft for use in urban air mobility networks. Archer's mission is to unlock the skies, freeing everyone to reimagine how they move and spend time. Archer's team is based in Santa Clara, CA.
